Lepage, 2009-03-23 One of the most significant innovations in modern warfare has been the appearance and development of air power a technology which demanded technical and financial investment on a whole new scale and which ultimately changed the fundamental nature of war itself This book covers the history and development of the German air force from 1935 to 1945 with descriptions and illustrations of almost all of the Luftwaffe's airplanes including fighters jet fighters dive bombers ground attackers medium and heavy bombers jet bombers seaplanes flying boats and carrier planes transport and gliders reconnaissance and training aircrafts helicopters and many futuristic projects and other rarities *Hitler's Paratrooper* Gilberto Villahermosa, 2010-07-30 A valuable study a must read for everybody interested in the topic of German Fallschirmjäger in the Second World War Volker Griesser author of *The Lions of Carentan* Rudolf Witzig entered the history books as the heroic captor of Belgium's supposedly impregnable fortress Eben Emael in May 1940 the first time that glider borne troops were used in the war To many people he is also known as the commander of the battle group that fired the first shots of the Tunisian campaign Remarkably next to nothing has been written about him as an individual This biography completed with the full support of Witzig's widow and son is a comprehensive history of the man and also provides important new detail on the German parachute arm that he served In the course of his service Witzig was awarded the coveted Knight's Cross of the Iron Cross even though he had not yet earned the Iron Crosses 2nd and 1st class To resolve the problem he was awarded all three on the spot Witzig was involved in Operation Mercury the invasion of Crete but was injured during the fighting After his recovery he was sent to Tunisia where he was

credited with several successful defensive actions He ended the war in captivity surrendering to the Allies on May 8 1945 the day after his name was placed on the Honour Roll of the Luftwaffe A gripping biography providing a tough gritty and compelling study of a German soldier Firetrench A unique well written and impeccably researched account of the Third Reich s evolving fortunes as witnessed on numerous battlefronts by a highly decorated Fallschirmj ger officer Mark J Reardon author of *Defending Fortress Europe* World War II in Europe David T. Zabecki, 2015-05-01 World War II defined the 20th century and shaped many events from the decolonization of Africa to the rise and fall of the Berlin Wall This encyclopedia offers a focused overview of this complex and volatile era the circumstances that led up to war the underlying causes its unfolding and consequences Organized for quick and precise access More than 1300 entries by 150 experts are arranged in six sections for easy reference and consultation All the key ideas events actions weapons individuals and organizations that played vital roles in the war are covered from the Axis Pact to the Arab League from the OSS to the Africa Korps from the Chetniks to the Jedburghs from the battle of Kursk to Operation Mincemeat from Bill Donovan to Otto Skorzeny from Gestapo to SMERSH from Georgi Zhukov to Jean Leclerc from the 88 gun to the Norden Bombsight Covers important neglected subjects The Encyclopedia puts special emphasis on the often neglected operations in Eastern Europe and Russia A key section inspects and rates all the major weapons with handy tables for easy comparison And in recognition of the first large scale participation of women in the war the volume thoroughly documents their individual and unit contributions to the Allied effort Finally the encyclopedia discusses battlefield realities that explain for example why the airborne drops at Normandy succeeded and the ones at Arnheim failed A bibliography glossary maps photographs and weapons and data tables enhance the coverage Also includes 16 maps *Hitler's Air Bridges* Dmitry Degtev, Dmitry Zubov, 2024-01-05 Much has been written about the famous fighters and bombers of the Luftwaffe which proved so successful in the invasion of Poland the Battle of France the Battle of Britain and in the early operations in Eastern Europe Little attention however has been focused on the Luftwaffe s transport aircraft which played a vital role in supplying German forces in every theatre In early May 1940 the battle of Norway was nearing its climax but General Eduard Dietl s 3rd J ger division was blocked by the Allies in the Narvik area Only the Luftwaffe could provide effective assistance to the encircled troops The special purpose groups KGr zbV107 and KGr zbV108 were ordered to supply the division by air Transports delivered ammunition food and even boots for German sailors who found themselves on land This was the first of a number of occasions in which the Luftwaffe s transport Gruppen often equipped with the slow but reliable Junkers 52 created an air bridge to supply troops cut off or surrounded by the enemy The transport Gruppen had previously been involved in supporting the advance of German forces during the Polish campaign this being followed by the capture of Denmark The Netherlands Belgium and Greece During Operation Barbarossa German troops were dispersed over the vast expanses of Russia It was a country without roads where the normal supply by trucks and trains to the troops was difficult and sometimes impossible Often it was only the Luftwaffe s transport aircraft that

kept the Germans fighting But with Hitler's insistence that there should be no retreat despite the overwhelming strength of the Soviet forces his German armies found themselves surrounded and the Luftwaffe had to create air bridges to supply the beleaguered troops Nowhere was this more evident than the Battle of Stalingrad G ring having convinced Hitler that the Luftwaffe was capable of keeping the Sixth Army supplied As the war increasingly turned against the Third Reich air bridges were vital in supporting and maintaining its garrisons in places such as Demyansk Holm Korsun Budapest Breslau and many others Hitler's Air Bridges presents the story of the Luftwaffe's transport Gruppen more extensively and in greater detail than ever before *Soldiers*, 1974 **Wild about Flying!** David Marshall, Bruce Harris, 2003 A celebration of aviation's first 100 years **American Book Publishing Record**, 2002 German Warplanes of World War II Francis K. playing key roles in the victorious campaigns waged by the German Army from 1939 to 1942 This highly illustrated title describes the development and organizational history of the PzKpfw I introduced in 1934 and the PzKpfw II introduced in 1936 It explains how the annexation of German speaking Sudetenland in 1938 and subsequently of Czechoslovakia itself delivered an unexpected bonus for the Panzerwaffe in the form of two Czech Army light tanks introduced into German service as the PzKpfw 35 t and PzKpfw 38 t It goes on to cover the considerable operational service of these tanks in Poland France and the invasion of the Soviet Union in 1941 From late 1941 onwards they were withdrawn from front line service but the chassis were used until the end of the war for self propelled artillery and tank destroyers German armour expert Thomas Anderson draws on archival material after action reports and rare photographs in this comprehensive study of the German light Panzers that played a key role in the early years of World War II
