Metaphysics Of Experience A Companion To Whiteheads Process And Reality:

The Metaphysics of Experience Elizabeth M. Kraus, 1998 The Metaphysics of Experience styles itself as a Sherpa guide to Process and Reality whose function is to assist the serious reader in grasping the meaning of the text and to prevent falls into misinterpretation Although originally published in 1925 Process and Reality has perhaps even more relevance to the contemporary scene in physics biology psychology and the social sciences than it had in the mid twenties Hence its internal difficulty its quasi inaccessibility is all the more tragic since unlike most metaphysical endeavors it is capable of interpreting and unifying theories in the above sciences in terms of an organic world view instead of selecting one theory as the paradigm and reducing all others to it Because Alfred North Whitehead is so crucial to modern philosophy The Metaphysics of Experience plays an important role in making Process and Reality accessible to a wider readership *The Metaphysics of Experience* Elizabeth Kraus, 2018-09-18 The Metaphysics of Experience styles itself as a Sherpa guide to Process and Reality whose function is to assist the serious reader in grasping the meaning of the text and to prevent falls into misinterpretation Although originally published in 1925 Process and Reality has perhaps even more relevance to the contemporary scene in physics biology psychology and the social sciences than it had in the mid twenties Hence its internal difficulty its quasi inaccessibility is all the more tragic since unlike most metaphysical endeavors it is capable of interpreting and unifying theories in the above sciences in terms of an organic world view instead of selecting one theory as the paradigm and reducing all others to it Because Alfred North Whitehead is so crucial to modern philosophy The Metaphysics of Experience plays an important role in making Process and Reality accessible to a wider readership The Metaphysics of Experience, 2019 The Metaphysics of Experience styles itself as a Sherpa guide to Process and Reality whose function is to assist the serious reader in grasping the meaning of the text and to prevent falls into misinterpretation Although originally published in 1925 Process and Reality has perhaps even more relevance to the contemporary scene in physics biology psychology and the social sciences than it had in the mid twenties Hence its internal difficulty its quasi inaccessibility is all the more tragic since unlike most metaphysical endeavors it is capable of interpreting and unifying theories in the above sciences in terms of an organic world view instead of selecting one theory as the paradigm and reducing all others to it Because Alfred North Whitehead is so crucial to modern philosophy The Metaphysics of Experience plays an important role in making Process and Reality accessible to a wider readership **The Epochal Nature of Process in Whitehead's Metaphysics** F. B. Wallack, 1980-06-30 While my book attempts to reflect the full range of scholarly debate I have also attempted to make it useful to anyone interested in Whitehead To this end I have introduced the Whiteheadian terms one by one explaining each in the light of my interpretation and I have used examples wherever possible I try to show that Whitehead intended his philosophy have a place in our lives by reshaping our common conceptions and that he did not intend it to be relegated to purely abstract or esoteric application F Bradford Wallack The twentieth century has seen the greatest innovations in

philosophical cosmology since Newton and Descartes and Alfred North Whitehead was the first and greatest of the philosophers to work out these innovations in systematic ways In a book that will be controversial in the philosophical community F Bradford Wallack argues that interpretations widely accepted by Whiteheadians need revaluation because these interpretations are based on materialist and substantialist assumptions that Whitehead sought to replace Specifically she proposes a thorough revision of accepted interpretations of Whitehead s concept of the actual entity Wallack then elucidates Whitehead s ideas in order of their increasing dependence upon other basic Whiteheadian terms to complete the study of Whiteheadian time and to clarify its purpose within the cosmology of Process and Reality Whitehead s philosophy then emerges as more intelligible and cohesive than is generally believed [The Metaphysics of Becoming](#) Thomas Padiyath,2014-08-22 This study attempts to elucidate a possible meeting point of the traditions of Eastern and Western metaphysical thinking In discussing Whitehead s and Aurobindo s views on being and becoming it seeks the possibility of a better engagement between the East and the West in the light of the philosophical insights It is an initiation into the Sitz im Leben of Whitehead s philosophy and his general thought pattern It carries a perceptive analysis to show the clear primacy of Becoming or Process in Whitehead that extends even to the Divine It also highlights Aurobindo as a unique Indian Philosopher who articulated Indian thought in Western categories He was able to integrate the evolutionary theory of the West with the Indian understanding of becoming The relationship between God and Creativity and Sachchidananda and the Supermind is studied within the context of Enlightenment and Modernity and the way of doing philosophy in the West and in the East **Handbook of Whiteheadian Process Thought** Michel Weber,2013-04-30 Gathering 115 entries written by 101 internationally renowned experts in their fields the Handbook of Whiteheadian Process Thought aims at canvassing the current state of knowledge in Whiteheadian scholarship and at identifying promising directions for future investigations through internal cross elucidation and external interdisciplinary development Two kinds of entries are weaved together in order to interpret Whitehead secundum Whitehead and to read him from the vantage point of interdisciplinary and crossdisciplinary research The thematic entries provide i a broad contextualisation of the issue at stake ii a focus on Whitehead s treatment if any or of a possible Whiteheadian treatment of the issue iii a history of relevant scholarship iv a personal assessment by the Author The biographical entries provide i a brief vita of the targeted thinker ii a sketch of his/her categories relevant to the Whiteheadian scholarship iii a personal assessment of the actual or possible Whiteheadian semantic transfer to or from the thinker *Dictionary of World Philosophy* A. Propositions in the Making Roland Faber, Michael Halewood, Andrew M. Davis, 2019-11-13 How do we make ourselves a Whiteheadian proposition This question exposes the multivalent connections between postmodern thought and Whitehead's philosophy with particular attention to his understanding of propositions Edited by Roland Faber Michael Halewood and Andrew M Davis *Propositions in the Making* articulates the newest reaches of Whiteheadian propositions for a postmodern world It does so by activating interdisciplinary lures of feeling living and co creating the world anew Rather than a logical assertion Whitehead described a proposition as a lure for feeling for a collectivity to come It cannot be reduced to the verbal content of logical justifications but rather the feeling content of aesthetic valuations In creatively expressing these propositions in wide relevance to existential ethical educational theological aesthetic technological and societal concerns the contributors to this volume enact nothing short of a Whiteheadian Laboratory

