Messerschmitt Me 210/410 In Action:

The Messerschmitt 210/410 Story Jan Forsgren, 2019-09-17 In 1938 the Reichsluftfahrtministerium German Air Ministry RLM issued a requirement for a new twin engine heavy fighter to replace the Me 110 This type of combat aeroplane was known as Zerstörer Destroyer The first prototype flew in September 1939 The Me 210 proved very difficult to fly having numerous deficiencies It was said to be deadlier to its crews than the enemy Nevertheless the Luftwaffe ordered the Me 210 into production Operational trials began in late 1941 but it was eventually acknowledged that the aircraft had to be redesigned in order to be accepted into Luftwaffe service The whole Me 210 debacle proved a huge scandal A redesigned variant the Me 410 began to reach Luftwaffe units in mid 1943 Even if the Me 210 and Me 410 were similar in appearance the latter had to be redesigned to avoid the extremely poor reputation of the Me 210 The Me 410 proved a quite successful aeroplane being used as a heavy fighter and for reconnaissance duties Its closest Allied equivalent was the British DH 98 Mosquito More than 1 500 Me 210 410s were built in Germany and Hungary with only two Me 410s surviving today

International Warbirds John C. Fredriksen, 2001-08-01 In depth descriptions and photographs of the aircraft of 21 nations presented with a unique human dimension that goes behind the machines to the people involved Invaluable for specialists accessible to enthusiasts International Warbirds An Illustrated Guide to World Military Aircraft 1914 2000 puts the most legendary fighter aircraft of the 20th century developed outside the United States on vivid display It offers 336 illustrated biographies of the most significant warplanes used in squadron service from World War I to the Balkan conflict including numerous models from Great Britain France Russia and Japan as well as notable machines from Israel Canada China India Brazil and other nations Entries span the history and scope of military aircraft from bombers and fighters to transports trainers reconnaissance craft sea planes and helicopters with each capsule history combining nuts and bolts technical data with the story of that model's evolution and use Together these portraits offer an exciting well researched tribute to visionary designers and builders as well as courageous pilots and crews across the globe and tell a vivid tale of how air power became such a decisive factor in modern warfare [The Luftwaffe Over Germany](#) Donald Caldwell, Richard Muller, 2014-04-02 A wonderful book on the Luftwaffe's WW2 operations German Air Force and its struggle to defend Germany from the Allied bomber attacks FSAddon The Luftwaffe over Germany tells the story of one of the longest and most intense air battles in history The daylight air struggles over Germany during World War II involved thousands of aircraft dozens of units and hundreds of aerial engagements Until now there has been no single book that covers the complete story from the highest levels of air strategy to the individual tales of Fw 190s Bf 109s and Me 262s in air combat against the American bomber streams This ground breaking work explores the detrimental effect of Luftwaffe theory and doctrine on the German air arms ability to defend the homeland once the Allied Combined Bomber Offensive began in earnest By mid 1944 they had lost the battle but had exacted a terrible price from the Americans in the process The product of a ten year

collaboration between two noted Luftwaffe historians this work fills a major gap in the literature of World War II The authors have examined original war diaries logbooks doctrine manuals after action reports and interviews with many combat veterans to produce a richly detailed account Illustrated with nearly two hundred photographs as well as new maps and diagrams this is the standard work on the subject Looking for a better book on the German air defense of the Third Reich in daylight during the war would probably be a useless endeavor A Wargamers Needful Things **Messerschmitt Me 210/410 in Action** George Punka,1994-01-01 Day Fighters in Defence of the Reich Donald Caldwell,2012-02-27 A day by day account of Nazi air operations in WWII by the coauthor of The Luftwaffe over Germany winner of an Air Force Historical Foundation Award Day Fighters in Defence of the Reich is a detailed comprehensive daily reference to the air operations flown by the Luftwaffe During the Second World War German air defenses struggled to cope with the threat posed by the American 8th and 15th Air Forces which were charged with destroying Germany s critical war industries and wresting control of the air over the Reich from the Luftwaffe This unique volume includes a brief narrative and a table of statistics detailing every mission of every Luftwaffe unit defending the Greater German Reich or the western occupied zone against strategic raids by the USAAF tables of monthly sorties losses and victory claims by the USAAF and the Luftwaffe over the Reich and the western occupied zone and combat accounts by Luftwaffe pilots This tremendous piece of work is based on documents in the German American and British government archives and German pilot logbooks and interviews from the author s extensive collection Aeroplane Magazine Caldwell is well known for his balanced presentations and the clarity of his writing This book is a must have for anyone with a serious interest in World War II aviation history Highly recommended and quite likely to be remembered as one of the most important new books of the year Stone Stone Such a staggering quantity of information would be overwhelming in less capable hands But Caldwell spices up his tight narrative with excellent photos and informative captions Aviation History **Me 210/410 Zerstörer Units** Robert Forsyth,2019-11-28 Intended as a progressive development of the twin engined Bf 110 Zerstörer destroyer or heavy fighter the Me 210 first took to the air in September 1939 However due to a lack of sufficient flight testing before being declared service ready the Me 210 suffered from a less than satisfactory reputation in respect to its flight characteristics and weak undercarriage After enhancements were made to the fuselage and wings and the power of the plane was increased the Me 210 became the Me 410 in late 1942 By this stage of the war much was expected of the two types which were forced to fly in very dangerous skies over North Africa and in the defence of the German homeland Both aircraft were deployed as heavy fighters fighter bombers reconnaissance platforms and interceptors seeing service with a number of different units The Me 410 was fitted with 30 mm cannon 21 cm underwing mortars and the colossal 5 cm BK cannon that was intended to pack a punch against the USAAF s four engined bombers which threatened the Reich in large numbers from 1943 onwards In this title supported by contemporary photography and full colour artwork Robert Forsyth tells the complex story of the Me 210 and 410 detailing
