Metal Ions In Biological Systems:

Metal Ions in Biological Systems Helmut Sigel, Astrid Sigel, 2024-11-01 This book considers nickel in the environment and in aquatic systems and outlines its role for plants. It discusses the toxicology of nickel compounds and the role of nickel in carcinogenesis focusing on the analysis of nickel in biological materials and the related difficulties. **Metal Ions in Biological Systems** Astrid Sigel, Helmut Sigel, 1996-02-05 Volume 32 covers metal ion bonding to phosphate sugar and nucleobase residues, the ambidentate as well as the stacking properties of nucleotides, kinetic aspects as well as properties of nucleobase and nucleotide analogs and the oligonucleotides and nucleic acids. It examines electron transfer reactions over a large number of base repairs in DNA, the role of metal ions in ribozymes, ternary metal nucleic acid base protein complexes, metal responsive gene regulation and the structure activity relationships of anticancer drugs and their action on DNA including cisplatin and the role of proteins. **Metal Ions in Biological Systems** Sanat Dhar, 2013-03-09 The articles published in this volume are based on the papers delivered at a conference on the Role of Metal Ions in Biological Systems held November 20 and 21 1972 at Argonne National Laboratory. The purpose of the conference was to present to an interdisciplinary audience of physical scientists some recent developments illustrating the chemical and environmental participation of the heavy metal ions in the biological system. The invited speakers at the conference are specialists in the fields they describe and the articles presented here are at a level of interest to readers with backgrounds in physical sciences who are not necessarily doing research in the areas described. The articles are referenced through 1972 and in some cases early 1973 and thus should also be of value to research workers. It is hoped that the book will be of particular interest to chemists, biologists, workers in the fields of environmental science and public health as well as graduate and senior undergraduate students in these disciplines. The conference was sponsored by the Central States Universities, Inc., a consortium of sixteen midwestern universities, the Center for Educational Affairs, Argonne National Laboratory and the United States Atomic Energy Commission. It is my pleasure to thank the members of the conference committee for their ideas and active help in organizing the conference. **Metal Ions in Biological Systems** Astrid Sigel, 2001-01-30 Focuses on the vibrant area of probing enzymes or proteins by metal ions and small complexes. Offers a summary of the basic characteristics of the amide bond emphasizing its proton and metal ion interactions including a quantitative analysis of its hydrolysis and formation. *Metal Ions in Biological Systems* Astrid Sigel, Helmut Sigel, 1998-01-09 Volume 35 covers the biological cycling of iron in oceans, the transport of iron in microorganisms, fungi and plants, the roles and properties of siderophores, the regulation of iron transport and uptake in animals, plants and microorganisms and more. **Metal Ions in Biological Systems** Helmut Sigel, 2024-11-01 This volume is an attempt to improve the understanding of the coordination chemistry and action of the biologically important compounds, also termed antibiotics, and to stimulate further research in this area describing the properties of the biologically important compounds. **Metal Ions in Biological Systems**, 1988 **Metal**
