Library and Information Services Division,1977 From Chemical Philosophy to Theoretical Chemistry Mary Jo Nye, 1994-03-01 How did chemistry and physics acquire their separate identities and are they on their way to losing them again Mary Jo Nye has written a graceful account of the historical demarcation of chemistry from physics and subsequent reconvergences of the two from Lavoisier and Dalton in the late eighteenth century to Robinson Ingold and Pauling in the mid twentieth century Using the notion of a disciplinary identity analogous to ethnic or national identity Nye develops a theory of the nature of disciplinary structure and change She discusses the distinctive character of chemical language and theories and the role of national styles and traditions in building a scientific discipline Anyone interested in the history of scientific thought will enjoy pondering with her the question of whether chemists of the mid twentieth century suspected chemical explanation had been reduced to physical laws just as Newtonian mechanical philosophers had envisioned in the eighteenth century How to Write and Publish a Scientific Paper Barbara Gastel, Robert A. Day, 2022-06-30 Thoroughly updated throughout this classic practical text on how to write and publish a scientific paper takes its own advice to be as clear and simple as possible The purpose of scientific writing according to Barbara Gastel and Robert A Day is to communicate new scientific findings Science is simply too important to be communicated in anything other than words of certain meaning This clear beautifully written and often funny text is a must have for anyone who needs to communicate scientific information whether they re writing for a professor other scientists or the general public The thoughtfully revised 9th edition retains the most important material including preparing text and graphics publishing papers and other types of writing and plenty of information on writing style while adding up to date advice on copyright presenting online identifying authors creating visual abstracts and writing in English as a non native language A set of valuable appendixes provide ready reference including words and expressions to avoid SI prefixes a list of helpful websites and a glossary Students and working scientists will want to keep How to Write and Publish a Scientific Paper at their desks and refer to it at every stage of writing and publication *Living Books* Janneke Adema, 2021-08-31 Reimagining the scholarly book as living and collaborative not as commodified and essentialized but in all its dynamic materiality In this book Janneke Adema proposes that we reimagine the scholarly book as a living and collaborative project not as linear bound and fixed but as fluid remixed and liquid a space for experimentation She presents a series of cutting edge experiments in arts and humanities book publishing showcasing the radical new forms that book based scholarly work might take in the digital age

Adema s proposed alternative futures for the scholarly book go beyond such print based assumptions as fixity stability the single author originality and copyright reaching instead for a dynamic and emergent materiality Adema suggests ways to unbind the book describing experiments in scholarly book publishing with new forms of anonymous collaborative authorship radical open access publishing and processual living and remixed publications among other practices She doesn t cast digital as the solution and print as the problem the problem in scholarly publishing she argues is not print itself but the way print has been commodified and essentialized Adema explores alternative more ethical models of authorship constructs an alternative genealogy of openness and examines opportunities for intervention in current cultures of knowledge production Finally asking why it is that we cut and bind our research together at all she examines two book publishing projects that experiment with remix and reuse and try to rethink and reperform the book apparatus by taking responsibility for the cuts they make Serials Librarianship in Transition Peter Gellatly, 2019-12-05 This book first published in 1986 contains the invaluable and enlightening perspectives of an international roster of experts on the state of the art of serials librarianship and the indications for the future of the profession Reader's Guide to the History of Science Arne Hessenbruch, 2013-12-16 The Reader's Guide to the History of Science looks at the literature of science in some 550 entries on individuals Einstein institutions and disciplines Mathematics general themes Romantic Science and central concepts Paradigm and Fact The history of science is construed widely to include the history of medicine and technology as is reflected in the range of disciplines from which the international team of 200 contributors are drawn
