Applied Grammatology Gregory L. Ulmer, 2019-12-01 Originally published in 1984 In *Applied Grammatology* Gregory Ulmer provides an extraordinary introduction to the third applied phase of grammatology the science of writing outlined by Jacques Derrida in *Of Grammatology* Ulmer looks to the later experimental works of Derrida beginning with *Glas* and continuing through *Truth in Painting* and *The Post Card* In these he discovers a critical methodology radically different from the deconstruction for which Derrida is known At the same time he finds the source of a new pedagogy for all the humanities one based on grammatology and appropriate to the era of audiovisual communications in which we live Detractors of Derrida often accuse him of superficial wordplay and of using images and puns as nonfunctional subversions of academic conventions Ulmer argues that there is in fact a fully developed use of homonyms in Derrida's style which produces its own distinctive knowledge and insight Derrida's experiments with images moreover his expansion of descriptions of everyday objects such as umbrellas matchboxes and post cards into cognitive models serve to reveal a simplicity underlying intellectual discourse which could be used to eliminate the gap separating the general public from specialists in cultural studies Comparing the stylistic innovations of Derrida with Jacques Lacan's use of puns and diagrams with the German performance artist Joseph Beuys's demonstration of models and with the montage writing of the films of Sergei Eisenstein Ulmer explores the possibility of deriving a postmodernist pedagogy from Derrida's texts The first study to suggest the full potential of the program available in Derrida's writings *Applied Grammatology* is also the first outline of a Derridean alternative to deconstructionism With its shift away from Derrida's philosophical studies to his experimental texts Ulmer's book aims to inaugurate a new movement in the American adaptation of contemporary French theory *Joseph Beuys, the Multiples* Joseph Beuys, 1997 This first full English language edition has been updated to include corrections as well as additions to the original German language editions *Joseph Beuys*, 1995 *Prophete rechts, Prophete links* Ingrid Burgbacher-Krupka, 1977 *Joseph Beuys* Heiner Stachelhaus, 1991 The objects Beuys made were often willfully perplexing and provocative using unnervingly odd materials such as fat felt and honey His ephemeral but unforgettable performances described here in illuminating detail were shamanistic rituals All told he produced some 70 performances 50 installations 130 solo shows and countless lectures discussions seminars and interviews in the course of his approximately forty years as an artist **BOOK JACKET** *Art Books* Wolfgang M. Freitag, 2013-10-28 First published in 1997 For this second edition of *Art Books A Basic Bibliography of Monographs on Artists* the vast number of new books published since 1985 was surveyed and evaluated This has resulted in the selection of 3 395 additional titles These selections reflective of the increase in the monographic literature on artists during the last ten years are evidence of the activities of a larger number of art historians in more countries worldwide of the increasingly diverse and ambitious exhibition programs of museums whose number has also increased dramatically and also of a lively international art market and the attendant gallery activities The selections of
