Metaphysical Values:

Metaphysics and Explanation W. H. Capitan, D. D. Merrill, 2010-11-23 This volume offers an unusual variety of topics presented during the fifth annual Oberlin Colloquium in Philosophy Essays topics include a dispute of the standard deductivist account of scientific testability two definitions of nonsense that are closely related and correlate to science's concern with truth and philosophy's concern with concepts contesting the causes of voluntary actions purported in Hart and Honore's Causation and the Law distinguishing two kinds of metaphysical tasks taxonomic and evaluative and discussions of what a thing is in terms of its qualities and particulars and the distinction between numerical and conceptual differences universals and individuation

Secular and Spiritual Values Dudley Plunkett, 2018-10-16 Originally published in 1990 educational debate in the western world was dominated by pragmatic utilitarian values The prevailing assumption was that education should be geared towards fitting people into the world of work Dudley Plunkett broke new ground in this debate by seeking to reconcile secular and spiritual values in educational policy and practice Secular and Spiritual Values presents a critique of the influence of enterprise culture on education It argues that the resurgence of interest in the spiritual today represents a return to an essential aspect of human nature and maintains that the spiritual perspective can provide a context for the regeneration of values in education It indicates a way forward which while not denying pragmatism rationalism or holistic values calls for openness to a spiritual reality that is seen as primary It also assesses the practical implications and priorities for action if education is to contribute to the exploration of the spiritual as well as the intellectual and emotional dimensions of human experience This book has grown out of the author's twenty five years experience in educational studies and from his particular preoccupation with values in education It should still be of interest to those concerned with the nature and purpose of education teachers parents educational policy makers and administrators and academics in the field

Nietzsche's Metaphysics of the Will to Power Tsarina Doyle, 2018-02-15 Nietzsche's controversial will to power thesis is convincingly rehabilitated in this compelling book Tsarina Doyle presents a fresh interpretation of his account of nature and value which sees him defy the dominant conception of nature in the Enlightenment and overturn Hume's distinction between facts and values Doyle argues that Nietzsche challenges Hume indirectly through critical engagement with Kant's idealism and that in so doing and despite some wrong turns he establishes the possibility of objective value in response to nihilism and the causal efficacy of consciousness as a necessary condition of human autonomy Her book will be important for scholars of Nietzsche's metaphysics and of the history of philosophy and science more generally

Spiritual Capital Samuel D. Rima, 2016-04-01 Presenting a thorough comprehensive theory of spiritual capital based on solid academic research Spiritual Capital serves to reinforce and amplify the notion of a moral economic core that is beginning to feature in contemporary economic arguments In this rare major work wholly dedicated to the subject of spiritual capital Sam Rima explains the desperate need for revolutionary and transformational thinking in the area of economic policy and practice and

makes the case for a new moral foundation to business and economics that directly addresses today's financial and business crisis. Writing in an accessible style and drawing on examples from several continents, Rima explains spiritual capital theory in terms of the resources needed for its creation, how it is formed, how it can be invested, and what the return on investment can be. The book provides practical tools for measuring a personal or organizational store of spiritual capital along with clear guidelines on how to engage in spiritual capital formation. These will benefit business leaders interested in developing viable and sustainable enterprises capable of avoiding the disconnection between economic policy and social reality. There are also recommendations here for policy makers regarding the macro application of spiritual capital theory. This important contribution to Gower's Transformation and Innovation Series will appeal to business leaders and policy makers, academicians and students in the fields of sociology, theology, and economics, and anyone interested in social and economic justice issues, social innovation, and corporate social responsibility.

Metaphysics Without Truth Stefan Lorenz Sorgner, 1999 [The Metaphysics of Race](#) Amit Varshizky, 2024-11-04 This book seeks to reframe debates on the conflicting scientific and spiritual traditions that underpinned the Nazi worldview, showing how, despite the multitude of tensions and rivals among its adherents, it provided a coherent conceptual grid and possessed its own philosophical consistency. Drawing on a large variety of works, the volume offers insights into the intellectual climate that allowed the radical ideology of National Socialism to take hold. It examines the emergence of nuanced conceptions of race in interwar Germany and the pursuit of a new ethical and existential fulcrum in biology. Accordingly, the volume calls for a re-examination of the place of genetics in Nazi racial thought, drawing attention to the multi-register voices within the framework of interwar racial theory. Varshizky explores the ways in which these ideas provided new justifications for the Nazi revolutionary enterprise and blurred the distinction between fact and value, knowledge and faith, the secular and the sacred, and how they allowed Nazi thinkers to bounce across these epistemological divisions. This volume will be of interest to scholars of Nazi Germany and World War II intellectual and cultural history, the history of science, and the philosophy of religion.

Reality and Value Arthur Campbell Garnett, 2019-03-06 Originally published in 1937, this book addresses the importance of the theory of values that rests on a general metaphysical understanding founded on a comprehensive view of all aspects of the world. The author speaks against the absolutist theories with a realistic one encompassing a theory of space and time and considering value as an object of immediate intuition. These great philosophical questions feed into discussions of the philosophy of religion and of science. Garnett distinguishes between spiritual and other values on the ground that the spiritual values are not subjective to satiety while other values are. He contends that our knowledge of mind is as direct and reliable as our knowledge of the physical world. This is an important early book by an influential 20th Century thinker.

