On The Glassy Sea An Astronomers Journey:

On the Glassy Sea Tom Gehrels, 1988 On the Glassy Sea Tom Gehrels, 2008-07-11 **With Stars in Their Eyes** Jim Bernard Breckinridge, Alec M. Pridgeon, 2022 The incredible story of the Meinel's has never been told nor have their accomplishments and contributions ever been adequately recounted in one publication This book is an effort to redress that oversight using interviews from those who knew them best their own prodigious body of work including an unpublished autobiography and documentation in Presidential libraries as well as universities and the National Archives *Reports of Planetary Astronomy, 1989* ,1989 *NASA Technical Memorandum* ,1989 **The Quest for Comets** David H. Levy, 2013-11-11 The brilliant trailing beauty of fiery comets has inspired fear wonder and awe since the dawn of human history Brighter than stars moving and disappearing in their own singular orbits comets have been among the most mysterious elements in the sky eluding our understanding until very recently With the aid of space probes scientists have discovered that these swiftly moving chunks of ice and carbon are more plentiful and far more dangerous than suspected Scientists are also beginning to realize the monumental role played by comets in the development of the Earth and solar system David Levy describes in dramatic detail the thrilling yet often devastating effects of comet collisions In the dawn of our solar system the Earth was barraged with comets that may have carried the materials necessary to lay the foundations for life on this planet Levy also presents compelling evidence for later comet collisions including those of the age of dinosaurs Great impacts Levy asserts not only caused the extinction of the dinosaurs but ushered in new species of life As Levy so clearly explains scientists are realizing that comet collisions are virtually inevitable Levy reveals possible future collisions with the Earth and describes the terrible risks to life they would pose He even shows how we might prepare to withstand the impact of large comets in the future **Under Desert Skies** Melissa L. Sevigny, 2016-05-05 President Kennedy's announcement that an American would walk on the Moon before the end of the 1960s took the scientific world by surprise The study of the Moon and planets had long fallen out of favor with astronomers they were the stuff of science fiction not science An upstart planetary laboratory in Tucson would play a vital role in the nation's grand new venture and in doing so it would help create the field of planetary science Founded by Gerard P Kuiper in 1960 the Lunar and Planetary Laboratory LPL at the University of Arizona broke free from traditional astronomical techniques to embrace a wide range of disciplines necessary to the study of planets including geology atmospheric sciences and the elegant emerging technology of spacecraft Brash optimistic young students crafted a unique sense of camaraderie in the fledgling institution Driven by curiosity and imagination LPL scientists lived through and indeed made happen the shattering transition in which Earth's nearest neighbors became more than simple points of light in the sky Under Desert Skies tells the story of how a small corner of Arizona became Earth's ambassador to space From early efforts to reach the Moon to the first glimpses of Mars's bleak horizons and Titan's swirling atmosphere to the latest ambitious plans to touch an asteroid LPL's history encompasses

humanity's unfolding knowledge about our place in the universe **Zwicky** John Johnson Jr.,2019-09-10 Fritz Zwicky was one of the most inventive and iconoclastic scientists of the twentieth century Among other accomplishments he was the first to infer the existence of dark matter He also clashed with better known peers and became a pariah in the scientific community John Johnson Jr's biography brings this tempestuous maverick alive A History of Modern Planetary Physics: Transmuted past Stephen G. Brush,1996 **Andrei Sakharov** ,1991 Reminiscences of colleagues Journal of Astronomical History and Heritage ,1998 **Perspectives on Minority Influence** Serge Moscovici,Gabriel Mugny,Eddy van Avermaet,1985-06-27 The contributors to this volume examine social processes in terms of minority influence
