Metaregression Analysis Issues Of Publication Bias In Economics:

Special Issue: Meta-regression Analysis Colin J. Roberts,T. D. Stanley,2005 *Meta-Regression Analysis* Colin Roberts,T. D. Stanley,2006-01-09 This volume celebrates the innovative and rapidly growing area of economic research known as meta regression analysis MRA Shows how MRA enables researchers to make sense of disparate economic findings on the same subject Develops methods that help researchers to distinguish publication selection from genuine empirical effect Applies these methods to topical areas of economic research including the effect of immigration on wages minimum wage on unemployment and gender on salaries Helps to bridge the gulf between economic theory and practice Written to be accessible to readers with a basic background in empirical economics [Evidence-based Decisions and Economics](#) Ian Shemilt,Miranda Mugford,Luke Vale,Kevin Marsh,Cam Donaldson,2011-09-22 The need for evidence based decisions that take account of both effectiveness and economics is greater now than ever Using case studies and illustrative examples throughout the authors describe how the activities and outputs of evidence synthesis systematic review economic analysis and decision making interact within and across different spheres of health and social policy and practice Expanding on the first edition the book now covers approaches to evidence synthesis that combine economics and systematic review methods in the applied fields of social welfare education and criminal justice as well as health care Written by economists and health services researchers closely involved in developing evidence based policy and practice it showcases current state of the art methodology and will be an invaluable read for all policy makers and practitioners using evidence to inform decisions analysts conducting research to support decisions and students discovering the need for evidence based decisions to incorporate economic perspectives and evidence **Methodological Artefacts, Data Manipulation and Fraud in Economics and Social Science** Andreas Diekmann,2016-11-21 No detailed description available for Methodological Artefacts Data Manipulation and Fraud in Economics and Social Science **Meta-Regression Analysis in Economics and Business** T.D. Stanley,Hristos Doucouliagos,2012-08-21 The purpose of this book is to introduce novice researchers to the tools of meta analysis and meta regression analysis and to summarize the state of the art for existing practitioners Meta regression analysis addresses the rising Tower of Babel that current economics and business research has become Meta analysis is the statistical analysis of previously published or reported research findings on a given hypothesis empirical effect phenomenon or policy intervention It is a systematic review of all the relevant scientific knowledge on a specific subject and is an essential part of the evidence based practice movement in medicine education and the social sciences However research in economics and business is often fundamentally different from what is found in the sciences and thereby requires different methods for its synthesis meta regression analysis This book develops summarizes and applies these meta analytic methods **The Economics of Trade Unions** Hristos Doucouliagos,Richard B. Freeman,Patrice Laroche,2017-02-17 Richard B Freeman and James L Medoff's now classic 1984 book What Do Unions Do stimulated an enormous theoretical and

empirical literature on the economic impact of trade unions Trade unions continue to be a significant feature of many labor markets particularly in developing countries and issues of labor market regulations and labor institutions remain critically important to researchers and policy makers The relations between unions and management can range between cooperation and conflict unions have powerful offsetting wage and non wage effects that economists and other social scientists have long debated Do the benefits of unionism exceed the costs to the economy and society writ large or do the costs exceed the benefits The Economics of Trade Unions offers the first comprehensive review analysis and evaluation of the empirical literature on the microeconomic effects of trade unions using the tools of meta regression analysis to identify and quantify the economic impact of trade unions as well as to correct research design faults the effects of selection bias and model misspecification This volume makes use of a unique dataset of hundreds of empirical studies and their reported estimates of the microeconomic impact of trade unions Written by three authors who have been at the forefront of this research field including the co author of the original volume What Do Unions Do this book offers an overview of a subject that is of huge importance to scholars of labor economics industrial and employee relations and human resource management as well as those with an interest in meta analysis

Heredity, Family, and Inequality Michael Beenstock, 2012 An economist critiques nature versus nurture hypotheses from behavioral genetics developmental psychology sociology and economics Empirical literature in disciplines ranging from behavioral genetics to economics shows that in virtually every aspect of life the outcomes of children are correlated to a greater or lesser extent with the outcomes of their parents and their siblings In Heredity Family and Inequality the economist Michael Beenstock offers theoretical statistical and methodological tools for understanding these correlations Beenstock presents a comprehensive survey of intergenerational and sibling correlations for a broad range of outcomes including fertility and longevity intelligence and education income and consumption and deviancy and religiosity He then offers a critique of the sometimes conflicting explanations for these correlations proposed by social scientists from such disciplines as developmental psychology sociology and economics Beenstock also provides an axiomatic framework for thinking about the complex interplay of heredity family and environments drawing on game theory control theory and econometrics Chapters 1-7 discuss such topics as the important contributions of Francis Galton 1822-1911 to the statistical study of heredity the family as an engine of inequality and diversity and natural experiments designed to identify how environments families peer groups and neighborhoods affect human outcomes Chapters 8-10 present technical material on statistical theoretical and methodological tools used by the earlier chapters Beenstock's goal is not to argue for either nature or nurture but to suggest more rigorous ways to assess the diverse contributions to this lively debate

