Science And Technology Advice For Congress:

Science and Technology Advice for Congress M. Granger Morgan, Jon M. Peha, 2003-09-10 The elimination of the Office of Technology Assessment OTA in 1995 came during a storm of budget cutting and partisan conflict Operationally it left Congress without an institutional arrangement to bring expert scientific and technological advice into the process of legislative decisionmaking This deficiency has become increasingly critical as more and more of the decisions faced by Congress and society require judgments based on highly specialized technical information Offering perspectives from scholars and scientists with diverse academic backgrounds and extensive experience within the policy process Science and Technology Advice for Congress breaks from the politics of the OTA and its contentious aftermath Granger Morgan and Jon Peha begin with an overview of the use of technical information in framing policy issues crafting legislation and the overall process of governing They note how as nonexperts legislators must make decisions in the face of scientific uncertainty and competing scientific claims from stakeholders The contributors continue with a discussion of why OTA was created They draw lessons from OTA's demise and compare the use of science and technological information in Europe with the United States The second part of the book responds to requests from congressional leaders for practical solutions Among the options discussed are expanded functions within existing agencies such as the General Accounting or Congressional Budget Offices an independent NGO administrated analysis group and a dedicated successor to OTA within Congress The models emphasize flexibility and the need to make political feasibility a core component of design

Toward More Effective Science and Technology Advice for Congress Peter D. Blair, 2021-04-15 Toward More Effective Science and Technology Advice for Congress traces the historical roots of science and technology advice for Congress and chronicles the creation and evolution of the four organizations that provided this advice over the past half century 1 the National Research Council 2 the Congressional Research Service 3 the former Office of Technology Assessment and 4 the Government Accountability Office Key characteristics for providing effective S T advice for Congress are defined and then used to evaluate the relative strengths and weaknesses of these organizations today and to identify prospective organizational improvements in each to meet today's needs

Science and Technology Advice William T. Golden, 2017-09-08 This volume aims to attract attention to the necessity for quality advice on science and technology issues to the president of the United States to the Congress and to the judiciary It emphasizes reconsideration and improvement of existing organizations and mechanisms mindful of the need to adapt to changing circumstances Golden has gathered facts and opinions useful to a wide range of people government officials and staffs in all three branches journalists scholars and students of political science science policy and the history of science policy members of the industrial and financial communities and the concerned citizenry The eighty five prominent experts include both of President Reagan's

science advisors President Gerald R Ford congressional leaders and distinguished members of the judiciary **Science and Technology Advice for Congress** Jon M. Peha, 2018 When issues are rooted in science or technology Members of Congress often need assistance in framing issues identifying legislative options and assessing all the pros and cons of each option so they can make informed decisions that are consistent with their own values and priorities Today Congress has no reliable impartial source available to provide detailed analysis of this type with the possible exception of a limited pilot effort within GAO It is time for Congress to move beyond pilots and to establish a permanent technology assessment capability When creating a permanent solution the greatest challenges will be to ensure that this new technology assessment program has careful and balanced bipartisan and bicameral oversight and that its staff and funding levels will remain stable even through heated controversies and budget crises Ideally they should receive sufficient resources to offer a significant amount of support for Congress but stability is more important than size **Scientific and Technical Advice for the U.S. Congress** United States. Congress. House. Committee on Science, 2006 Science and Technology Advice to the President, Congress, and Judiciary William T. Golden, 1988 This volume aims to attract attention to the necessity for quality advice on science and technology issues to the president of the United States to the Congress and to the judiciary It emphasizes reconsideration and improvement of existing organizations and mechanisms mindful of the need to adapt to changing circumstances Golden has gathered facts and opinions useful to a wide range of people government officials and staffs in all three branches journalists scholars and students of political science science policy and the history of science policy members of the industrial and financial communities and the concerned citizenry The eighty six prominent experts include both of President Reagan's science advisors President Gerald R Ford congressional leaders and distinguished members of the judiciary **Science and Technology Advice** G. Ghurye, 2017-09-28 This volume aims to attract attention to the necessity for quality advice on science and technology issues to the president of the United States to the Congress and to the judiciary It emphasizes reconsideration and improvement of existing organizations and mechanisms mindful of the need to adapt to changing circumstances Golden has gathered facts and opinions useful to a wide range of people government officials and staffs in all three branches journalists scholars and students of political science science policy and the history of science policy members of the industrial and financial communities and the concerned citizenry The eighty five prominent experts include both of President Reagan's science advisors President Gerald R Ford congressional leaders and distinguished members of the judiciary **Congress's Own Think Tank** P. Blair, 2013-09-13 Congress Own Think Tank recaps the OTA experience its creation operation and circumstances of its closure and that of organizations attempting to fill the gap since OTA's closure as well as a number of new forces shaping the current context for science and technology issues facing the Congress Current Controversies in the Biological Sciences Karen F. Greif, Jon F. Merz, 2007-02-23 In recent years advances in biological science and technology have outpaced policymakers attempts to deal with them Current Controversies in the

Biological Sciences examines the ways in which the federal government uses scientific information in reaching policy decisions providing case studies of the interactions between science and government on different biomedical biological and environmental issues These case studies document a broad range of complex issues in science policy from the Human Genome Project to tobacco regulation and provide an accessible overview of both the science behind the issues and the policy making process The cases illustrate the different ways in which science and politics intersect in policy decisions as well as the different forms policy itself may take including not only regulatory action but the lack of regulation Among the topics examined are public and private research funding as seen in gene patenting reluctance to regulate even when a product has been proven unhealthy as in the case of tobacco a comparison of U S and international policy responses to genetically modified organisms and the competing interests at play in air pollution policy Each chapter includes shorter side essays on related topics for example essays on issues raised by the SARS epidemic accompany the detailed case study of the public health response to the anthrax laced mail received in the weeks after 9 11 This clear and readable introduction to controversial issues in the biological sciences will be a valuable resource for students of science policy and bioethics and for professionals in industry government and nongovernmental organizations who need background on emerging issues in the biological sciences
