Merchants And Manufacturers Studies In The Changing Structure Of 19th century Marketing:

Merchants and Manufacturers Glenn Porter, Harold C. Livesay, 1989-08 In its transformation from an agrarian to an industrial economy the United States saw a fundamental change in the marketing of manufactured goods during the 19th century Changes in distribution were at least as important as changes in production as the authors demonstrate in this unique account of the rise of modern marketing Their focus is on iron tobacco railway supplies and perishable goods and they show how rising industrial capacity the concentration of markets and advancing technology forced new methods of distribution and the decline of independent merchants and wholesalers By the beginning of the 20th century the outlines of a new economic order had emerged one in which the modern corporation became the dominant institution A splendid study in business history And it is business history of the best kind that which relates changes in business organizations and practice to the mainstream of economic development Journal of Southern History No one before Porter and Livesay has so carefully delineated the transition from the old mercantile to the new industrial world A good book about an important subject Choice

Ruling America Steve Fraser, Gary Gerstle, 2005-04-15 Ruling America

offers a panoramic history of our country's ruling elites from the time of the American Revolution to the present. At its heart is the greatest of American paradoxes: How have tiny minorities of the rich and privileged consistently exercised so much power in a nation built on the notion of rule by the people? In a series of thought-provoking essays, leading scholars of American history examine every epoch in which ruling economic elites have shaped our national experience. They explore how elites came into existence, how they established their dominance over public affairs, and how their rule came to an end. The contributors analyze the elite coalition that led the Revolution and then examine the antebellum planters of the South and the merchant patricians of the North. Later chapters vividly portray the Gilded Age robber barons, the great finance capitalists in the age of J. P. Morgan, and the foreign policy Establishment of the post-World War II years. The book concludes with a dissection of the corporate-led counter-revolution against the New Deal, characteristic of the Reagan and Bush era. Rarely in the last half century has one book afforded such a comprehensive look at the ways elite wealth and power have influenced the American experiment with democracy. At a time when the distribution of wealth and power has never been more unequal, *Ruling America* is of urgent contemporary relevance.

The Routledge Companion to Marketing History D.G. Brian Jones, Mark Tadajewski, 2016-01-29. The Routledge Companion to Marketing History is the first collection of readings that surveys the broader field of marketing history, including the key activities and practices in the marketing process. With contributors from leading international scholars working in marketing history, this companion provides nine country-specific histories of marketing practice, as well as a broad analysis of the field, including the histories of advertising, retailing, channels of distribution, product design, and branding, pricing strategies, and consumption behavior. While other collections have provided an overview of the history of marketing thought, this is the first of its kind to do so from the perspective of companies, industries, and even whole economies. The Routledge Companion to Marketing History ranges across many countries and industries, engaging in substantive detail with marketing practices as they were performed in a variety of historical periods extending back to ancient times. It is not to be missed by any historian or student of business.

Business History Kenneth A. Tucker, 2013-12-19. Furthermore, the intention is to aid the development of critical perception and facilitate further analysis. The overriding criterion in selection has therefore been the framework of structure, conduct, performance for the industry, activity, or firm. The emphasis is on the technical and organisational relationships between the governing factor, input and output conditions, and the objectives and control mechanisms of the decision-making personnel.
