Index-catalogue of the Library of the Surgeon-General's Office, United States Army National Library of Medicine (U.S.),1925 The Philosophy of Food David M. Kaplan,2012-01-07 This book explores food from a philosophical perspective bringing together leading philosophers to consider the most basic questions about food Each essay analyses many contemporary debates in food studies Slow Food sustainability food safety and politics and addresses such issues as happy meat aquaculture veganism and table manners *Metaphysical Singularity* Mustafa KARNAS, The mind is not a system connected to this world but the mind lives under the influence and influence of this universe These too may differ from the way in which large mind bounded minds are under the influence of these fluctuations but the knowledge of the mind as a whole never changes not redesigned the creatures under the influence of this mental oscillation as AVATARS live the reality where the fluctuations happen This situation can be described as follows it is not the wind itself but the ability to feel its effect Although the same wind blowing in half open window or in the middle of a hill Those affected by these winds are affected by the location where they are located Consciousness the mind is only knowledge that knowledge does not belong to this one but it has fallen upon this universe because it is both influenced and influenced by this universe the creatures that come into contact with this mind they feel alive they are not alive at all nothing else it is nothing but the movement of energy that makes life possible Whoever recognizes this is no other than the mind because the only witness is the mind defines the movement of mind and says living Therefore in this phase it does not arise from mortality it is caused by the fact that there is no touch point for the mind that is the person who is rotten is not in the space existing A dead person means that the microorganisms that make up that person are separated from the protocols and disperse which destroys the existing structure and the mind does not exist as a whole but the mind is no longer for that person but the experiences gained from that person We know that information exists in the form of information modeling through other AVATARS That person is still alive but it is a new structure that is shaped by the combination of information that other AVATARS have made common mind Because if a deceased person can not introduce new experience and knowledge to the system of the Mother Mind it becomes the determinant of the others if the link between this information decreases gradually this structure is absorbed in the grand

system and that information is caught in the wind within the main system the last person who speaks about him Every time we die we are both dead and alive we die because the circle of death comes to the point where we stop DEEP we look DEATH is just a touch This is like connecting a mobile phone to a different Base Station The base station that gives life to the phone is the current one If there is no energy in that station no further energy transfer takes place in the living organism and the person becomes DEATH So life and death are related to CONNECTIONS the attachment causes either the person to live or not to live anymore The mechanism of breathing also tells this LAST BREATH the last move is called REPRESENT In other words the last breath is absolutely given given the last breath the dynamics of nature but the next BEFORE the no more taking a breath PARADIGM changes In this case a person giving LAST BLEED as a paradigm rule continue to take BEFORE elsewhere or if you are unable to breathe in another phase in the present case if you can not take the breath in this case we know that it is necessary to die here in order to continue to live elsewhere or to continue living elsewhere *Index*
