Scientific Fallacy And Political Misuse Of The Concept Of Race:

The Scientific Fallacy and Political Misuse of the Concept of Race Ronald E. Hall, 2004 Hall Michigan State U describes the various definitions of race and how it has been affected by questionable science and pernicious politics over time He explores the racial issues behind the Atlantic slave trade the fears behind the designations of quadroons octoroons and mulattoes the particular racism directed at African American men **Palgrave Advances in Intellectual History** R.

Whatmore, B. Young, 2006-05-26 The past three decades have seen a remarkable growth of interest in intellectual history and this book provides the first comprehensive survey of recent research in this field Each chapter considers developments in intellectual history and shows the ways intellectual historians have contributed to more established disciplinary enquiries

Race Relations in America Thomas J. Davis, 2006-03-30 Presents primary documents to support an exploration of race relations in the United States from 1785 to the present **The Retreat of Scientific Racism** Elazar Barkan, 1992 This fascinating study in the sociology of knowledge documents the refutation of scientific foundations for racism in Britain and the United States between the two World Wars when racial differences were no longer attributed to cultural factors Professor Barkan considers the social significance of this transformation particularly its effect on race relations in the modern world Discussing the work of the leading biologists and anthropologists who wrote between the wars he argues that the impetus for the shift in ideologies came from the inclusion of outsiders women Jews and leftists who infused greater egalitarianism into scientific discourse But even though the emerging view of race was constrained by a scientific language he shows that modern theorists were as much influenced by social and political events as were their predecessors

American Book Publishing Record, 2003 *Psychology of Non-violence and Aggression* V.K. Kool, 2007-11-27 Kool draws on recent research to illustrate that whilst the control of violence is a reaction to aggression nonviolence is by contrast an active behaviour The book explores a wide survey of theories and examples spanning ideas in cognition motivation and behaviour that will provide students with an engaging entry point to the subject **Constructing Race** Tracy Teslow, 2014-07-21 Constructing Race helps unravel the complicated and intertwined history of race and science in America Tracy Teslow explores how physical anthropologists in the twentieth century struggled to understand the complexity of human physical and cultural variation and how their theories were disseminated to the public through art museum exhibitions books and pamphlets In their attempts to explain the history and nature of human peoples anthropologists persistently saw both race and culture as critical components This is at odds with a broadly accepted account that suggests racial science was fully rejected by scientists and the public following World War II This book offers a corrective showing that both race and culture informed how anthropologists and the public understood human variation from 1900 through the decades following the war The book offers new insights into the work of Franz Boas Ruth Benedict and Ashley Montagu as well as less well known figures including Harry Shapiro Gene Weltfish and Henry Field **The SAGE Handbook of Race**

and Ethnic Studies John Solomos, Patricia Hill Collins, 2010-06-15 What is the state of Race and Ethnic Studies today How has the field emerged What are the core concepts debates and issues The SAGE Handbook of Race and Ethnic Studies is a vital resource for researchers and students with a panoramic critical survey of the field A rigorous focused examination of the central questions in the field today the text examines The roots of the field of race and ethnic studies The distinction between race and ethnicity Methodological issues facing researchers The relationship between the field and more established disciplines Intersections between race and ethnicity and questions sexuality gender nation and social transformation The challenge of multiculturalism Race ethnicity and globalization Race and the family Race and education Race and religion Issues for the 21st Century

Argument and Change in World Politics Neta Crawford, 2002-07-25 Arguments have consequences in world politics that are as real as the military forces of states or the balance of power among them Neta Crawford proposes a theory of argument in world politics which focuses on the role of ethical arguments in fostering changes in long standing practices She examines five hundred years of history analyzing the role of ethical arguments in colonialism the abolition of slavery and forced labour and decolonization Pointing out that decolonization is the biggest change in world politics in the last five hundred years the author examines ethical arguments from the sixteenth century justifying Spanish conquest of the Americas and from the twentieth century over the fate of Southern Africa The book also offers a prescriptive analysis of how ethical arguments could be deployed to deal with the problem of humanitarian intervention Co winner of the APSA Jervis Schroeder Prize for the best book on international history and politics