Research Handbook on Economic Sanctions van Bergeijk, Peter A.G., 2021-12-10 Peter van Bergeijk brings together 40 leading experts from all continents to analyze state of the art data covering the sharp increase in smart sanctions in the last decade Original chapters provide detailed analyses on the determinants of sanction success and failure complemented

with research on the impact of sanctions **Applied Meta-Analysis with R and Stata** Ding-Geng (Din) Chen, Karl E. Peace, 2021-03-30 Review of the First Edition The authors strive to reduce theory to a minimum which makes it a self learning text that is comprehensible for biologists physicians etc who lack an advanced mathematics background Unlike in many other textbooks R is not introduced with meaningless toy examples instead the reader is taken by the hand and shown around some analyses graphics and simulations directly relating to meta analysis A useful hands on guide for practitioners who want to familiarize themselves with the fundamentals of meta analysis and get started without having to plough through theorems and proofs Journal of Applied Statistics Statistical Meta Analysis with R and Stata Second Edition provides a thorough presentation of statistical meta analyses MA with step by step implementations using R Stata The authors develop analysis step by step using appropriate R Stata functions which enables readers to gain an understanding of meta analysis methods and R Stata implementation so that they can use these two popular software packages to analyze their own meta data Each chapter gives examples of real studies compiled from the literature After presenting the data and necessary background for understanding the applications various methods for analyzing meta data are introduced The authors then develop analysis code using the appropriate R Stata packages and functions What's New in the Second Edition Adds Stata programs along with the R programs for meta analysis Updates all the statistical meta analyses with R Stata programs Covers fixed effects and random effects MA meta regression MA with rare event and MA IPD vs MA SS Adds five new chapters on multivariate MA publication bias missing data in MA MA in evaluating diagnostic accuracy and network MA Suitable as a graduate level text for a meta data analysis course the book is also a valuable reference for practitioners and biostatisticians even those with little or no experience in using R or Stata in public health medical research governmental agencies and the pharmaceutical industry *Open Regional Labour Market and Socio-Economic Development. Studies on Adjustment and Spatial Interaction* Simonetta Longhi, 2005 **Post-Keynesian Economics** Lavoie, Marc, 2022-05-13 This visionary Research Handbook presents the state of the art in research on policy design By conceiving policy design both as a theoretical and a methodological framework it provides scholars and practitioners with guidance on understanding policy problems and devising accurate solutions *The Contribution of Human Capital towards Economic Growth in China* John Joshua, 2015-06-30 This book develops a human capital model to explain transformational growth within different stages of economic development which will induce technological changes and consequently will require a change in human capital China is a case study in transition and can provide useful lessons to other emerging economies **Blue Economy and Ocean Sustainable Development in a Globalised World: Social, Political, Economic and Environmental Issues** Ibukun J. Adewumi, Andrei Polejack, Joanna Vince, Maree E. Fudge, 2023-12-05 In the last decade the concept of a Blue Economy has ignited a deep theoretical debate Ranging from the integration of the triple bottom line of sustainability to the optimization of profit from ocean exploitation the meaning of the term blue economy differs considerably between epistemic

communities and even more so among national and regional policies There is a general sense of the opportunity to realise enhanced social and economic benefits from the sustainable utilisation of their ocean and coastal resources under the umbrella framework of blue economy Blue economy is gaining traction already as a significant component of national policies even in spite of a clear conceptualization of the term Many countries are now preparing national policies towards realising their blue economy ambitions utilizing the concept as they see fit Likewise multilateral and regional organisations are developing guidelines and providing investment in new research technologies and financing tools that promote blue economy Critical challenges abound in particular in less privileged countries These include the gap in research capabilities governments prioritizing social wellbeing and economic profit in contrast to environmental protection the identification of new and emerging areas of ocean economic activity that are both socially and ecologically sustainable and holds viable business models that can attract private investment

Quantitative and Applied Research Methodology in Economics

Niranjan Devkota, Sushanta Kumar Mahapatra, 2025-06-06 This book is an illustrative and comprehensive guide designed to help readers understand and navigate the complex world of academic writing and research in economics Written by experienced researchers this book offers theoretical and practical insights into the research process It provides an understanding of the foundations of the research process like research design methodology problem definition data collection and analysis among others The authors also share insights into the process of preparing proofreading and publishing academic papers With their experience in the field of academic research to this book they provide practical examples and step by step guidance to assist in research related issues The section on how to prepare and publish academic papers is a must read for students and early career researchers as it offers valuable guidance on how to succeed in the highly competitive world of academic publishing With its clear and concise writing this book will be an indispensable resource for undergraduate and postgraduate economics students teachers independent readers and early career researchers as well as those seeking a deeper understanding of research methodology in economics

