**New Mediums, Better Messages?** David Lewis, Dennis Rodgers, Michael Woolcock, 2022-05-26 This is an open access title available under the terms of a CC BY 3.0 IGO International licence It is free to read at Oxford Scholarship Online and offered as a free PDF download from OUP and selected open access locations The notion of development influences and is influenced by all aspects of human life Social science is but one representational option among many for conveying the myriad ways in which development is conceived encountered experienced justified courted and or resisted by different groups at particular times and places As international development has become more quantitative and economics centred there is an enduring sense that what is measured and thus valued and prioritized may have become too narrow that the powers of prediction claimed by some areas of economics

and management may have overreached and that the human dimension is in danger of being lost Reflecting this concern New Mediums Better Messages contributes to new conversations between science social science and the humanities around the roles of different kinds of knowledge stories and data play in relation to global development It brings together a team of multidisciplinary contributors to explore popular representations of development including music blogs and fiction **Media, Religion and Conflict** Heather Savigny, Dr Lee Marsden, 2013-03-28 International relations as a discipline has largely ignored the role of religion in shaping international events The growth of Islamist militancy the increasing influence of the Christian Right on US foreign policy and George Bush's war on terror changed this for good Now more than ever we need to analyze this change and consider how religion and the way it is represented affects international politics Lee Marsden and Heather Savigny uniquely bring together some of the leading figures in the fields of politics and media international relations and security and international relations and religion including freelance journalist and newspaper columnist Nick Cohen the international authority on politics and religion Professor Jeffrey Haynes and Professor Justin Lewis who has a number of BBC commissions under his belt The volume offers a series of case studies reflecting on how the media covers religion as conflict within and between states It challenges readers to critically examine how media reportage and commentary influences perceptions and responses to religion and security **Propaganda, Power and Persuasion** David Welch, 2013-11-27 As Philip Taylor has written The challenge of the modern information age is to ensure that no single propaganda source gains monopoly over the information and images that shape our thoughts If this happens the war propagandists will be back in business again Propaganda came of age in the Twentieth Century The development of mass and multi media offered a fertile ground for propaganda while global conflict provided the impetus needed for its growth Propaganda has however become a portmanteau word which can be interpreted in a number of different ways What are the characteristic features of propaganda and how can it be defined The distinguished contributors to this book trace the development of techniques of opinion management from the First World War to the current conflict in Afghanistan They reveal how state leaders and spin doctors operating at the behest of the state sought to shape popular attitudes at home and overseas endeavouring to harness new media with the objective of winning hearts and minds The book provides compelling evidence of how the study and practice of propaganda today is shaped by its history *Propaganda & Persuasion*, **Encyclopedia of Radio 3-Volume Set** Christopher H. Sterling, 2004-03 Produced in association with the Museum of Broadcast Communications in Chicago the Encyclopedia of Radio includes more than 600 entries covering major countries and regions of the world as well as specific programs and people networks and organizations regulation and policies audience research and radio's technology This encyclopedic work will be the first broadly conceived reference source on a medium that is now nearly eighty years old with essays that provide essential information on the subject as well as comment on the significance of the particular person organization or topic being examined *On the Short Waves, 1923-1945* Jerome S. Berg, 2007-04-11 As radio developed in

the early 1920s the focus for most people was the AM band and stations such as KDKA the first broadcast station There was however another broadcast method that was popular among many early enthusiasts shortwave radio As is true today the transmission of news and entertainment programs over shortwave frequencies permitted reception over great distances For many in America and beyond shortwave was an exciting aspect of the new medium Some still tune the shortwave bands to enjoy the programming Others pursue broadcasts for the thrill of the hunt This book fully covers shortwave broadcasting from its beginning through World War II A technical history examining the medium s development and use tells the story of a listener community that spanned the globe Included are overviews of the primary shortwave stations operating worldwide in the 1930s along with clubs and competitions publications and prizes A rich collection of illustrations includes many QSLs the cards that stations sent to acknowledge receipt of their transmissions and that are much prized by long distance collectors

**The First Domino** Johanna Cushing Granville, 2004 A Fascinating Analysis Based on Newly Declassified Documents from the Former USSR and Communist Bloc On October 23 24 and November 3 4 1956 the Soviet Union invaded Hungary to reassert strict communist rule The First Domino International Decision Making during the Hungarian Crisis of 1956 is the first analytical monograph in English drawing on new archival collections from East bloc countries to reinterpret decision making during this Cold War crisis Johanna Granville selects four key patterns of misperception as laid out by Columbia University political scientist Robert Jervis and shows how these patterns prevailed in the military crackdown and in other countries reactions to it Granville perceptively examines the statements and actions of Soviet Presidium members the Hungarian leadership U S policy makers and even Yugoslav and Polish leaders According to Granville Soviet first secretary Nikita Khrushchev zigzagged ineptly between policy options with apparently little or no analysis of costs and risks permitting Moscow s Eastern European satellites at times to subtly manipulate the Kremlin s decision making Granville s discussions of Polish policy Yugoslav actions and the arduous process of normalization after the uprising show that the Soviets were preoccupied with stemming what many of them construed as a Western encouraged attempt to undermine Eastern Europe s communist regimes Granville concludes that the United States bears some responsibility for the events of 1956 as ill advised U S covert actions may have convinced the Soviet leaders that the United States was attempting to weaken Soviet hegemony over Eastern Europe although the Eisenhower administration actually intended only to sow confusion and dissatisfaction This masterful study leads to the conclusion that the Hungarian Crisis in 1956 was most likely sustained by self perpetuating misperceptions and suspicions among key countries In short Granville s multi archival research tends to confirm the post revisionists theory about the cold war it was everyone s fault and no one s fault It resulted from the emerging bipolar structure of the international system the power vacuum in Europe s center and spiraling misconceptions
