Crumley II, 2016-08-15 This book introduces the central issues of metaphysics and epistemology from skepticism justification and perception to universals personal identity and free will Though topically organized the book integrates positions and examples from the history of philosophy Plato Descartes and Leibniz are discussed alongside Quine Kripke and Haslinger Peripheral ideas and related historical asides are offered in boxes interspersed within the text providing further depth without disrupting the author's lucid explanations of central themes and arguments Original illustrations by Gillian Wilson are included throughout giving interesting and clear visual representations of many of the book's examples and thought experiments *American Book Publishing Record Cumulative, 1950-1977* R.R. Baird, 2003 Walter Kaufmann late of Princeton University Includes bibliographical references v 1 Ancient philosophy v 2 Medieval philosophy v 3 Modern philosophy *The Understanding of Causation and the Production of Action* Peter Anthony White, 2018-10-24 This text is an attempt to trace out a line of development in the understanding of how things happen from

origins in infancy to mature forms in adulthood There are two distinct but related ways in which people understand things as happening denoted by the terms causation and action This book is concerned with both The central claim and organizing principle of the book is that by the end of the second year of life children have differentiated two core theories of how things happen These theories deal with causation and action The two theories have a common point of origin in the infant's experience of producing actions but thereafter diverge both in content and in realm of application Once established the core theories of causation and action never change but form a permanent metaphysical underpinning on which subsequent developments in the understanding of how things happen are erected The story of development is therefore largely the story of how further concepts become attached to integrated with the core theories Although the developmental and adult literatures on causal understanding appear at first glance to have little in common in fact this appearance is illusory and the idea of two theories helps to bring the two literatures in contact with each other The book begins with a survey of the main philosophical ideas about causation and action Following this the possible origins of understanding in infancy are reviewed and separate chapters then deal with the development of understanding of action and causation through childhood This is then linked to the adult understanding of action and causation and the literature on adult causal attribution and causal judgement is reviewed from this perspective

Toponymische Klassifikatoren und der koloniale Blick Jascha de Bloom, 2022-11-21 Obwohl die große Mehrheit der deutschen und schwedischen Kolonialtoponyme einen toponymischen Klassifikator enthält sind diese Elemente

von der vergleichenden Kolonialtoponomastik bisher weitgehend vernachlässigt worden Allerdings zeigt der Vergleich von kolonialen und metropolitanen Klassifikatoren dass selbst diese scheinbar wertneutralen topografischen Umschreibungen durchaus als Träger von kolonialen Gewissheiten auftreten Die Arbeit legt einen wesentlichen Fokus auf deutsche Ortsnamen wobei schwedische Toponyme eine kleinere Vergleichsgruppe bilden Untersucht werden die räumliche Distribution der Klassifikatoren ihre lexikalische Heterogenität ihr morphologischer Komplexitätsgrad sowie die mit ihnen verbundenen natur- bzw kulturellen Implikationen Das Ergebnis der Analyse sind vielfältige statistisch signifikante Unterschiede in der Klassifizierung des europäischen und des außereuropäischen Raums Insgesamt unterstreicht die Arbeit das enorme Potenzial von kolonial-metropolitanen Vergleichsstudien für die Kolonialtoponomastik Die Kommunikation von prokolonialem Wissen stellt eine primäre Funktion von kolonialen Ortsnamen dar deren Relevanz nicht hinter der reinen Referenzleistung zurücksteht
