Metaphysics The Big Questions:

Metaphysics Peter van Inwagen, 2018-05-04 With thoughtful and engaging prose noted scholar Peter van Inwagen provides a comprehensive introduction to metaphysics in this essential text *Metaphysics* covers the gamut of historical and contemporary arguments of metaphysics engaging readers through three profound questions What are the most general features of the world Why is there a world and what is the place of human beings in the world The thoroughly revised fourth edition includes an updated and rewritten chapter on temporality and significant improvements to the clarity and accessibility of the language making it an even more valuable text for undergraduate students *Metaphysics* remains the quintessential book in this field of study and a fascinating book for a wide range of readers from those new to the subject to the most sophisticated philosophers

Metaphysics Peter Van Inwagen, Dean W. Zimmerman, 2008 his extensively revised and expanded edition of van Inwagen and Zimmerman's popular collection of classic and contemporary readings in metaphysics now features twenty two additional selections and new sections on existence and modality the volume poses questions that lead to the deepest issues in traditional metaphysics including problems about the nature of space and time the relationship between body and mind and the freedom of the will With updated commentary from the editors this collection is essential reading for those seeking answers to some of the most puzzling questions about the world and our place in it

Metaphysics Van Inwagen, 2008-02-21 *Meta-metaphysics* Jiri Benovsky, 2016-03-22 Metaphysical theories are beautiful At the end of this book Jiri Benovsky defends the view that metaphysical theories possess aesthetic properties and that these play a crucial role when it comes to theory evaluation and theory choice Before we get there the philosophical path the author proposes to follow starts with three discussions of metaphysical equivalence Benovsky argues that there are cases of metaphysical equivalence cases of partial metaphysical equivalence as well as interesting cases of theories that are not equivalent Thus claims of metaphysical equivalence can only be raised locally The slogan is the best way to do meta metaphysics is to do first level metaphysics To do this work Benovsky focuses on the nature of primitives and on the role they play in each of the theories involved He emphasizes the utmost importance of primitives in the construction of metaphysical theories and in the subsequent evaluation of them He then raises the simple but complicated question how to make a choice between competing metaphysical theories If two theories are equivalent then perhaps we do not need to make a choice But what about all the other cases of non equivalent equally good theories Benovsky uses some of the theories discussed in the first part of the book as examples and examines some traditional meta theoretical criteria for theory choice various kinds of simplicity compatibility with physics compatibility with intuitions explanatory power internal consistency only to show that they do not allow us to make a choice But if the standard meta theoretical criteria cannot help us in deciding between competing non equivalent metaphysical theories how then shall we make that choice This is where Benovsky argues that metaphysical theories possess aesthetic properties grounded in non aesthetic properties and that these play a crucial role in

theory choice and evaluation This view as well as all the meta metaphysical considerations discussed throughout the book then naturally lead the author to a form of anti realism and at the end of the journey he offers reasons to think better of the kind of anti realist view he proposes to embrace www.jiribenovsky.org **Collected Works, Volume I** Adolf

Grünbaum,2013-07-16 Adolf Grünbaum is one of the giants of 20th century philosophy of science This volume is the first of three collecting his most essential and highly influential work The essays collected in this first volume focus on three related areas They discuss scientific rationality the problem of what it takes for a theory to be called scientific and ask whether it is plausible to draw a clear distinction between science and non science as was famously proposed by Karl Popper They delve into the debate between determinism and indeterminism in both science and in the humanities Grünbaum defends the position of the Humane Determinist which then leads to a thorough criticism of the current theological approaches to ethics and morality where Grünbaum defends an explicit Secular Humanism as well as of prominent theistic interpretations of twentieth century physical cosmologies The second volume is devoted to Grünbaum's writings on the Philosophy of Physics and Space Time and the third to his lectures on the Philosophy of Psychology and Psychoanalysis including his 1985 Gifford Lectures which are to be published for the first time **Philosophy's Big Questions** Steven M. Emmanuel,2021-07-27

Certain questions have recurred throughout the history of philosophy They are the big questions about happiness and the good life the limits of knowledge the ultimate structure of reality the nature of consciousness the relation between causality and free will the pervasiveness of suffering and the conditions for a just and flourishing society that thinkers in different cultures across the ages have formulated in their own terms in an attempt to make sense of their lives and the world around them The essays in this book turn to the major figures and texts of the Buddhist tradition in order to expand and enrich our thinking on these enduring questions Examining them from a comparative and cross cultural perspective demonstrates the value of alternative ways of addressing philosophical problems showing how different approaches can produce new and unexpected kinds of questions and answers Engaging with the Buddhist tradition this book shows helps return philosophy to its practical as well as theoretical aim not only understanding the world but also knowing how to live in it Featuring striking and generative comparisons of Buddhist and Western thought Philosophy's Big Questions challenges our thinking in fundamental ways and offers readers new conceptual tools methods and insights for the pursuit of a good and happy life

