Tassi, 2011 Can there be a virtue in vengeance Can revenge do ethical work Can revenge be the obligation of women This wide ranging literary study looks at Shakespeare s women and finds bold answers to questions such as these A surprising number of Shakespeare s female characters respond to moral outrages by expressing a strong desire for vengeance This book s analysis of these characters and their circumstances offers incisive critical perceptions of feminine anger ethics and agency and challenges our assumptions about the role of gender in revenge In this provocative book Marguerite A Tassi counters longstanding critical opinions on revenge that it is the sole province of men in Western literature and culture that it is a barbaric morally depraved irrational instinct and that it is antithetical to justice Countless examples have been mined from Shakespeare's dramas to reveal women's profound concerns with revenge and justice honor and shame crime and punishment In placing the critical focus on avenging women this book significantly redresses a gender imbalance in scholarly treatments of revenge particularly in early modern literature The Edinburgh Review ,1906 A Dictionary of the English Language; in which the Words are Deduced from Their Originals; and Illustrated in Their Different Significations ... incisive essays on the nature of understanding in social and political science on the discontinuities between ethics and politics that render difficult yet imperative the ordering of a multigroup society and on the ever present tensions between liberty and authority private interests and the common good Here too are MacIver's assessments of the forces that make for social change and the transformations requisite to the establishment of a viable international order And here with sensitivity and wisdom are MacIver's articulations of relevant ends and their realization through appropriate means David Spitz provided a lengthy introduction to this volume on its first publication in 1969 assessing the importance of MacIver's teachings as well as relating these essays within the broader context of MacIver's political and social thought. The republication of this collection now attests to Spitz's conclusion. The rewards that await the reader of these essays support my conviction that MacIver's eminent achievements in both method and vision stamp him as the most distinguished of our social and political theorists Robert M MacIver 1882 1970 was Lieber Professor of Political Philosophy and Sociology at Columbia University 1929 1950 and held many other academic posts directorships and honorary degrees and in 1962 came out of retirement to be chancellor of the New School for Social Research Among his most important books were Social Causation and Community a Sociological Study David Spitz was professor of political science at Columbia University He was the author among other books of The Liberal Idea of Freedom The David and Elaine Spitz Prize is awarded every year for the best book in liberal and or democratic theory by the International Conference for the Study of Political Thought in his honor

Constructing Ecoterrorism John Sorenson, 2016-07-01T00:00:00Z Animal rights is an important social justice movement and the animal rights movement presents ethical and political challenges to deeply rooted structures of violence and exploitation challenging ideologies of capitalism and speciesism Corporate interests that form the animal industrial complex understand the animal rights movement as a threat to their profits and have mobilized to undermine it Informed by both critical animal studies and critical terrorism studies John Sorenson analyzes ecoterrorism as a social construction He examines how corporations that profit from animal exploitation fund and produce propaganda to portray the compassionate goals and nonviolent practices of animal activists as outlandish anti human campaigns that operate by violent means not only to destroy Western civilization but also to create actual genocide The idea of concern for others is itself a dangerous one and capitalism works by keeping people focused on individual interests and discouraging compassion and commitment to others Driven by powerful and wealthy industries founded upon the exploitation of nonhuman animals and the extraction of natural resources the discourse of ecoterrorism is a useful mechanism to repress criticism of the institutionalized violence and cruelty of these industries as well as their destructive impact on the environment their major contribution to global warming and ecological disaster and their negative impacts on human health Further by deliberately constructing an image of activists as dangerous and violent terrorists these corporations and their representatives in government have created a widespread climate of fear that is very useful in legitimizing calls for more policing and more repressive legislation such as Bill C 51 in