Benford's Law Steven J. Miller, 2015-05-26

Benford's law states that the leading digits of many data sets are not uniformly distributed from one through nine but rather exhibit a profound bias This bias is evident in everything from electricity bills and street addresses to stock prices population numbers mortality rates and the lengths of rivers Here Steven Miller brings together many of the world's leading experts on Benford's law to demonstrate the many useful techniques that arise from the law show how truly multidisciplinary it is and encourage collaboration Beginning with the general theory the contributors explain the prevalence of the bias highlighting explanations for when systems should and should not follow Benford's law and how quickly such behavior sets in They go on to discuss important applications in disciplines ranging from accounting and economics to psychology and the natural sciences The contributors describe how Benford's law has been successfully used to expose fraud in elections medical tests tax filings and financial reports Additionally numerous problems background materials and technical details are available

online to help instructors create courses around the book Emphasizing common challenges and techniques across the disciplines this accessible book shows how Benford's law can serve as a productive meeting ground for researchers and practitioners in diverse fields

Pricing Lives W. Kip Viscusi, 2020-10-06 How society's undervaluing of life puts all of us at risk and the groundbreaking economic measure that can fix it Like it or not sometimes we need to put a monetary value on people's lives In the past government agencies used the financial cost of death to monetize the mortality risks of regulatory policies but this method vastly undervalued life Pricing Lives tells the story of how the government came to adopt an altogether different approach the value of a statistical life or VSL and persuasively shows how its more widespread use could create a safer and more equitable society for everyone In the 1980s W Kip Viscusi used the method to demonstrate that the benefits of requiring businesses to label hazardous chemicals immensely outweighed the costs VSL is the risk reward trade off that people make about their health when considering risky job choices With it Viscusi calculated how much more money workers would demand to take on hazardous jobs boosting calculated benefits by an order of magnitude His current estimate of the value of a statistical life is 10 million In this book Viscusi provides a comprehensive look at all aspects of economic and policy efforts to price lives including controversial topics such as whether older people's lives are worth less and richer people's lives are worth more He explains why corporations need to abandon the misguided cost of death approach how the courts can profit from increased application of VSL in assessing liability and setting damages and how other countries consistently undervalue risks to life Pricing Lives proposes sensible economic guideposts to foster more protective policies and greater levels of safety in the United States and throughout the world

COVID-19 and International Development Elissaios Papyrakis, 2022-01-13 The current coronavirus pandemic fundamentally reshapes existing debates and processes in international development The unprecedented and rapidly evolving crisis is generating a number of substantial challenges for developing economies Governments in low income nations often find it extremely hard to cope with the increased demand for health services make prompt decisions and put them into action protect vulnerable segments of society and offer immediate relief to affected economic sectors This book provides a series of reflective chapters that demonstrate how several areas of international development have been severely affected by the Covid 19 outbreak It provides an in depth critical discussion on how the current pandemic influences several development outcomes in the domains of poverty inequality health education migration formal informal employment de globalisation the extractive sector climate change water and the global financial system Each chapter draws policy recommendations on relevant interventions that can alleviate the identified negative repercussions of the Covid 19 pandemic especially for the most vulnerable communities in the Global South

Statistical Topics in Health Economics and Outcomes Research Demissie Alemayehu, Joseph C. Cappelleri, Birol Emir, Kelly H. Zou, 2017-11-22 With ever rising healthcare costs evidence generation through Health Economics and Outcomes Research HEOR plays an increasingly important role in decision making about the allocation of

resources Accordingly it is now customary for health technology assessment and reimbursement agencies to request for HEOR evidence in addition to data from clinical trials to inform decisions about patient access to new treatment options While there is a great deal of literature on HEOR there is a need for a volume that presents a coherent and unified review of the major issues that arise in application especially from a statistical perspective *Statistical Topics in Health Economics and Outcomes Research* fulfils that need by presenting an overview of the key analytical issues and best practice Special attention is paid to key assumptions and other salient features of statistical methods customarily used in the area and appropriate and relatively comprehensive references are made to emerging trends The content of the book is purposefully designed to be accessible to readers with basic quantitative backgrounds while providing an in depth coverage of relatively complex statistical issues The book will make a very useful reference for researchers in the pharmaceutical industry academia and research institutions involved with HEOR studies The targeted readers may include statisticians data scientists epidemiologists outcomes researchers health economists and healthcare policy and decision makers *Comparative Environmental Economic Assessment* R. J. G. M. Florax, Peter Nijkamp, Kenneth George Willis, 2002-09-26 Over the last decade economists have increasingly recognized the role of meta analysis and value transfer in synthesizing knowledge and efficiently exploiting the existing pool of knowledge *Comparative Environmental Economic Assessment* explores the potential significance of using these techniques particularly in environmental economics Both meta analysis and value transfer constitute major research tools which efficiently use knowledge previously acquired from other studies The book focuses on the potential role and usefulness of these tools in environmental economic research and goes on to address their validity relevance and applicability A future agenda for research is also illustrated *Elgar Encyclopedia of Behavioural and Experimental Economics* Swee-Hoon Chuah, Robert Hoffmann, Ananta Neelim, 2025-02-12 This Encyclopedia presents a comprehensive account of the complementary forces of behavioural economics a novel field combining psychological insights with analytical economic thinking and experimental economics