Metaphysics and Mystery Thomas Dean, 2019-07-15 *Metaphysics and Mystery: The Why Question East and West* is a critical analysis, comparison, and evaluation of philosophical answers, Western and Asian, to the question: Why is there something rather than nothing? The question first

posed by the seventeenth century philosopher Leibniz was reintroduced in the twentieth century by Heidegger Volume 1 begins with an introduction that lays out the issues raised by the why question It then analyzes contemporary Western philosophers who provide either cosmological metaphysical or existential ontological answers to the question It also considers transitional answers that bridge the two Volume 2 examines Asian philosophers classical and contemporary who though rejecting the assumptions behind the question put forward nondualist answers that have a direct bearing on it It concludes with an argument for a revised understanding of the why question that draws on the strengths and weaknesses of these Western and Asian philosophies and explores implications for ethics and religious thought

The Eternal Values Hugo Münsterberg, 1909

Nietzsche and Metaphysics Peter Poellner, 2000 Peter Poellner offers a comprehensive interpretation and a detailed critical assessment of Nietzsche's later ideas on epistemology and metaphysics drawing on his published works and his largely unpublished voluminous notebooks

Reviving Intellectual Intuition in Metaphysics Kenneth Rose, 2024-11-28 Calling for a revival of intellectual intuition in metaphysics long after its banning by Kant Kenneth Rose overcomes the forgetfulness of being through contemplative ontology Rose argues for the reinstatement of intellectual intuition in metaphysics long after its banning by Kant His claim is not merely the conclusion of a thought experiment or of an exercise in conceptual analysis It is the result of the contemplative recognition of being with a meditatively concentrated intellect nous in Greek and buddhi in Sanskrit Recognizing intellectual intuition as a long neglected faculty of philosophical insight Rose shows how it can result in an immediate intuitive discerning of being He

discusses how being parcels itself out into the intellectual forms providing the underlying nonphysical arrangement of the physical and mental worlds By reviving the use of intellectual intuition in metaphysics Rose draws upon historical sources across multiple Asian and Anglo European philosophical schools This is a work of contemplative constructive philosophy that breaks down divisions between science philosophy and religion and between diverse cultures and divergent worldviews

Nietzsche and Metaphysics Michel Haar,1996-01-01 Michel Haar assesses the overcoming of metaphysics urged by Nietzsche Pointing out that Nietzsche s overcoming must be conceived as a task both critical and reconstructive Haar shows how Nietzsche criticizes philosophical concepts as being traceable to a process of simplification and identification thus subverting traditional categories and identities Haar presents Nietzsche as an aesthetic stoic Although opposed to any doctrinal tenet Nietzsche rekindles a Stoic return to nature in the register of a creative and aesthetic decision Necessity is no longer a single rational force permeating all beings Instead he conceives of the will to power as a schematization of the natural chaos and refers Dionysos to an inspiring voice the genius of the heart Rejecting the Deleuzian essay of interpretation that unleashes the simulacra of an untamed imagination Haar points out that Nietzsche s rejection of Kant is much less extreme than imagined in Deleuze s eccentric readings Haar also shows that the rupture with Schopenhauer came very early in Nietzsche s itinerary although he accepted the idea of a social conditioning of science Haar shows that two Apollonian sublimities are distinguished by Nietzsche one generating idyll epos and mythic language the other a compensatory illusion on the dramatic stage destined to dismiss the horror of an endlessly swelling ground It is this monstrosity that a creative forgetfulness is destined to replace by seeking a place for the work of art amidst tragic joy *Lyotard and the Political*

James Williams,2002-01-31 Lyotard and the Political is the first book to consider the full range of the political thought of the French philosopher Fran ois Lyotard and its broader implications for an understanding of the political James Williams clearly and carefully traces the development of Lyotard s thought from his early Marxist essays on the Algerian struggle for independence to his break with the thought of Marx and Freud This is compared with Lyotard s later highly influential writings on the politics of desire and his attempts to base a postmodern political discourse on the sublime An indispensable work for all who are interested in modern continental philosophy Lyotard and the Political offers the first systematic analysis of the political dimension of the work of one of the most controversial and influential philosophers of the twentieth century Also available in this series Lacan and the Political Pb 0 415 17187 3 12 99 Heidegger and the Political Pb 0 415 13064 6 12 99 Derrida and the Political Pb 0 415 10967 1 13 99 Nietzsche and the Political Pb 0 41510069 0 12 99 Foucault and the Political Pb 0 415 10066 6 12 99 The Metaphysical Justification of Religion Robert Sleightholme Franks,1929 **Radical**

Axiology Hugh P. McDonald,2021-11-08 This book treats values as the basis for all of philosophy an approach distinct from critiquing theories of value and far rarer First Philosophy the effort to justify the foundations for a system of philosophy is one of the main issues that divide philosophers today McDonald s philosophy of values is a comprehensive attempt to replace

philosophies of existence being experience the subject or language with a philosophy that locates value as most basic This transformation is a radical move within Western philosophy as a whole since it has never been done in such a thoroughgoing way Hugh P McDonald makes a comprehensive case against first philosophy as metaphysical by mounting a case against all metaphysical systems of philosophy Radical Axiology A First Philosophy of Values is a fresh start for a rebirth of philosophy While other movements debate the death of philosophy this book radically re evaluates the direction of philosophy by discovering values at the basis of all philosophy This reorientation addresses the question of what the love of wisdom can mean for us today