The History of Continua Stewart Shapiro, Geoffrey Hellman, 2020-12-01 Mathematical and philosophical thought about continuity has changed considerably over the ages Aristotle insisted that continuous substances are not composed of points and that they can only be divided into parts potentially There is something viscous about the continuous It is a unified whole This is in stark contrast with the prevailing contemporary account which takes a continuum to be composed of an uncountably infinite set of points This volume presents a collective study of key ideas and debates within this history The opening chapters focus on the ancient world covering the pre Socratics Plato Aristotle and Alexander The treatment of the medieval period focuses on a relatively recently discovered manuscript by Bradwardine and its relation to medieval views before during and after Bradwardine's time In the so called early modern period mathematicians developed the calculus and with that the rise of infinitesimal techniques thus transforming the notion of continuity The main figures treated here include Galileo Cavalieri Leibniz and Kant In the early part of the nineteenth century Bolzano was one of the first important mathematicians and philosophers to insist that continua are composed of points and he made a heroic attempt to come to grips with the underlying issues concerning the infinite The two figures most responsible for the contemporary orthodoxy regarding continuity are Cantor and Dedekind Each is treated in an article investigating their precursors and influences in both mathematics and philosophy A new chapter then provides a lucid analysis of the work of the mathematician Paul Du Bois Reymond to argue for a constructive account of continuity in opposition to the dominant Dedekind Cantor account This leads to consideration of the contributions of Weyl Brouwer and Peirce who once dubbed the notion of continuity the master key which unlocks the arcana of philosophy And we see that later in the twentieth century Whitehead presented a point free or gunky account of continuity showing how to recover points as a kind of extensive abstraction The final four chapters each focus on a more or less contemporary take on continuity that is outside the Dedekind Cantor hegemony a predicative approach accounts that do not take continua to be composed of points constructive

approaches and non Archimedean accounts that make essential use of infinitesimals

Reconstruction of Thinking

Robert Cummings Neville, 1981-06-30 The Renaissance development of science fulfilled the ancient ideal of integrating quantitative and qualitative thinking but failed to recognize valuational thinking and thus deprived moral aesthetic and political thought of cognitive status The task of this book is to reconstruct the concept of thinking in order to exhibit valuation not reason as the foundation for thinking and to integrate valuational with quantitative and qualitative modes Part I explains the broad thesis interpreting the problem of the foundations for thinking and providing a general theory of value Part II explains the role of valuation at the imaginative level of thinking with discussions of synthesis perception form and art The method of reconstruction requires a cosmology that is generated in successive waves

The Becoming of God Roland Faber, 2017-04-06 How should we believe in God today If we look beyond our little lives to the vast cosmos we may even ask Why all that And even if we spiritually feel the universe Why believe any religion After all there are many and haven't they contributed to the predicament of humanity Process theology gives provocative answers to these questions how we are bound by the organic cycles of this world but how in this web of life God shines even in the least and forgotten event as the Eros of its becoming and as its mirror of greatness why anything exists because it is from beauty for harmony and intensity and through a consciousness of peace rising from our deepest intuitions of existence We can change not only in our thoughts and lives but even in the way we experience this world This book introduces such a new way of experiencing thinking and living Based on the fascinating work on cosmology religion and civilization of Alfred North

Whitehead this book develops the main theses of process theology and elucidates it as a theopoetics of mutual care for the unexpected the excluded the forgotten and a future society of peace **A Process Spirituality** Sheri D. Kling, 2020-07-08

American culture is in a state of critical fragmentation The author argues that we will solve neither the ecological crisis nor our social estrangement from each until we transform our perception of life as embodied and interconnected and rediscover what is sacred through transformative lived experiences of wholeness Using an embodied theological framework supported by comparative hermeneutical and constructive methodologies A Process Spirituality synthesizes theoretical empirical and practical resources to construct a hopeful and holistic understanding of God the world and the self Interweaving Alfred North Whitehead's vision of a relational cosmos with Carl Gustav Jung's integrated relational psyche and a powerful spiritual praxis of dream work creates a generative matrix through which to perceive a God world reality characterized by value relationality and transformation in which individuals matter belong and can experience positive change Such a Christian and transreligious vision of hope offers individuals the possibility and capacity to move from a state of fragmentation to one of psycho spiritual wholeness and flourishing Butler on Whitehead Roland Faber, Michael Halewood, Deena Lin, 2012-03-22
