Method In Metaphysics:

Method in Metaphysics Andrew Beards, 2008-02-16 In the last few decades analytical philosophers have rediscovered an interest in the subject of metaphysics Surveying the contributions made by these philosophers *Method in Metaphysics* initiates a critical dialogue between analytical metaphysics and the philosophy of Bernard Lonergan It argues for a basic method in metaphysics a method that arises from a critically grounded epistemology and cognitional theory In addition it serves as a much needed overview and introduction to current trends in analytical metaphysics Andrew Beards shows how Lonergan's philosophy can help to clarify not only particular issues in current debates but also the larger question of a basic method He goes on to apply this method to topics at the forefront of discussions in contemporary philosophy topics such as universals tropes events causality and the metaphysics of the self and the social While the main focus of the study is on Lonergan and analytical philosophy Beards also introduces the philosophies of Whitehead Husserl and Derrida into the debate He brings Lonergan's critical realist philosophy into finely textured dialogue with a number of well known contemporary metaphysicians such as Dummett Putnam Lewis and Kripke Method and Metaphysics Jonathan Barnes, 2011-10-06 *Method and Metaphysics* presents twenty six essays in ancient philosophy by Jonathan Barnes one of the most admired and influential scholars of his generation The essays span four decades of his career and are drawn from a wide variety of sources many of them will be relatively unknown even to specialists in ancient philosophy Several essays are now translated from the original French and made available in English for the first time others have been substantially revised for republication here The volume opens with eight essays about the interpretation of ancient philosophical texts and about the relationship between philosophy and its history The next five essays examine the methods of ancient philosophers The third section comprises thirteen essays about metaphysical topics from the Presocratics to the late Platonists This collection will be a rich feast for students and scholars of ancient philosophy **Method in Metaphysics** Robert J. Henle, 1980 **Method in Metaphysics** Robert J. Henle, 1951 Aristotle on Method and Metaphysics E. Feser, 2013-07-12 *Aristotle on Method and Metaphysics* is a collection of new and cutting edge essays by prominent Aristotelian scholars and Aristotelian philosophers on themes in ontology causation modality essentialism the metaphysics of life natural theology and scientific and philosophical methodology *Methods of Metaphysics* Alan White, 2019-03-06 Originally published in 1987 This book comprises a critical exposition of the thoughts on metaphysics of the major philosophers of the tradition It introduces the ideas of these philosophers to students but is of interest to teachers as well The author begins with a survey of the metaphysical writings of Plato Aristotle Berkeley Leibniz and Bradley clarifying throughout the relation of their methods and results to those of science He follows this with a careful study of the critical attitudes to metaphysics espoused by Kant Wittgenstein and the Logical Positivists In the final section he scrutinizes the attempts by Collingwood Wisdom and Lazerowitz to rehabilitate metaphysics Method in Metaphysics Robert John Henle, 2011-10-01 Methods

in the Philosophy of Science Sophie J Veigl, Adrian Currie, 2025-07-15 A guidebook to methods and methodology encouraging deeper engagement across the philosophy of science and beyond The last twenty years have seen multiple methodological revolutions in the philosophy of science There has been increased diversity concerning the questions asked who asks those questions who the relevant audiences are and what the techniques and tools involved are In *Methods in the Philosophy of Science A User's Guide* Sophie Veigl and Adrian Currie introduce this range of methods through both practical advice and philosophical reflection Each chapter introduces the reader to a method or set of methods in the philosophy of science discusses its advantages and limitations and provides practical guidance on how to learn skills relevant to applying the method The volume fulfills several critical roles First by introducing and discussing methods in the philosophy of science the collection increases philosophers awareness of methodological options of particular importance for younger scholars who are often not exposed to the diversity of practice Second the collection's practical focus will aid established philosophers in diversifying their own methodological toolkits Third collecting this diversity serves as a ground for philosophical reflection on what we as philosophers take ourselves to be capable of Fourth the collection hopes to increase interdisciplinary links between philosophy and other fields by laying clear the methodological continuity and complement between them

The method of science and its application to metaphysics. The rules of philosophising. Psychological principles. The limitations of knowledge George Henry Lewes, 1874 **Elements of Metaphysics** Alfred Edward Taylor, 1903 **The System of the Sciences According to Objects and Methods** Paul Tillich, 1981 **Methodology, Metaphysics and the History of Science** Robert S. Cohen, Marx W. Wartofsky, 2012-12-06 This selection of papers that were presented or nearly so to the Boston Colloquium for the Philosophy of Science during the seventies fairly re presents some of the most disturbing issues of scientific knowledge in these years To the distant observer it may seem that the defense of rational standards objective reference methodical self correction even the distinguishing of the foolish from the sensible and the truth seeking from the ideological has nearly collapsed In fact the defense may be seen to have shifted the knowledge business came under scrutiny decades ago and indeed from the time of Francis Bacon and even far earlier the practicality of the discovery of knowledge was either hailed or lamented So the defense may be founded on the premise that science may yet be liberating In that case the analysis of philosophical issues expands to embrace issues of social interest and social function of instrumentality and arbitrary perspective of biological constraints upon knowledge as well as upon the species wide behavior of human beings in other relationships too of distortions due to explanatory metaphors and imposed categories and of radical comparisons among the perspectives of different civilizations Some of our contributors are frankly programmatic showing how problems must be formulated afresh how evasions must be identified and omissions rectified but they do not reach their own completion

G. Collingwood, James

Connelly, Giuseppina D'Oro, 2005-05-12 An Essay on Philosophical Method contains the most sustained discussion in the twentieth century of the subject matter and method of philosophy and an unparalleled explanation of why philosophy has a distinctive domain of enquiry that differs from that of the sciences of nature This new edition of the Essay focuses on Collingwood's contribution to metaphilosophy and locates his argument for the autonomy of philosophy against the twentieth century trend to naturalize its subject matter Collingwood argues that the distinctions which philosophers make for example between the concepts of duty and utility in moral philosophy or between the concepts of mind and body in the philosophy of mind are not empirical taxonomies that cut nature at the joints but semantic distinctions to which there may correspond no empirical classes This identification of philosophical distinctions with semantic distinctions provides the basis for an argument against the naturalization of the subject matter of philosophy for it entails that not all concepts are empirical concepts and not all classifications are empirical classifications Collingwood's explanation of why philosophy has a distinctive subject matter thus constitutes a clear challenge to the project of radical empiricism Book cover **God in Process**

Thought S. Sia, 2012-12-06 One of the controversial issues which have recently come into prominence among philosophers and theologians is how one should understand the term 1 God It seems that despite the fact that a certain idea of God is assumed by not most people there is a degree of disagreement over the meaning many if of the term God is generally taken to refer to a supreme Being the Creator who is perfect and self-existent holy personal and loving This understanding of God corresponds to what many have either been brought up to believe in or have come to accept as the meaning of this word Nevertheless theists appear to be defending a particular idea of God and to be accusing atheists of attacking another one which does not tie in with the theistic interpretation Cardinal Maximus IV for instance is quoted as saying The God the atheists don't believe in is a God I don't believe in either 2 On the other hand atheists have been challenging believers to

explain clearly what they mean by God because these critics cannot see how that idea can have any acceptable meaning Furthermore theists themselves seem to be divided over the issue H P Owen in his book Concepts of Deity shows quite convincingly that there is a bewildering variety of concepts of God among theists One has only to ask around for confirmation of this observation The Catholic Encyclopedia: Mass-Newman ,1913 **The Metaphysical Foundations of Modern Physical Science** Edwin Arthur Burtt,1927 **The Journal of Philosophy, Psychology and Scientific Methods** ,1920
