*Meta-realism in Architecture* Renato Severino,1995      Visual Experiences in Cinquecento Theatrical Spaces Javier Berzal de Dios,2019-01-01 Through an interdisciplinary examination of sixteenth century theatre Visual Experiences in Cinquecento Theatrical Spaces studies the performative aspects of the early modern stage paying special attention to the overlooked complexities of audience experience Examining the period s philosophical and aesthetic ideas about space place and setting the book shows how artists consciously moved away from traditional representations of real spaces on stage instead providing their audiences with more imaginative and collaborative engagements that were untethered by strict definitions of naturalism In this way the book breaks with traditional interpretations of early modern staging techniques arguing that the goal of artists in this period was not to cater to a single privileged viewer through the creation of a naturalistically unified stage but instead to offer up a complex multimedia experience that would captivate a diverse assembly of theatre goers      **Architectural Publications Index** ,1997      **International Books in Print** ,1986
