Metal Process Engineering P. Polukhin, B. Grinberg, S. Kantenik, 2003-05-01 The course Metal Process Engineering is intended for engineers as a basis for the successful mastery of a number of special subjects An acquaintance with the methods employed to produce ferrous and non ferrous metals and their alloys and a knowledge of their principal properties and processing procedures are of vital importance for expedient selection and proper application of metallic materials Engineers in all lines of industry must know what effect heat treatment and other processes have on the properties of metals and what can be done to alter these properties in the desired directions This is an English translation of a textbook originally Metal Process Engineering P. Polukhin, 1964 Metal Process Engineering Norman Emme published in the Soviet Union Woldman, 1948 Metallurgical Process Engineering Ruiyu Yin, 2011-09-15 Metallurgical Process Engineering discusses large scale integrated theory on the level of manufacturing production processes putting forward concepts for exploring non equilibrium and irreversible complex system It emphasizes the dynamic and orderly operation of the steel plant manufacturing process the major elements of which are the flow process network and program The book aims at establishing a quasi continuous and continuous process system for improving several techno economic indices minimizing dissipation and enhancing the market competitiveness and sustainability of steel plants The book is intended for engineers researchers and managers in the fields of metallurgical engineering industrial design and process engineering Prof Ruiyu Yin is honorary president of the Central Iron and Steel Research Institute China and a member of the Chinese Academy of Engineering
