**Act of Consciousness** Adamus Saint-Germain, Linda Benyo Hoppe, Geoffrey Hoppe, 2015-03-20 Life is an act We act like humans and therefore we experience like humans with a litany of limitations shortcomings and drama that mask our underlying angelic consciousness It's an unnatural act that we have come to accept as reality In Act of Consciousness Ascended Master Adamus Saint Germain begins by explaining the metaphysics of energy He defines the difference between consciousness and energy and makes the clear point that we are beings of consciousness not energy and that the passion of our pure consciousness attracts energy from the unified field to manifest our reality Adamus defines the four primary levels of energy including Core soul Crystalline Cosmic and Earth while educating the reader about how the various levels are used by our consciousness to manifest our stage of life Adamus implores the reader to act like a Master rather than acting like a less than perfect human This act will literally change the type of energy being attracted into the reader's life and therefore change the reality theatre one exists within Some readers will question this approach saying It's not real because it's just an act to which Adamus will reply But everything in your life is just an act so why not act like a prosperous healthy and wise Master This will change the theatre of your life but the real question is Are you really ready for a substantial change or are you just trying to tidy up your current stage It's a remarkably simple and effective approach to an otherwise mental and laborious process of becoming your full potential Act of Consciousness will make you laugh make you angry and make you question your old beliefs about how reality is created and experienced By the time you read Saint Germain's last words you will cry a few tears of joy and relief to know that life is as easy as an Act of Consciousness Saint Germain had many notable past lives including that of William Shakespeare and Mark Twain Samuel Clemens These lifetimes gave him an appreciation for the theatre acting and story telling Book length Approximately 30 000 words

Tiberius, 2017-11-01 Relationship between mass and its movement or velocity and its variation or acceleration in Global Dynamics Laws of Newton Concept of force motion energy and mass as properties of reticular matter Types of movement Dynamics of light and free fall bodies Actually Newton s Physics provided the causes for being at rest more than those for motion I don t know if Newton liked to ski and eliminate friction much but what he needed were forces that counteract the omnipresent force of gravity in order to explain why an object remained at rest Wikipedia points out that while according to the ancient Physics of the Greeks the natural state of bodies was to be at rest for Modern Physics it is conserving the state of movement that they are in if the causes for being at rest such as friction are eliminated If Newton s Laws developed the dynamics of being at rest the Theory of Relativity and Quantum Mechanics both of which were around the beginning of the last century have developed the kinematics of movement That is they are scientific theories that describe movement but not the causes for it just its mathematical representation Einstein s General Relativity tries to add some causes such as the geometric effect of the space time continuum but it is still a mathematical explanation always biased and with many odd singularities      Dynamics and Global Gravity Law José Tiberius, 2017-11-01 Physics theory of everything about the gravity energy and movement Definition of energy and experiments with gravitational potential energy and mechanical energy Relationship between mass and its movement or velocity and its variation or acceleration in Global Dynamics Laws of Newton Concept of force motion energy and mass as properties of reticular matter Types of movement Dynamics of light and free fall bodies This book includes volumes V and VI of the Theory of Global Equivalence Among the most important aspects we can highlight the following The non relativity of time and space within the scientific and objective scope of reality The observers non dependence of physics reality The existence of a constant speed of light only within the its natural system of reference or particular intensity of gravitational energy immersed in the three dimensional Euclidean space of Greek metrics The speed of light is additive in respects to that of its natural system of reference through which it moves Light cannot exist without

gravity or better said its reticular structure The distinction between physics velocity and abstract or conventional velocity such as the velocity of two objects separating The Global Gravity Law deserves special mention for implying a different explanation about the predictions of the General Theory of Relativity of Einstein by means of a small adjustment of Newton's Law of Universal Gravitation I am referring to the effect of the gravitational lens the gravitational red shift of light and the precession of the perihelion of Mercury
