A History of the Mediterranean Air War, 1940-1945 Christopher Shores, Russell Guest, 2025-09-30 In 1943 Allied bombers from Italy launched strategic attacks on Axis oil fields factories and Danube supply routes Following the inter Allied Casablanca Conference in January 1943 the outline for the Combined Bomber Offensive was agreed and resulted in early February with the Casablanca Directive This required the progressive destruction and dislocation of the German military industrial and economic systems and the undermining of the morale of the German people to a point where their capacity for armed resistance is fatally weakened This directive was clarified in June when the Combined Chiefs of Staff issued the Pointblank Directive that stated that the highest priority targets were the fighter aircraft factories to ensure that in the coming invasion of France the enemy would not have air superiority When these directives were issued it was envisaged that as well as attacks by RAF Bomber Command and the US 8th Air Force based in England the strategic bomber forces in Italy would begin operations once suitable bases were available After the Allied landings in Italy and resulting collapse of the Italian fascist regime a network of bomber bases was hastily developed Thus on 1 November 1943 the US 15th Air Force was formed to conduct the daylight bombing offensive against strategic targets in southern Germany and across southeastern Europe Key among these were the Rumanian oilfields and traffic along the River Danube This new formation was joined by the smaller but highly effective 205 Group RAF that was trained and equipped for night bombing so mirroring their equivalent British based formations The damaging attacks on the Reich's oil supplies and the highly effective Danube mining campaign conducted at night by 205 Group delivered huge strategic effect The latter reduced vital oil and goods traffic into the Reich to a trickle but also dislocated the supply and logistics train into the southern part of the Eastern Front so giving manifest support to the Soviets In this volume the early months of this hugely significant air campaign are described in minute and original detail and are accompanied by hundreds of hitherto unpublished photographs In combating these attacks Germany's Axis allies such as Hungary Rumania Bulgaria and Slovakia were encountered for the first time by the Western Allies

Fokker D.XXI Aces of World War 2 Kari Stenman, Peter de Jong, 2013-04-20 The Dutch D XXIs saw less than a week

of action following the German invasion of the west on 10 May 1940 with many of the country's 28 fighters being destroyed on the ground. However, those that survived the initial onslaught inflicted losses on the Luftwaffe. By then, however, the D XXI had found everlasting fame in Finland during the Winter War of 1939-40. Proving itself a real thorn in the side of the Soviets, the fighter operating in primitive conditions and against vastly superior numbers, Finnish D XXIs racked up an incredible score against the Red Air Force. The D XXI also has the distinction of producing the first ace in a single mission in World War 2 when then 1Lt Jorma Sarvanto shot down six Ilyushin DB-3 bombers on 6 January 1940. After spending a year providing home defence and flying coastal patrols during the early stages of the Continuation War in 1941, all surviving Finnish Fokker D XXIs were relegated to the reconnaissance role which they performed through to the end of hostilities in September 1944.

German Eagles in Spanish Skies David Johnston, 2018-11-28 Willy Messerschmitt's Bf 109 is among the most famous fighter aircraft in the history of military aviation and it was during the Spanish Civil War that it first saw combat. Using newly discovered records, the author describes the Bf 109's operational career with the Legion Condor, the German military unit that fought in Spain. The text is enhanced by many personal accounts written by the pilots who flew the Bf 109 in Spain, with descriptions of combat and other aspects of life in Spain from 1936-39. All versions of the Bf 109 which served in Spain are described, accompanied by illustrations from the pilot's notes. The book is illustrated with 235 photos, most never before published, and technical drawings. Appendices provide detailed descriptions of the fourteen Bf 109 A fighters sent to Spain, biographies of selected pilots who served there, and a copy of J 88's victory list from the estate of a former Legion fighter pilot. Ultimate Allied Fighters of the Second World War Justo Miranda, 2024-01-07 During the five years of the Second World War, the power of engines and speed of aircraft increased as much as it did during twenty years of peacetime. Conventional aircraft and engines reached the limits marked in the original design and surpassed them very fast. The basis for this huge achievement was exotic fuels, short-lived, artificially overpowered engines, propellers with four, five, and even six blades, and thinner wings with special sections of laminar flow. Then the faster Allied fighters began to be attacked by a demon that lived in the air: scientists called it compressibility buffeting, and different types of aircraft suffered it at

different speeds and manifested itself in different ways The American and British designers never understood the true causes behind the aerodynamic phenomenon They were forced to adopt brute force solutions by increasing engine power on the turbojet powered fighters leaving in the background the research on the last projects of fighters driven by monster piston engines The purpose of this book is to present them to the public for its notable interest **Rcaf War Prize Flights, German and Japanese Warbird Survivors** Harold A. Skaarup,2006-05-23 This handbook concerns the collection of Air Technical Intelligence and the test flying of war prizes carried out by two RCAF bomber pilots who were posted to the Royal Aircraft Establishment s Foreign Aircraft Flight Farnborough in the United Kingdom in May 1945 Their primary task was to visit former Luftwaffe airfields and to find and fly back any aircraft they deemed worthy of evaluation The list of aircraft found here does not include every German combat aircraft of the Second World War as it focuses on those warbirds captured and flown by members of the RCAF or sent to Canada as war prizes Very few of these rare aircraft exist today and therefore information on known locations where German Japanese and Italian warbird survivors may be found is included As a member of the Canadian Aviation Preservation Association and the Canadian Aviation Artists Association the author strongly supports the preservation of Canada s aviation heritage The primary intent of this handbook is to provide information for aviation artists and enthusiasts looking for that unusual never before painted military aviation subject and to support the efforts of those engaged in the search for those missing warbirds for which no examples currently exist **World War II** Spencer C. Zabecki,2014-10-28 Written by experts for use by nonexperts this monumental work probes Germany s Genius for War and

the unmistakable pattern of tactical and operational innovation and excellence evident throughout the nation's military history.
