Experiments in Modern Living

Milton Cameron,2012-05-01 When a group of brilliant young scientists arrived in Australia's national capital after World War II to take up leading roles in the

establishment of national research institutions they commissioned Australia's leading architects to design their private houses. The houses that resulted from these unique collaborations rejected previous architectural styles and wholeheartedly embraced modernist ideologies and aesthetics. The story of how these progressive clients contributed to the innovative design of their houses brings fresh insights to mid twentieth century Australian domestic architecture and to Canberra's rich cultural history.

The Making of British Anthropology, 1813-1871 Efram Sera-Shriar, 2016-08-03 Victorian anthropology has been derided as an armchair practice distinct from the scientific discipline of the twentieth century. But the observational practices that characterized the study of human diversity developed from the established sciences of natural history, geography and medicine. Sera Shriar argues that anthropology at this time went through a process of innovation which built on scientifically grounded observational study. Far from being an evolutionary dead end, nineteenth century anthropology laid the foundations for the field based science of anthropology today.