The Big Questions Nils Ch Rauhut, 2006 Philosophical look at the big questions All the Power in the World Peter Unger, 2007-11-19 This bold and original work of philosophy presents an exciting new picture of concrete reality Peter Unger provocatively breaks with what he terms the conservatism of present day philosophy and returns to central themes from Descartes Locke Berkeley Hume and Russell Wiping the slate clean Unger works from the ground up to formulate a new metaphysic capable of accommodating our distinctly human perspective He proposes a world with inherently powerful particulars of two basic sorts one mental but not physical the other physical but not mental Whether of one sort or the other each individual possesses powers for determining his or her own course as well as powers for interaction with other individuals It is only a purely mental particular an immaterial soul like yourself that is ever fit for real choosing or for conscious experiencing Rigorously reasoning that the only satisfactory metaphysic is one that situates the physical alongside the non physical Unger carefully explains the genesis of and continual interaction of the two sides of our deeply dualistic world Written in an accessible and entertaining style while advancing philosophical scholarship All the Power in the World takes readers on a philosophical journey into the nature of reality In this riveting intellectual adventure Unger reveals the need for an entirely novel approach to the nature of physical reality and shows how this approach can lead to wholly unexpected possibilities including disembodied human existence for billions of years All the Power in the World returns philosophy to its most ambitious roots in its fearless attempt to answer profoundly difficult human questions about ourselves and our world

Aquinas and the Ship of Theseus

Christopher M. Brown, 2005-05-15 Thomas Aquinas has always been viewed as a highly important figure in Western Civilization and the chief philosopher of Roman Catholicism. In recent decades there has been a renewed interest in Aquinas' thought as scholars have been exploring the relevance of his thought to contemporary philosophical problems. The book will be of interest not only to historians of medieval philosophy but to philosophers who work on problems associated with the nature of material objects. Because human beings are typically understood to be a kind of material object, the book will also be of interest to philosophers working on topics in the philosophy of religion, philosophy of mind, and the philosophy of human nature. Although the work contains the kinds of details that are necessary for a work of historical scholarship, it is written in a manner that makes it approachable for undergraduate students in philosophy, and so it would be a welcomed addition to any university library.

The State and the Self Maren Behrensen, 2017-11-01 In this fascinating and timely book, Maren Behrensen facilitates a conversation between philosophy and the practitioners of identity. What makes a person the same person over time? This question has been studied throughout the history of philosophy. Yet philosophers have never fully engaged with the practitioners of identity: namely, technology developers, lawyers, politicians, sociologists, and applied ethicists. The book offers an answer to the metaphysical question of personal identity and tries to show how this question is of immediate relevance to the various practices of identity management, particularly in the fields of administration, counterterrorism activities, and gender reassignment. Behrensen argues that identity documents and other markers of identity, such as biometric samples, are not merely representations of but actually help constitute personal identity. The metaphysical fact of personal identity lies in these supposedly external features. The book goes on to focus on issues relating to trust and security, terms central to the ethics of new technologies and in work on new identity management technologies.

Jesus the Great Philosopher Jonathan T. Pennington, 2020-10-20 Many of us tend to live as though Jesus represents the spiritual part of our lives. We don't clearly see how he relates to the rest of our experiences, desires, and habits. How can Jesus, the Bible, and Christianity become more than a compartmentalized part of our lives? Highly regarded New Testament scholar and popular teacher Jonathan Pennington argues that we need to recover the lost biblical image of Jesus as the one true philosopher who teaches us how to experience the fullness of our humanity in the kingdom of God. Jesus teaches us what is good, right, and beautiful, and offers answers to life's big questions: what it means to be human, how to be happy, how to order our emotions, and how we should conduct our relationships. This book brings Jesus and Christianity into dialogue with the ancient philosophers who asked the same big questions about finding meaningful happiness. It helps us rediscover biblical Christianity as a whole-life philosophy, one that addresses our greatest human questions and helps us live meaningful and flourishing lives.

selections Discovering Dune Dominic J. Nardi, N. Trevor Brierly, 2022-08-18 Frank Herbert's Dune is one of the most well known science fiction novels of all time and it is often revered alongside time honored classics like The Lord of the Rings. Unlike Tolkien's work the Dune series has received remarkably little academic attention. This collection includes fourteen new essays from various academic disciplines including philosophy, political science, disability studies, Islamic theology, environmental studies, and Byzantine history that examine all six of Herbert's Dune books. As a compendium it asserts that a multidisciplinary approach to the texts can lead to fresh discoveries. Also included in this collection are an introduction by Tim O'Reilly who authored one of the first critical appraisals of Herbert's writings in 1981 and a comprehensive bibliography of essential primary and secondary sources.

Plato's Sun Andrew Lawless, 2005-12-15 Writing an introductory text for philosophy is an exceedingly difficult task. The discipline has spent a century or more in existential crisis with the attack on metaphysics dating back at least to Nietzsche and carried forward in different ways by Heidegger, Wittgenstein, and Derrida to name a few. This constant upheaval has precipitated a climate of self-doubt that goes to the core of philosophy, the result being a strange discipline with many of its most illustrious names proudly announcing its demise. In Plato's Sun, Andrew Lawless takes on the challenge of creating an introductory text for philosophy, arguing that such a work has to take into account the strangeness of the field and divulge it rather than suppress it beneath traditional certainties and authoritative pronouncements. Lawless writes within the shadow of post-modern anti-metaphysical skepticism, introducing some of the principal areas of philosophy: metaphysics, epistemology, logic, ethics, and language. Lawless's concern is not to resolve the issues he raises so much as to set them out in a way that lets the reader experience something of the philosopher's struggle. In so doing, Lawless holds fast to the Socratic vision of philosophy as a process of inquiry that values questions above answers, pushing the inquirer beyond his or her answers. With numerous pedagogical features including glossaries of names and key terms, suggested readings, and short chapter summaries, Plato's Sun will be an essential text to new students of philosophy and an important aid in teaching the subject.
