Applied Urban Analysis Ian Cullen, 2013-04-15 Much of the theoretical literature in planning and human geography at present is materialist in perspective This offers a powerful critique but locates the dynamics of urban systems too specifically in just one basic social relationship It fails to provide an intellectual base broad enough for constructive detailed urban analysis partly because it fails to do justice to the reflective awareness of the individual The alternative humanist position redresses the balance in favour of the individual but again cannot serve the practical requirements of urban analysis since it so often ignores social or contextual analysis Ian Cullen synthesizes these two apparently inconsistent theoretical positions and to render the increasingly obscure debate between them accessible This book was first published in 1984

Urban Planning Methods Ian Bracken, 2014-04-04 In order to develop and exercise their skills urban planners need to draw upon a wide variety of methods relating to plan and policy making urban research and policy analysis More than ever planners need to be able to adapt their methods to contemporary needs and circumstances This introductory textbook focuses on the need to combine traditional research methods with policy analysis in order to understand the true nature of urban planning processes It describes both planning methods and their underlying

concepts and principles illustrating applications by reference to the daily activities of planning including the assessment of needs and preferences of the population the generation and implementation of plans and policies and the need to take decisions related to the allocation of land population change employment housing and retailing Ian Bracken also provides a comprehensive guide to the more specialized research literature and case studies of contemporary urban planning practice This book was first published in 1981