The Uses of Diversity Jonathan Kahn, 2025-06-10 Race it is widely understood is a social category that has no genetic basis yet biological notions of race keep reemerging Attempts to redress disparities in biomedical research emphasize recruiting racially representative trial participants Forensic use of DNA evidence purports to pinpoint the race of a potential suspect Genetic ancestry tracing companies explain test results to customers using racial categories The makers of genomic databases seek to ensure racial inclusivity Jonathan Kahn argues that this predicament arises from a surprising source the concept of diversity Ranging across law politics science and medicine he examines the blurring of the distinction between social understandings of race and biological understandings of genetic variation Because diversity has become such a central concept across domains Kahn contends it enables slippage between these contradictory ideas entangling biological and social views of race Tracing the parallel histories of the Human Genome Project workforce diversification efforts U S Supreme Court cases over affirmative action the rise of precision medicine and the COVID 19 vaccine trials among others he shows why diversity is often deployed in ways that threaten to biologize race or undermine efforts to address racial injustice Combining incisive critique and interdisciplinary insight The Uses of Diversity offers bracing new perspective on one of today s most vexed concepts

Fallacies of Creationism Willard Alexander Young, 1985

The Oxford Encyclopedia of Ancient Egypt: P-Z Donald B. Redford, 2001 This text includes substantial entries from all disciplines on the topic of ancient Egypt Among the multitude

of subjects covered are religion and mythology medicine art archaeology sociology trade and commerce dialects and agriculture

Human Beings in International Relations Daniel Jacobi, Annette Freyberg-Inan, 2015-09-11 Since the 1980s the discipline of International Relations has seen a series of disputes over its foundations However there has been one core concept that although addressed in various guises had never been explicitly and systematically engaged with in these debates the human This volume is the first to address comprehensively the topic of the human in world politics It comprises cutting edge accounts by leading scholars of how the human is or is not theorized across the entire range of IR theories old and new The authors provide a solid foundation for future debates about how why and to which ends the human has been or must not be built into our theories and systematically lay out the implications of such moves for how we come to see world politics and humanity's role within it

Evolutionary Interpretations of World Politics William R. Thompson, 2016-05-06 The field of international relations is often stagnated in realism and liberalism Groundbreaking and guaranteed to stir debate this work will move the field of international relations beyond its current and often inadequate assumptions The contributors describe how states ideologies and other areas of analysis evolve conquer others or disappear entirely Change and the fluid nature of history though so clearly a part of historical reality are not so deeply embedded in other paradigms as they are in the variation and selection model of evolutionary international relations Some contributors lay out the various controversies inherent to the new theory while others apply the paradigm to specific problems in IR theory Regardless of the approach the presentation of this entirely new perspective and method succeeds in forming a new paradigm of international relations Contributors include William R Thompson George Modelski Vincent S E Falger David P Rapkin Jennifer Sterling Folker Hendrik Spruyt Stewart Patrick Paul Hensel Karen Rasler Craig N Murphy Jeffrey A Hart Sangbae and Brian Pollins

Ethics for Science Policy Torgny Segerstedt, 2013-10-22 Ethics for Science Policy documents the proceedings of a Nobel Symposium held at Sdergarn Sweden on August 20-25 1978 which focuses on the freedom of unrestricted research or investigations This book discusses the rationality and personal element in science policy ethical responsibility of social scientists priorities and control in the organization of research ethical principles of scientific institutions and ethical dilemmas in weapon development The topics on science progress and destruction information and communication in the developing world and limits in the regulation of scientific research are also deliberated in this compilation This publication is valuable to students or researchers intending to acquire knowledge on the extent or restrictions in conducting scientific investigations

Race and Other Misadventures Larry T. Reynolds, Leonard Lieberman, 1996

An American Health Dilemma W. Michael Byrd, Linda A. Clayton, 2012-10-02 At times mirroring and at times shockingly disparate to the rise of traditional white American medicine the history of African American health care is a story of traditional healers root doctors granny midwives underappreciated and overworked

African American physicians scrupulous and unscrupulous white doctors and scientists governmental support and neglect epidemics and poverty Virtually every part of this story revolves around race More than 50 years after the publication of An American Dilemma Gunnar Myrdal s 1944 classic about race relations in the USA An American Health Dilemma presents a comprehensive and groundbreaking history and social analysis of race race relations and the African American medical and public health experience Beginning with the origins of western medicine and science in Egypt Greece and Rome the authors explore the relationship between race medicine and health care from the precursors of American science and medicine through the days of the slave trade with the harrowing middle passage and equally deadly breaking in period through the Civil War and the gains of reconstruction and the reversals caused by Jim Crow laws It offers an extensive examination of the history of intellectual and scientific racism that evolved to give sanction to the mistreatment medical abuse and neglect of African Americans and other non white people Also included are biographical portraits of black medical pioneers like James McCune Smith the first African American to earn a degree from a European university and anecdotal vignettes like the tragic story of the Hottentot Venus which illustrate larger themes An American Health Dilemma promises to become an irreplaceable and essential look at African American and medical history and will provide an invaluable baseline for future exploration of race and racism in the American health system
