Resources in Education, 1992 **One Million Children** Robert E. Slavin, Nancy A. Madden, 2001 One Million Children describes the Success for All and Roots Wings programmes in detail presents the extensive research evaluating them and discusses the implications of this research for policy and practice Success for All and Roots Wings are comprehensive restructuring programmes for primary schools designed to promote the idea that all children can learn Annual Report of the Oklahoma State Department of Education Oklahoma. State Department of Education, 1908 *Designing Mathematics or Science Curriculum Programs* National Research Council, Division of Behavioral and Social Sciences and Education, Board on Science Education, Committee on Science Education K-12 and the Mathematical Sciences Education Board, 1999-12-15 With the publication of the National Science Education Standards and the National Council of Teachers of Mathematics Curriculum and Evaluation Standards for School Mathematics a clear set of goals and guidelines for achieving literacy in mathematics and science was established Designing Mathematics or Science Curriculum Programs has been developed to help state and district level education leaders create coherent multi year curriculum programs that provide students with opportunities to learn both mathematics and science in a connected and cumulative way throughout their schooling Researchers have confirmed that as U S students move through the grade levels they slip further and further behind students of other nations in mathematics and science achievement Experts now believe that U S student performance is hindered by the lack of coherence in the mathematics and science curricula in many American schools By structuring curriculum

programs that capitalize on what students have already learned the new concepts and processes that they can learn will be richer more complex and at a higher level Designing Mathematics or Science Curriculum Programs outlines Components of effective mathematics and science programs Criteria by which these components can be judged A process for developing curriculum that is structured focused and coherent Perhaps most important this book emphasizes the need for designing curricula across the entire 13 year span that our children spend in elementary and secondary school as a way to improve the quality of education Ultimately it will help state and district educators use national and state standards to design or re build mathematics and science curriculum programs that develop new ideas and skills based on earlier ones from lesson to lesson unit to unit year to year Anyone responsible for designing or influencing mathematics or science curriculum programs will find this guide valuable *University of Texas Bulletin* ,1919 **Research in Education** ,1971
