Scientific Elite Nobel Laureates In The:

Scientific Elite, Scientific Elite is about Nobel prize winners and the well defined stratification system in twentieth century science It tracks the careers of all American laureates who won prizes from 1907 until 1972 examining the complex interplay of merit and privilege at each stage of their scientific lives and the creation of the ultra elite in science The study draws on biographical and bibliographical data on laureates who did their prize winning research in the United States and on detailed interviews with forty one of the fifty six laureates living in the United States at the time the study was done Zuckerman finds laureates being successively advantaged as time passes These advantages are producing growing disparities between the elite and other scientists both in performance and in rewards which create and maintain a sharply graded stratification system

Nobel Laureates in Chemistry, 1901-1992 James K. Laylin,1993-10-30 Through new perspectives from a mix of original monographs biographies autobiographical memoirs edited collections of essays and documentary sources translations classic reprints and pictorial volumes this series will document the individuals ideas institutions and innovations that have created the modern chemical sciences **China's Scientific Elite** Cong Cao,2004-07-31 China s Scientific Elite is a study of those scientists holding China s highest academic honour membership of the Chinese Academy of Sciences Having carried out extensive systematic data collection of CAS members Cao examines the social stratification system of the Chinese science community and the way in which politics and political interference has effected the stratification The book then goes on to compare the Chinese system to the stratification of the US scientific elite The conclusions are fascinating not least because one national elite resides in a democratic liberal social system and the other in an authoritarian social system

Bulletin of the Atomic Scientists ,1979-01 The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security Founded by Manhattan Project Scientists the Bulletin s iconic Doomsday Clock stimulates solutions for a safer world **Europe's New Scientific Elite** Barbara Hoenig,2017-04-21 Winner of the Harald Kaufmann Prize for Senior Researchers 2018 This book examines the question of whether the process of European integration in research funding has led to new forms of oligarchization and elite formation in the European Research Area Based on a study of the European Research Council ERC the author investigates profound structural change in the social organization of science as the ERC intervenes in public science systems that until now have largely been organized at the national level Against the background of an emerging new science policy Europe s New Scientific Elite explores the social mechanisms that generate reproduce and modify existing dynamics of stratification and oligarchization in science shedding light on the strong normative impact of the ERC s funding on problem choice in science the cultural legitimacy and future vision of science and the building of new research councils of national European and global scope A comparative theory driven investigation of European research funding this book will appeal to social scientists with interests in the sociology of knowledge The Scientific Attitude Frederick Grinnell,1992-03-06 THE SCIENTIFIC ATTITUDE presents a systematic account of the cognitive and social features of science Written by an experimental biologist actively engaged in research the work is unique in its attempt to understand science in terms of day to day practice The book goes beyond the traditional description of science that focuses on method and logic to characterize the scientific attitude as a way of looking at the world Professor Grinnell uses examples from biomedical research to describe science at three interdependent levels At the first level the individual scientist makes observations formulates hypotheses and does

experiments The scientist's thought style determines what can be seen and what it will appear to mean At the second level scientists participate in social institutions such as graduate programs research groups journal editorial boards and grant review panels Each of these institutions tries to promote its own distinctive collective thought style Finally at the third level scientists participate in the world of everyday life beyond science a world that continuously influences and is influenced by the activities and discoveries of science

Nobel Prizes And Nature's Surprises Erling Norrby, 2013-10-10 Each year the Nobel Prizes in the natural sciences reveal amazing discoveries New milestones in the relentless advance of science are identified The growth of knowledge and its evolution can be researched in the Nobel archives where nominations are kept secret for 50 years after the awards have been made They represent a treasure for real time assessment of science Norrby's earlier book *Nobel Prizes and Life Sciences* 2010 examined the unique archival records until 1959 The present book takes us up to 1962 surveying a range of dazzling discoveries All prizes in immunology are reviewed Their impact on our capacity to control infectious diseases and transplant organs are highlighted The Nobel year 1962 is exceptional in recognizing the most major advance in biology since Darwin in 1859 presented his theory of evolution This was the dramatic discovery of the double helix structure of DNA by Watson and Crick in 1953 The era of molecular biology had begun Its explosive development continues into the present

