The Pleasures of Memory Sarah Winter, 2015-08-03 How did this nineteenth century novelist change the way we think A fine contribution to the sociology of literature Highly recommended Choice What are the sources of the commonly held presumption that reading literature should make people more just humane and sophisticated Looking at literary history in relation to the cultural histories of reading publishing and education The Pleasures of Memory illuminates the ways in which Dickens s serial fiction shaped not only the popular practice of reading for pleasure and instruction but also the school subject we now know as English Sarah Winter shows how Dickens s serial fiction instigated specific reading practices by reworking the conventions of religious didactic tracts from which most Victorians learned to read Incorporating an influential associationist psychology of learning founded on the cumulative functioning of memory Dickens s serial novels consistently led readers to reflect on their reading as a form of shared experience Dickens s celebrity authorship Winter argues represented both a successful marketing program for popular fiction and a cultural politics addressed to a politically unaffiliated social activist Victorian readership As late nineteenth century educational reforms consolidated British and American readers into mass populations served by state school systems Dickens s beloved novels came to embody the socially inclusive and humanizing goals of democratic education

Transcultural Memory Rick Crownshaw, 2016-03-16 Memories are not static or frozen remaining in particular sites or places within and belonging to particular groups cultures or nations rather memory travels Broadly speaking memory has travelled because of the demographic displacements brought about by modernity s extremes slavery colonialism ethnic cleansing and genocide and also because of the trade travel and migration made possible by globalisation Whether social movement is violent exilic

migratory emancipatory or oppressive it is accompanied by memory With the movement of people memories of modernity's histories and postmodern legacies meet correspond and often become mutually constitutive Even where memories compete with each other for cultural dominance mutual dialogue and recognition is implicit if not explicit Memories travel through and across cultures and national boundaries a process increasingly facilitated by mass media technologies This collection explores a range of case studies of transcultural memory as well as theorising the mobility of memory as it travels It was originally published as a special issue of the journal *parallax*
