Schools and Schooling in the Digital Age Neil Selwyn,2010-10-07 This book presents a wide ranging and critical exploration of a topic that lies at the heart of contemporary education The use of digital technology is now a key feature of schools and schooling around the world Yet despite its prominence technology use continues to be an area of education that rarely receives sustained critical attention and thought especially from those people who are most involved and affected by it

Technology tends to be something that many teachers learners parents policy makers and even academics approach as a routine rather than reflective matter Tackling the wider picture addressing the social cultural economic political and commercial aspects of schools and schooling in the digital age this book offers to make sense of what happens and what does not happen when the digital and the educational come together in the guise of schools technology In particular the book examines contemporary schooling in terms of social justice equality and participatory democracy Seeking to re politicise an increasingly depoliticised area of educational debate and analysis setting out to challenge the many contradictions that characterise the field of education technology today the author concludes by suggesting what forms schools and schooling in the digital age could and should take This is the perfect volume for anyone interested in the application and use of technology in education as well as the education policy and politics that surround it many will also find its innovative proposals for technology use an inspiration for their own teaching and learning

Online and Distance Learning: Concepts, Methodologies, Tools, and Applications Tomei, Lawrence A.,2007-07-31 This comprehensive six volume collection addresses all aspects of online and distance learning including information communication technologies applied to education virtual classrooms pedagogical systems Web based learning library information systems virtual universities and more It enables libraries to provide a foundational reference to meet the information needs of researchers educators practitioners administrators and other stakeholders in online and distance learning Provided by publisher

[Schools and Screens](#) Victoria Cain,2024-02-06 Why screens in schools from film screenings to instructional television to personal computers did not bring about the educational revolution promised by reformers Long before Chromebook giveaways and remote learning screen media technologies were enthusiastically promoted by American education reformers Again and again as schools deployed film screenings television programs and computer games screen based learning was touted as a cure for all educational ills But the transformation promised by advocates for screens in schools never happened In this book Victoria Cain chronicles important episodes in the history of educational technology as reformers technocrats public television producers and computer scientists tried to harness the power of screen based media to shape successive generations of students Cain describes how beginning in the 1930s champions of educational technology saw screens in schools as essential tools for training citizens and presented films to that end Among the films screened for educational purposes was the notoriously racist *Birth of a Nation* In the 1950s and 1960s both technocrats and leftist educators turned to screens to prepare young Americans for Cold War citizenship and from the 1970s through the 1990s as commercial television and personal computers arrived in classrooms screens in schools represented an increasingly privatized vision of schooling and civic engagement Cain argues that the story of screens in schools is not simply about efforts to develop the right technological tools rather it reflects ongoing tensions over citizenship racial politics private funding and distrust of teachers Ultimately she shows that the technologies that reformers had envisioned as improving education and training students in civic participation in fact

deepened educational inequities
