Abstract: *There are two types of matter in the universe: inanimate and animate. Inanimate matter comprises small objects ranging from atoms and molecules to quarks and quanta, while animate matter refers to the soul with excitement, feelings, mind, and consciousness, as in animals and humans, which forms the basis of life. Science best studies inanimate matter. However, animate matter has not yet been properly studied. In this article, we discuss the causal condition or scientific study of the origin, development, and movement of the soul by studying the scientific evidence of Buddhist views, such as the law of karma and reincarnation or the afterlife.*

Keywords: Buddha, Body, Mind, Soul, Karma, Rebirth, Consciousness, Evolution, Reincarnation

One-Sentence Summary:

“Buddhism is the science of knowing the truth of life” - Albert Einstein

1. Introduction

What is soul? In many religions and philosophical traditions, the soul is the spiritual essence of creators, which includes one's identity, personality, memories, and immaterial aspects, or the essence of a living being that is believed to be able to survive the physical body (1, 2).

Throughout history and across cultures, people have believed in some sort of soul and afterlife.

The current scientific paradigms doesn't recognize this spiritual dimension of life.

Scientists have conducted extensive research on the soul. For instance, Dr. Robert Lanza, a stem cell researcher, has proposed a theory called “biocentrism” that suggests that the soul exists, and that consciousness is fundamental to the universe (3). He said “Biocentrism will shatter the reader's ideas of lifetime and space, and even death. At the same time, it will release us from the dull worldview of life being merely the activity of an admixture of carbon and a few other elements; it suggests the exhilarating possibility that life is fundamentally immortal”.

Robert T. Bigelow, a space entrepreneur from the United States, has conducted sign the soul. To this end, he established the Bigelow Institute for Consciousness Studies (BICS), and in 2020 he organized worldwide an essay contest on the topic “Is there life after death?” to raise awareness and stimulate research on the survival of human consciousness after physical death, with a global prize of \$2 million, and approximately 1000 people participated (4). One of the essay contest winners, parapsychologist, PhD Jeffrey Mishlove, adduced nine factors, such as near-death experiences, after-death communication, reincarnation, and mental and physical medium ship, that show the possibility of life after death, and concluded that there is life after death (5). This essay can be considered practical proof of the existence of life after death.

In this article we aim to prove the existence of the soul.

2. Scientific evidence for the existence of the soul

Here we will argue that from the point of view of reason and logic, it is reasonable to believe that spirit and matter is a bundle of energy, and that the soul is created from energy through animal under the of appropriate causal conditions. And man arose of the evolution of animal. After death the animal and human the soul separated from body and the soul has found its reincarnation in one of the six types of animals, and one after another is reborn cyclically in the form of a wheel in samsara. Samsara is a place where animals and people are reborn after death according to Buddhist concepts.

In (6) we have proved that afterlife exists after death using set theory (7), a branch of mathematics. In other words, it has been theoretically proven that life exists after death.

The following theorem describes the afterlife or reincarnation:

Theorem (Afterlife or reincarnation)

If firstly, the objects and phenomena of the non-eternal universe exist in three forms: matter, spirit, and an imperfect cluster of elements—animals and humans. Secondly, when these animals and humans die, their bodies and minds/souls are separated, then after death the animals and humans their body and mind separated, and their soul/mind is reborn in one of the six animals of samsara depending on their consciousness. If people develop their consciousness, they will be able to improve their next rebirth in the three higher realms of beings, as a human, an animal of Asura Heaven, or an animal of Heaven, and may even become a Buddha. In contrast, if humans do not develop their consciousness, the soul can be reborn as one of the three lower beings, as beasts, ordinary animals, or animal of hell, or even may

