Science Of Religion And The Sociology Of Knowledge Some Methodological Questions:

The Science of Religion and the Sociology of Knowledge Ninian Smart, 2015-03-08 Ambitiously undertaking to develop a strategy for making the study of religion scientific Ninian Smart tackles a set of interrelated issues that bear importantly on the status of religion as an academic discipline He draws a clear distinction between studying religion and doing theology and considers how phenomenological method may be used in investigating objects of religious attitudes without presupposing the existence of God or gods He goes on to criticize projectionist theories of religion notably Berger's and theories of rationality in both religion and anthropology On this basis he builds a theory of religious dynamics which gives religious ideas and entities an autonomous place in the sociology of knowledge His overall purpose is thus to indicate ways forward in the study of religion which free it from being crypto apologetics or elevating poetry Originally published in 1973 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905

The Question of Methodological Naturalism Jason N. Blum, 2018-09-11 The traditions and institutions that we call religions abound with references to the supernatural ancestral spirits karma the afterlife miracles revelation deities etc How are students of religion to approach the behaviors doctrines and beliefs that refer to such phenomena which by their very nature are supposed to defy the methods of empirical research and the theories of historical scholarship That is the question of methodological naturalism The Question of Methodological Naturalism offers ten thoughtful engagements with that perennial question for the academic study of religion Contributors include established senior scholars and newer voices propounding a range of perspectives resulting in both surprising points of convergence and irreconcilable differences in how our shared discipline should be conceptualized and practiced

A Question of Knowledge Richenda Power, 2014-06-11 This book uniquely illustrates the key concepts and issues involved with recent examples drawn from empirical research highlighting the practical relevance of difficult theoretical and philosophical concepts to the way in which we think and talk about knowledge both in an everyday and in an academic sociological context

Dictionary of Twentieth-Century British Philosophers Stuart Brown, 2005-06-01 This is a two volume work with entries on individuals who made some contribution to philosophy in the period 1900 to 1960 or soon after The entries deal with the whole philosophical work of an individual or in the case of philosophers still living their whole work to date Typically the individuals included have been born by 1935 and by now have made their main contributions Contributions to the subject typically take the form of books or journal articles but influential teachers and people otherwise important in the world of philosophy may also be included The dictionary includes amateurs as well as professional philosophers and where appropriate thinkers whose main discipline was outside philosophy There are special problems about the term British in the twentieth century partly because of human migration partly because of decolonialization and the changing denotation of the term The intention has been to include not only those who were British subjects at least for a significant part of their lives even if they mostly lived outside what is now the U K but also people who spent a significant part of their lives in Britain itself irrespective of their nationality or country of origin In the first category are included for instance a number of people who were born and educated in Britain but who subsequently taught in universities abroad In the second category are included those who were born elsewhere but who came to Britain and contributed to its philosophical culture

Nāgārjuna and the Philosophy of Openness Nancy McCagney, 1997 In this innovative study of the philosopher Nagarjuna Nancy McCagney demonstrates that the concept of space *akasa* in early Indian Mahayana Buddhism is the root metaphor for Nagarjuna's understanding of *sunyata* or openness Nagarjuna's use of the term *sunyata* was new and contrasted with the word's use in Pali Buddhist literature By using the word to mean openness Nagarjuna was able to elucidate through a deeper analysis of impermanence a consistent philosophical foundation for the truth and efficacy of Gautama's Middle Way McCagney's book will be important for those studying Indian philosophy Buddhism and the philosophy of religion

Religious Experience Craig Martin, Russell T. McCutcheon, 2014-09-11 Many regard religious experience as the essence of religion arguing that narratives might be created and rituals invented but that these are always secondary to the original experience itself However the concept of experience has come under increasing fire from a range of critics and theorists This Reader presents writings from both those who assume the existence and possible universality of religious experience and those who question the very rhetoric of experience Bringing together both classic and contemporary writings the Reader showcases differing disciplinary approaches to the study of religious experience philosophy literary and cultural theory history psychology anthropology feminist theory as well as writings from within religious studies The essays are structured into pairs with each essay separately introduced with information on its historical and intellectual context The ultimate aim of the Reader is to enable students to explore religious experience as rhetoric created to authorize social identities The book will be an

invaluable introduction to the key ideas and approaches for students of Religion as well as Sociology and Anthropology

distinguished scholar of religions Scientific Models for Religious Knowledge Andrew Ralls Woodward, 2018-08-14 Most
comparisons of science and religion are really comparisons of science and Christianity or science and Islam and so forth In
Scientific Models for Religious Knowledge the author aims to get outside typical polarized debates between traditional a
priori theism and radical scientific naturalism Instead a new science and religion compatibility system between a scientific
study of religion and a religious epistemology is our new elusive problem Moreover we shall look at a comparison and
contrast of modern science with the simple deference of the human mind to the actions of culturally postulated superhuman
agents This book pays critical attention to the contributions of scholars in the philosophy of religion the philosophy of science
and the scientific study of religion Scientific Models for Religious Knowledge is useful for readers looking to expand their
learning in the philosophies of science and religion as these subjects are taught and analyzed in modern research universities
