Deciding Communication Law Susan Dente Ross,2004-05-20 This clearly written and well focused volume combines concise decisions of the primary areas of communication law with the foundational case decisions in those domains Thus in one volume students of communication law constitutional law political science and related fields find both the key rulings that define each area of law and a detailed summary of the legal concepts doctrines and policies so vital to understanding the rulings within their legal context The text forgoes the tendency to provide encyclopedic treatment of all the relevant cases and focuses instead on the two or three cases most vital to an accurate and informed understanding of the current state of each field of communication law The chapters provide readers with the most salient concepts and the necessary depth to understand the law while permitting most reading time to be directed to the law itself Full text rulings allow readers to immerse themselves in the law itself to develop a feel for its complexity its flexibility and its language Useful as a quick reference to the landmark rulings and the jurisprudence of communication law this book also serves well as the primary text in related undergraduate courses or as a supplemental text in graduate classes in the field

*The Parliamentary Debates*

(*official Report*). Great Britain. Parliament. House of Lords,1925      Cadres and Corruption Xiaobo Lü,2000 The most up to date and comprehensive analysis of corruption and change in the Chinese Communist Party *Cadres and Corruption* reveals the long history of the party's inability to maintain a corps of committed and disciplined cadres Contrary to popular understanding of China's pervasive corruption as an administrative or ethical problem the author argues that corruption is a reflection of political developments and the manner in which the regime has evolved Based on a wide range of previously unpublished documentary material and extensive interviews conducted by the author the book adopts a new approach to studying political corruption by focusing on organizational change within the ruling party In so doing it offers a fresh perspective on the causes and changing patterns of official corruption in China and on the nature of the Chinese Communist regime By inquiring into the developmental trajectory of the party's organization and its cadres since it came to power in 1949 the author argues that corruption among Communist cadres is not a phenomenon of the post Mao reform period nor is it caused by purely economic incentives in the emerging marketplace Rather it is the result of a long process of what he calls organizational involution that began as the Communist party state embarked on the path of Maoist continuous revolution In this process the Chinese Communist Party gradually lost its ability to sustain officialdom with either the Leninist cadre or the Weberian bureaucratic mode of integration Instead the party unintentionally created a neotraditional ethos mode of operation and set of authority relations among its cadres that have fostered official corruption      **Hearings** United States.
