Scientist In The Crib Minds Brains And How Children Learn:

The Scientist in the Crib Alison Gopnik, Andrew N. Meltzoff, Patricia K. Kuhl, 2024-04-16 This exciting book by three pioneers in the new field of cognitive science discusses important discoveries about how much babies and young children know and learn and how much parents naturally teach them It argues that evolution designed us both to teach and learn and that the drive to learn is our most important instinct It also reveals as fascinating insights about our adult capacities and how even young children as well as adults use some of the same methods that allow scientists to learn so much about the world Filled with surprise at every turn this vivid lucid and often funny book gives us a new view of the inner life of children and the mysteries of the mind

The Scientist in the Crib Alison Gopnik, Andrew N. Meltzoff, Patricia Katherine Kuhl, 1999 A review of research on learning and infancy drawn from hundreds of case studies shows how children by the age of three are virtual learning machines and discusses how parents can help this learning process

Handbook of Child Development and Early Education Oscar A. Barbarin, Barbara Hanna Wasik, 2011-06-23 How and what should young children be taught What emphasis should be given to emotional learning How do we involve families Addressing these and other critical questions this authoritative volume brings together developmentalists and early educators to discuss what an integrated developmentally appropriate curriculum might look like across the preschool and early elementary years State of the science work is presented on brain development and the emergence of cognitive socioemotional language and literacy skills in 3 to 8 year olds Drawing on experience in real world classrooms contributors describe novel practical approaches to promoting school readiness tailoring instruction to children s learning needs and improving the teaching of language arts math and science

Cultural Evolution Peter J. Richerson, Morten H. Christiansen, 2024-04-30 Leading scholars report on current research that demonstrates the central role of cultural evolution in explaining human behavior Over the past few decades a growing body of research has emerged from a variety of disciplines to highlight the importance of cultural evolution in understanding human behavior Wider application of these insights however has been hampered by traditional disciplinary boundaries To remedy this in this volume leading researchers from theoretical biology developmental and cognitive psychology linguistics anthropology sociology religious studies history and economics come together to explore the central role of cultural evolution in different aspects of human endeavor The contributors take as their guiding principle the idea that cultural evolution can provide an important integrating function across the various disciplines of the human sciences as organic evolution does for biology The benefits of adopting a cultural evolutionary perspective are demonstrated by contributions on social systems technology language and religion Topics covered include enforcement of norms in human groups the neuroscience of technology language diversity and prosociality and religion The contributors evaluate current research on cultural evolution and consider its broader theoretical and practical implications synthesizing past and ongoing work and sketching a roadmap for future cross disciplinary efforts Contributors Quentin D Atkinson Andrea Baronchelli
