Science Et Christ Paperback By Chardin Pierre Teilhard De:

Christianity and Evolution Pierre Teilhard de Chardin, 2002-11-18 The author of *The Phenomenon of Man* reconciles passionate faith with the rigor of scientific thinking With his unique background as a geologist paleontologist and Jesuit priest Pierre Teilhard de Chardin was a powerful exponent of the view that scientific theories could comfortably coexist with religious faith To this day his ideas provoke passionate debates in communities that view science and faith as necessarily separate ideologies In this collection of nineteen essays Teilhard seeks to illuminate a middle ground between science and religion that he felt both disciplines could accept He explores the Fall and original sin the possibility of life on other planets and the role that God may have played in the process of human evolution successfully challenging contemporary theologians to rethink their views of the universe and its creation Like other great visionary poets Blake Hopkins Yeats Teilhard engages the reader both intellectually and sensually *The Washington Post Book World* An excellent blend of theological speculation with practical or ascetical application *Catholic Telegraph* **Science and Faith in Teilhard de Chardin** Claude Cuénot, 1967 The first two parts of the book are lectures given by Dr Cuénot at the first annual conference in October 1966 of the Pierre Teilhard de Chardin Association of Great Britain and Ireland Then follows a comment made by Professor Garaudy at the conference The text concludes with an original essay by Dr Cuénot which examines Teilhard's influence on contemporary thinkers **Christianity and Evolution** Pierre Teilhard de Chardin, 2002-10-21 Nineteen essays concerned with the relationship of science and religion As a believing scientist Teilhard wrestled with the problem of presenting to the believer a scientific picture that would enlarge his religious vision and to the scientist a statement of religious ideas that would integrate with his understanding of reality Foreword by N M Wildiers Index Translated by Ren Hague A Helen and Kurt Wolff Book **The Heart of Matter** Pierre Teilhard de Chardin, 1979 *Vying for Truth - Theology and the Natural Sciences* Hans Schwarz, 2014-06-18 The emancipation of the natural sciences from religion was a gradual affair during the last four centuries Initially many of the leading scientists were churchmen indicating a symbiosis between faith and reason Due to the increasing specialization in the sciences this close connection came to an end often leading to antagonism and mutual suspicion This book traces this historical development with its twists and turns in both Europe and North America It depicts the major players in this story and outlines their specific contributions The main focus is on the 19th and 20th centuries with figures such as Darwin and Hodge but also Beecher and Abbott in the 19th century In the 20th century the narrative starts with Karl Barth and moves all the way to Hawking and Tipler Special attention is given to representatives from North America Great Britain and Germany In conclusion important issues are presented in the present day dialogue between theology and the natural sciences The issue of design and fine tuning is picked up and advances in brain research Finally technological issues are assessed and the status of medicine as a helpmate for life is discussed An informative and thought provoking book The Future of Christology Dong-Kun Kim, 2019-06-28 The Future of Christology addresses the

questions that Christology currently faces and or will face in the future in 12 topics The book consists of two parts In the first part Kim deals with five topics related to traditional Christology while in the second part he wrestles with seven topics related to issues of Christology The twenty first century is a challenging time for Christianity Many in our age are asking what Jesus Christ means in various dimensions of history culture nature and even beyond the Earth Changes in values worldviews and views of the universe are forming a new zeitgeist Dong Kun Kim argues that ways of understanding Christ should change accordingly for a Christology that fails to communicate meaningfully with the times is void of vitality Postmodernism dehistoricization and life post ideology multiculturalism multiple religions and above all the rapid development of the natural sciences pose a serious challenge to traditional Christology Who is Christ in the age of an infinite cosmos How do daily human life social devotion and praxis relate to salvation How can we discuss salvation history in an era post history Where does Christ stand in the public sphere Can the Chalcedonian definition of the two natures of Christ true God and true human being encompass nature and the cosmos would a third nature of Christ be necessary Will the cyborg which may appear in the near future be the object of Christ s salvation If scientific determinism becomes popular in the future will the basis of faith in Christ lose ground If intelligent life exists in the universe what does Christ mean to such life This book provides innovative answers to these questions in an academic context **Let Me Explain** Pierre Teilhard de Chardin,1970 *Catholic Dogmatic Theology* Jean-Herve Nicolas,2023-01-17 This volume discusses the nature of theological science and the mystery of the Triune God introduces the reader to classical Thomistic positions concerning the theological articulation of the Trinitarian mystery including the topic of the divine missions providing an important connection between the dogmatic portion of theology and its spiritual moral concerns **Alexei Khomiakov** Artur Mrowczynski-Van Allen,Teresa Obolevitch,Pawel Rojek,2019-07-10 Alexei Khomiakov 1804 1860 a great Russian thinker one of the founders of the Slavophile school of thought nowadays might be seen as one of the precursors of critical thought on the dangers of modern political ideas The pathologies that Khomiakov attributes to Catholicism and Protestantism authoritarianism individualism and fragmentation are today the fundamental characteristics of modern states of the societies in which we live and to a large extent of the alternatives that are brought forth in an attempt to counter them Khomiakov s works therefore might help us take on the challenge of rescuing Christian thought from modern colonization and offer a true alternative a space for love and truth the living experience of the church This book serves as a step on the path toward recovering the church s reflection on its own identity as sobornost as the community that is the living body of Christ and can be the next step forward toward recovering the capacity for thought from within the church **Thomas Berry** Mary Evelyn Tucker,John Grim,Andrew Angyal,2019-06-04 Thomas Berry 1914 2009 was one of the twentieth century s most prescient and profound thinkers As a cultural historian he sought a broader perspective on humanity s relationship to the earth in order to respond to the ecological and social challenges of our times This first biography of Berry illuminates his remarkable

vision and its continuing relevance for achieving transformative social change and environmental renewal Berry began his studies in Western history and religions and then expanded to include Asian and indigenous religions which he taught at Fordham University Barnard College and Columbia University Drawing on his explorations of history he came to see the evolutionary process as a story that could help restore the continuity of humans with the natural world Berry urged humans to recognize their place on a planet with complex ecosystems in a vast evolving universe He sought to replace the modern alienation from nature with a sense of intimacy and responsibility Berry called for new forms of ecological education law and spirituality as well as the creation of resilient agricultural systems bioregions and ecocities At a time of growing environmental crisis this biography shows the ongoing significance of Berry's conception of human interdependence with the earth as part of the unfolding journey of the universe