God's Eugenicist Andrés Horacio Reggiani, 2007 The temptations of a new genetically informed eugenics and of a revived faith based world wide political stance this study of the interaction of science religion politics and the culture of celebrity in twentieth century Europe and America offers a fascinating and important contribution to the history of this movement The author looks at the career of French born physician and Nobel Prize winner Alexis Carrel 1873 1944 as a way of understanding the popularization of eugenics through religious faith scientific expertise cultural despair and right wing politics in the 1930s and 1940s Carrel was among the most prestigious experimental surgeons of his time who also held deeply illiberal views In *Man the Unknown* 1935 he endorsed fascism and called for the elimination of the unfit The book became a huge international success largely thanks to its promotion by *Readers Digest* as well as by the author's friendship with Charles Lindbergh In 1941 he went into the service of the French pro German regime of Vichy which appointed him to head an institution of eugenics research His influence was remarkable affecting radical Islamic groups as well Le Pen's *Front National* that celebrated him as the founder of ecology

Equity for Women in Science Cassidy R. Sugimoto, Vincent Larivière, 2023-03-21 *Equity for Women in Science* is the first large scale empirical study of the global gender gap in science Analyzing millions of scientific papers the authors show that women are undervalued for their labor in science as measured through publications and citations The data also reveal how the scientific community can promote equity

The Grammar of Social Relations Louis Schneider, This collection of the writings of Louis Schneider an exceptionally gifted sociologist of religion the history of ideas provides a sensitive but rigorous view of the place of ideas in social life Divided according to the principal areas in which Schneider conducted research history of

social thought principles of social theory sociology of religion are essays on evolution styles of research and moral choice in human relations His knowledge of systems of thought dialectical functional and phenomenological was peerless The unifying theme in his work is the place of cultural formations in social structures as a result his writings are alive with persons no less than systems Universities and the Production of Elites Roland Bloch,Alexander Mitterle,Catherine Paradeise,Tobias

Peter,2017-08-14 This book explores how universities as organizations influence and construct the production of academic elites and elitist institutions It analyzes the role played by the reorganization of higher education HE institutions stimulated by new performance based narratives aimed at building attractiveness towards stakeholders such as governments prospective employers academics and students Based on American European and Asian case studies of HE systems and institutions considered at various scales the volume analyzes the consequences of increasing competition between HE institutions which are facing challenges such as the internationalization of higher education supply the shortage of public resources and the structural changes of labor market demands It argues that policy discourses and tools as well as assessment devices such as rankings and accreditation incentivize HE institutions to develop positioning strategies that contribute to stratification and the production of elites It will be of great interest to students and researchers in the fields of higher education sociology and education policy **Scientific Establishments and Hierarchies** N. Elias,H.

Martins,Richard P. Whitley,2012-12-06 In recent years sociologists of sciences have become more interested in scientific elites in the way they direct and control the development of sciences and beyond that in which the organization of research facilities and resources generally affects research strategies and goals In this volume we focus on scientific establishments and hierarchies as a means of bringing aspects of these concerns together in their historical and comparative contexts These terms draw attention to the fact that much scientific work has been pursued within a highly specific organizational setting that of universities and academic research institutes The effects of this organizational setting as well as its power relations and its resources in relation to governmental and other non scientific establishments in society at large deserve closer attention One significant aspect of scientific establishments and hierarchies and of the power relations impinging upon scientific research is the fact that the bulk of leading scientists have the professional career qualifications and status of a professor As heads or senior members of departments institutes and laboratories professors form the ruling groups of scientific work They are the main defenders of scientific or departmental autonomy accept or resist innovations in their field play a leading part in fighting scientific controversies or establishing consensus Even where research units are not directly controlled by professors authority structures usually remain strongly hierarchical These hierarchies too deserve attention in any exploration of the social characteristics of scientific knowledge and its production Deviant Behavior John A.

Humphrey,Frank Schmallegger,Professor Frank A Schmallegger,2019-12-11 This book covers the social forces that shape deviance the motivations and consequences of deviant behaviors and how our definition of deviance changes over time It

examines a wide range of deviant behaviors from criminal acts to extreme forms of everyday behavior and helps students understand the impact of globalization on traditional and emerging forms of deviance **Genius and Eminence** Robert S. Albert, 1992 A fascinating introduction to the research into and theories of exceptional achievement Topics covered include the arguments around personal dynamics and biological processes the IQ issue and how family and learning experiences are related to achievement **The Rise of American Research Universities** Hugh Davis Graham, Nancy Diamond, 2004-09-27 In this important and timely work Graham and Diamond reassess the success of American universities as research institutions and the role of public funding in their development from the expansionist golden years of the 1950s and 60s through the austerity measures of the 1970s and the entrepreneurial ethos of the 1980s to the budget crises universities face in the 1990s