Scientific Evidence of God's Existence? IntroBooks Team, Everyone in this world has religious beliefs No matter which religion we believe in one thing is constant whenever we feel low we pray to God and ask for strength to overcome the situation that is bothering us So what is God In simple terms we can say that God is our belief It is the power that we believe created the universe and the power to which we pray for prosperity and happiness Though there are several definitions of God it depends on what you believe As for every person the exact definition of God is different For some people God is our inner strength and for some God is the power that was never born and never can die a power that always exists and will exist after the death of the universe There are thousands of beliefs that also created different religions such as Hinduism Islam Christianity etc Even if we have a look at the past we will be able to see that our ancestors as well as people before Christianity also had God There are hundreds of theories that encourage us to have faith in God Sometimes science has denied the existence of God which created a silent war between people having religious beliefs and people who denied it This war continued until science itself proved the existence of God Yes there are several scientific pieces of evidence that prove God s existence and some of them prove that the mythological characters were real and so were the stories In this book we will discuss scientific evidence of God s existence Lines of Evidence: How Recent Science Infers the Existence of God Rick Jory,2023-08-18 Secular science demands we accept the philosophical dogma of scientific materialism that only material entities exist Yet recent science has discovered the immaterial Also mandated is the assumption that all things must be explained by natural causes But we now are certain that the universe had a beginning There was a time when nature didn t exist and yet we must attribute the origin of the universe to nature And what about Darwin s theory of evolution taken as fact that every plant and animal owe its origin to a common ancestor and naturalistic causes At the time of Darwin over a century and a half ago no one knew the true complexity of the cell We now know the simplest of living organisms has 159 662 base pairs of DNA and 182 protein coding genes What naturalistic cause put all of this together Could this be assembled by blind purposeless accident What does recent science have to say And what about recent discoveries in origin of life research Do we now know enough to suggest life could not have created itself A lot is happening in today s science that is best explained through the Christian worldview Let s see what some of today s scientists are now saying Proof of the Existence of God Rev. Stephen Badu-Yeboah,2013-11-29 This book is a bridge between science and religion For much of the ancient times until the eighteenth century all our human issues and answers were based on religion However from the eighteenth century onward even though it started from the second century and peaked a bit more during the thirteenth century people questioned the authenticity of all the religious responses to all our human quest For this reason many scientists conducted scientific research to find out the evidentiary truth to the religious responses about the universe origin of moral values the existence of God etc This book is about the true origin of moral values and about the true existence of God In this book I seek

to give objective scientific philological and religious explanations as to the real existence of God I also seek to explain who is the source of our moral values In the final analysis I do suggest in this book that science and religion are friends who are seeking and seeing the same thing from different perspectives Therefore they proclaim their findings with different names which are generally of similar philological meaning I also suggest that with the present lack of objective evidentiary proof God cannot be said to exist anthropomorphically but truly exists pneumatologically and he is the creator of our existence and the source of our moral values

Science Confirms the Existence of God Kevin Bradford Ornellas,2022-05-15 This book demonstrates that God exists and the book does so on the grounds of secular scientific data and mathematics While that might not sound possible this book demonstrates it using insight into a key verse 2Peter 3 8 to help set up a mathematical model of what the Bible is asserting to be true When compared to modern scientific data a direct correlation between what Saint Peter and the Genesis Writer said was true and what occurred according to modern scientific data is presented If you ve ever wondered whether God exists or not read this book If you ve ever felt discouraged at the idea of not seeing a possible way to reconcile God and Science the way is contained in this book

Each chapter is intended to provide a general overview of the topic in lay terms identifying issues that will be useful to judges and others in the legal profession. They are written for a non technical audience and are not intended as exhaustive presentations of the topic. Rather the chapters seek to provide judges with the basic information in an area of science to allow them to have an informed conversation with the experts and attorneys. *The Journal of Mental Science*, 1902 Vol 77 includes Yearbook of the Association 1931. **Seeing God Through Science** Barry David Schoub, 2019-08-27. It has been said that science and religion aren't friends. Indeed science and scientists are preferably shunned in conservative religious circles. Seeing God through Science however emphatically dispels that notion. This book compellingly shows how science is in point of fact a potent support for religious faith. From the powerful universal biological drives of living organisms to the unimaginable vastness of the universe science cogently frames the fundamental questions of meaning and purpose. Answers to these questions however lie outside science. It is solely through religious revelation that acceptable answers close the circle of enquiry into truth. In addition examples from the sciences of genetics and cosmology illustrate the typical pattern of metascience i.e. the process of science which advances toward a frontier only to generate further avenues of exploration but never reaches a finality of knowledge. Thus metascience steers enquiry to a supernatural reality answerable only through religious revelation. This book shows how modern science is now entering a new phase where what is unattainable by the science of nature constitutes a message to humankind that there exists a supernatural being who created and controls the universe. Modern science is now coming to prove God. *The Methodist Review*, 1890. **Journal of the American Society for Psychical Research** American Society for Psychical Research, 1918.
