Platonique **Philosophy and Rabbinic Culture** Gregg Stern, 2013-09-05 Philosophy and Rabbinic Culture is a study of the great and curiously underappreciated engagement of a Medieval European Jewish community with the philosophic tradition This lucid description of the Languedocian Jewish community's multigenerational cultivation of and acculturation to scientific and philosophic teachings into Judaism fulfils a major desideratum in Jewish cultural history In the first detailed account of this long forgotten Jewish community and its cultural ideal the author gives an expansive reappraisal of the role of the philosophic interpretation in rabbinic culture and medieval Judaism Looking at how the cultural ideal of Languedocian Jewry continued to develop and flourish throughout the thirteenth and fourteenth centuries with particular reference to the literary style and religious teaching of the great Talmudist Menahem ha Meiri Stern explores issues such as Meiri's theory of civilized religions including Christianity and Islam controversy over philosophy and philosophic allegory in Languedoc and Catalonia and the cultural significance of the medical use of astrological images This book will be of great interest to scholars and students of Religion of Judaism in particular and of Philosophy History and Medieval Europe as well as those interested in Jewish Christian relations **Powers** Julia Jorati, 2021-05-05 Why does a wine glass break when you drop it whereas a steel goblet does not The answer may seem obvious glass unlike steel is fragile This is an explanation in terms of a power or disposition the glass breaks because it possesses a particular power namely fragility Seemingly simple such intrinsic

dispositions or powers have fascinated philosophers for centuries A power's central task is explaining why a thing changes in the ways that it does rather than in other ways powers should explain why an acorn turns into an oak tree not a sunflower or why fire burns wood and wood can catch fire This volume examines the twists and turns of the fascinating history of a difficult philosophical concept focusing on the metaphysical sense of powers that is the powers that are invoked in the explanation of natural changes and activities Scholars probe the views of thinkers from antiquity to the present day Anaxagoras Plato the Stoics Abelard Anselm Henry of Ghent Gottfried Wilhelm Leibniz Margaret Cavendish Mary Shepherd Immanuel Kant Georg Wilhelm Friedrich Hegel and numerous others In addition the volume contains four short reflection essays that examine the concept of powers from the perspective of disciplines other than philosophy namely history of music West African religions history of chemistry and history of art The history of philosophy brims with controversies surrounding the concept of power and these controversies have not diminished particularly as potentialities or powers see a revival in contemporary analytic metaphysics Hence telling the history of philosophical theories of powers means exploring the

trajectory of a concept whose importance to the past and present of philosophy can hardly be overstated **Beasts that Teach, Birds that Tell: Animal Language in Rabbinic and Classical Literatures** Eliezer Segal, 2019 A study of rabbinic texts about talking animals examined in the context of Greek and Roman cultures **The Routledge Companion to Islamic Philosophy** Richard C. discussion of this unduly overlooked commentary whose historical philosophical importance as an attempt to refound Western metaphysics is beginning to be recognized The publication of this volume has received the generous support of the European Research Council ERC under the European Union's Horizon 2020 research and innovation programme through the ERC Consolidator Grant NeoplAT A Comparative Analysis of the Middle East Byzantium and the Latin West 9th-16th Centuries grant agreement No 771640 www.neopl.at/eu the volume displays various aspects of the richness hidden in this Commentary on Proclus the contributions mentioned here are merely representative of such richness Nonetheless a desideratum of the research on Berthold remains a closer analysis of his polemical relations with his still unknown adversaries Giuseppe Thomas Vitale Thomas Institut der Universität zu Köln Recherches de Théologie et Philosophie médiévales 89 (2014) 2

Platonopolis Dominic J. O'Meara, 2003-05 Conventional wisdom suggests that the Platonist philosophers of Late Antiquity from Plotinus third century to the sixth century schools in Athens and Alexandria neglected the political dimension of their Platonic heritage in their concentration on an otherworldly life Dominic O'Meara presents a revelatory reappraisal of these thinkers arguing that their otherworldliness involved rather than excluded political ideas and he proposes for the first time a reconstruction of their political philosophy their conception of the function structure and contents of political science and its relation to political virtue and to the divinization of soul and state Among the topics discussed by O'Meara are philosopher kings and queens political goals and levels of reform law constitutions justice and penology the political function of religion and the limits of political science and action He also explores various reactions to these political ideas in the works of Christian and Islamic writers in particular Eusebius Augustine Pseudo Dionysius and al-Farabi Filling a major gap in our understanding **Platonopolis** will be of substantial interest to scholars and students of ancient philosophy classicists and historians of political thought

Masters of Learned Ignorance: Eriugena, Eckhart, Cusanus Donald F. Duclow,2024-08-01 The medieval Christian West's most radical practitioners of a Neoplatonic negative theology with a mystical focus are John Scotus Eriugena Meister Eckhart and Nicholas Cusanus All three mastered what Cusanus described as *docta ignorantia* reflecting on their awareness that they could know neither God nor the human

mind they worked out endlessly varied attempts to express what cannot be known Following Pseudo Dionysius the Areopagite they sought to name God with symbolic expressions whose negation leads into mystical theology For within their Neoplatonic dialectic negation moves beyond reason and its finite distinctions to intellect where opposites coincide and a vision of God s infinite unity becomes possible In these papers Duclow views these thinkers efforts through the lens of contemporary philosophical hermeneutics He highlights the interplay of creativity symbolic expression and language interpretation and silence as Eriugena Eckhart and Cusanus comment on the mind s work in naming God This work itself becomes mystical theology when negation opens into a silent awareness of God s presence from which the Word once again speaks within the mind and renews the process of creating and interpreting symbols Comparative studies with Gregory of Nyssa Pseudo Dionysius Anselm and Hadewijch suggest the book s wider implications for medieval philosophy and theology

Forming the Mind Henrik Lagerlund, 2007-07-20 This book deals with the internal senses the mind body problem and other problems associated with the concept of mind as it developed from Avicenna to the medical Enlightenment The book collects essays from scholars in this promising field of research It brings together scholars working on the same issues in the Arabic Jewish and Western philosophical traditions This collection opens up new and interesting perspectives
