## **Science And Technology Museums:**

*America's Science Museums* Victor J. Danilov, 1990-11-29 Danilov is a preeminent authority on museums According to Danilov visits to science related museums constitute 38 to 45 percent of all visits to museums in the U S At the beginning of each section there is an introduction describing the history of that particular type of museum Museum entries vary from about one half page to two pages in length A typical entry provides a history of the museum and description of the collection *America's Science Museums* is a well designed book that can be recommended to all public and academic libraries Reference Books Bulletin Science museums although they comprise less than 20 percent of the nearly 7 000 cultural institutions known as museums in the United States have become America's most popular type of museum From New Bedford to Waikiki *America's Science Museums* assesses the nation's scientific and technological museums and related institutions examining their histories operations and offerings This reference volume looks at the many different types of such institutions including some that are not called museums but that are museum like in their operations such as aquariums botanical gardens arboretums planetariums and zoos In addition some related facilities such as marinelife and wildlife parks and research sites with visitor centers such as observatories and NASA space centers are included Most of the museums described in the twelve sections of this unique comprehensive guide were selected because of their stature in the field while others were included because of their age specialty or novelty Overall the museums detailed here represent a cross section of the rapidly expanding science museum field and they illustrate why science museums have become so popular and instrumental in furthering science literacy across the U S The book's twelve sections focus on aquariums marine museums and marine life parks aviation and space museums botanical gardens conservatories and arboretums industrial history museums maritime and naval museums medical and health museums natural history museums planetariums and observatories science and technology centers transport automobile and railway museums zoos and wildlife parks and other science technology museums Thorough descriptions of the 480 museums and related institutions provide comparative information on the nature development facilities collections and offerings of each An ideal reference for college courses dealing with the history philosophy collections exhibits operations and management of museums and for other researchers seeking background information and insight into the special merits of the leading institutions in the fields of science and technology *Science and Technology Museums* Stella V. F. Butler, 1992 This is a full review of the treatment of science and technology in museums It discusses the nature of science and its cultural standing at the end of the 20th century as well as the history of science museums in Europe and North America and the effects upon them of the heritage phenomenon It also includes much of strictly practical interest it reviews and compares the very best of modern practice in San Francisco and Toronto in London Paris and Berlin it discusses the technical problems of displaying working machinery and of interpreting unfamiliar and difficult concepts for the public it explains the principal approaches to collection management and draws lessons from all

over the world to compile a thorough appraisal of the effects of the new market orientated consumer led philosophy on the content and practices of science museums

**Canadian Army Manual of Training**, 1957

**Museums and the Public Understanding of Science** John Durant, Committee on the Public Understanding of Science, 1992 The essays in this volume are organised thematically The first essay sets the scene by reviewing the present position and future potential of science museums as educational and cultural resources The next section is devoted to the role of museum exhibitions and analyses how exhibitions deal with complex material The third section is concerned with museum programmes and reports on the strengths and weaknesses of different museum programmes ranging from gallery drama to the Boston Museum s innovative experiment with Science by mail

**Museums in Motion** Edward P. Alexander, Mary Alexander, 2008 In 1979 Edward P Alexander s *Museums in Motion* was hailed as a much needed addition to the museum literature In combining the history of museums since the eighteenth century with a detailed examination of the function of museums and museum workers in modern society it served as an essential resource for those seeking to enter to the museum profession and for established professionals looking for an expanded understanding of their own discipline Now Mary Alexander has produced a newly revised edition of the classic text bringing it the twenty first century with coverage of emerging trends resources and challenges New material also includes a discussion of the children s museum as a distinct type of institution and an exploration of the role computers play in both outreach and traditional in person visits

**Provisional List of Museums of Science and Technology** ICOM International Committee of Science and Technology Museums, 1963\*

**The Museum** Michael S. Sharpiro, 1990-07-24 This critical bibliography of museum studies comprises an organized collection of essays on the various types of museums art natural history history science and technology and folk and on general aspects collections education exhibitions etc that cut across the media Most of the essays are cogent substantial if not comprehensive and clear The editor has taken care to see that they follow a similar format of historical essay followed by a full bibliography of items discussed Library Journal As the number of museums in the United States has grown to more than 6500 in this century the museum profession has experienced similar growth In addition to academic training and accreditation programs in the field an expanding body of literature on museum history philosophy and functions has evolved little of which has received the critical attention it deserves This reference volume serves as an up to date guide to this wealth of literature identifying and evaluating works that introduce the general reader the museum studies student and the beginning professional to the history philosophy and functions of museums The volume presents a series of informative historical outlines and critical bibliographic essays on all aspects of museum history philosophy and functions Contributors treat such subjects as art museums natural history museums science and technology museums history museums collections exhibition education and interpretation and the public and museums Each chapter consists of an introductory historical narrative a survey of sources and a bibliographic checklist that contains cited and additional sources A set of appendices include a geographically

organized bibliography of museum directories a guide to archives and special collections and a selective list of museum related periodicals The book concludes with a comprehensive general subject index This work will be an important reference tool for museum professionals and cultural historians as well as for courses in museum studies It will also be a valuable addition to both academic and public libraries

**Handbook for Small Science Centers** Dennis Schatz,Cynthia C. Yao,Lynn D. Dierking,Peter A. Anderson,Sarah Wolf,2006-10-10 There has been and continues to be an explosion of interest in developing new small science centers that is changing the world of museums This handbook is designed to be a one stop source for future and current centers and anyone interested in the important roles these institutions play in their communities With articles all written by leaders in field covering everything from administration staffing finance marketing exhibit design and beyond this comprehensive resource will be essential reading for institutions that are operating successfully struggling to survive and those planning major expansions

**Museums** John E. Simmons,2016-07-07 This comprehensive history of museums begins with the origins of collecting in prehistory and traces the evolution of museums from grave goods to treasure troves from the Alexandrian Temple of the Muses to the Renaissance cabinets of curiosities and onto the diverse array of modern institutions worldwide The development of museums as public institutions is explored in the context of world history with a special emphasis on the significance of objects and collecting The book examines how the successful exportation of the European museum model and its international adaptations have created public institutions that are critical tools in diverse societies for understanding the world Rather than focusing on a specialized aspect of museum history this volume provides a comprehensive synthesis of museums worldwide from their earliest origins to the present Museums A History tells the fascinating story of how museums respond to the needs of the cultures that create them Readers will come away with an understanding of the comprehensive history of museums from prehistoric collections to the presentthe evolution of museums presented in the context of world historythe development of museums considered in diverse cultural contextsglobal perspective on museumsthe object centered history of museumsmuseums as memory institutionsA constant theme throughout the book is that museums have evolved to become institutions in which objects and learning are associated to help human beings understand the world around them Illustrations amplify the discussions

Museums on the Web Karin de Wild,Nadezhda Povroznik,2025-03-11 This book gathers insights from leading experts to explore the field of virtual museums It delves into pioneering initiatives from the past deepens our understanding of current museum practices on the Web and examines emerging possibilities for future developments The first virtual museums appeared on the World Wide Web in the early 1990s today digital collections and online activities are integral to museum practice In a remarkably short time online technologies have transformed how museums manage collections design exhibitions and interact with audiences As the digital landscape evolves with advancements like AI and the Semantic Web museums will continue to face new challenges How did we reach this point This book examines the legacies and rapid advancements of virtual museums to

provide a deeper understanding of and better leverage for digital technologies This insightful volume is intended for scholars museum professionals and anyone interested in the digital transformation of museums It was originally published as a special issue of the journal Internet Histories
