Methodologies Of Positivism And Marxism A Sociological Debate:

The Methodologies of Positivism and Marxism Norma R.A. Romm,1991-06-18 Focusing on the methodological principles which underlie sociologists study of social reality this text offers clarification and outlines how the different approaches to study originate from various methodological and philosophical traditions **Critical Theory and**

Methodology Raymond A. Morrow,Raymond Allen Morrow,David D. Brown,1994-06-24 Critical Theory traces its roots from Marxism through the renowned Frankfurt School to a wide array of national and cultural traditions Raymond Morrow s book traces the history and outlines the major tenets of critical theory for an undergraduate audience He exemplifies the theory through an analysis of two leading social theorists J um urgen Habermas and Anthony Giddens Unique to this volume is the emphasis on the link between Critical Theory and empirical research and social science methodology often thought to be incompatible **Conceptions of Social Inquiry** J. J. Snyman,1993 *Mixed Methods and Cross Disciplinary Research*

Janet McIntyre-Mills,Norma R. A. Romm,2019-07-12 This book uses mixed methods to extend the concept of wellbeing stocks to refer to dynamic ways of working with others It addresses metaphors and praxis for weaving together strands of experience The aim of the wellbeing stocks concept is to enable people to re evaluate economics and to become more aware of the way in which we neglect social and environmental aspects of life The pursuit of profit at the expense of people and the environment is a central problem for democracy and governance The vulnerability of cities is a symptom of the lack of balance between individual and collective needs This book explores the potential for cities specifically in the regions of Indonesia Africa and Australia to become more productive as sites for food and water security through more creative use of technology It highlights the need for partners that see food and security feasible at the household level if supports are provided at the community national and international level The book examines how these regions are affected by demographics climate change and people movements but also explores ways to establish an effective cultural ecosystem management **Accountability in Social Research** Norma Romm,2007-05-08 In this book I have concentrated on drawing

attention to various conceptions of accountability that might be brought to bear in judging the practice of social research Much of the book is organized around making explicit the assumptions that influence what counts as proper research in society including assumptions about how social inquirers might be held accountable My focus is on reviewing discourses around the practice of professional inquiry with a view to reconsidering the way in which people create expectations for accountable social inquiry My focus hereon is related to my concern that the manner in which judgments about researchers accountability are made is not without social consequences for our way of living in society I have approached the issues by beginning with a discussion of tenets of the position called positivism so named by certain proponents and by considering the view on accountability that is implied by adherence to these tenets Briefly expressed positivist argumentation suggests that researchers are required to do science in a manner that warrants their being considered indeed scientists I use my

discussion of accountability as seen within positivist argumentation to explicate ways in which alternative positions have arisen as ways of treating accountability issues Through my way of comparing the various positions I hope to provide some indication of the complexity of ethical and accountability issues in social inquiry

Social Science Gerard Delanty, 1997 It is argued that the conception of social science emerging today is one that involves a synthesis of radical constructivism and critical realism The crucial challenge facing social science is a question of its public role growing reflexivity in society has implications for the social production of knowledge and is bringing into question the separation of expert systems from other forms of knowledge

Social Science Delanty, Gerard, 2005-06-01 What is social science Does social scientific knowledge differ from other kinds of knowledge such as the natural sciences and common sense What is the relation between method and knowledge This concise and accessible book provides a critical discussion and comprehensive overview of the major philosophical debates on the methodological foundations of the social sciences From its origins in the sixteenth century when a new system of knowledge was created around the idea of modernity the author shows how the philosophy of social science developed as a reflection on some of the central questions in modernity Visions of modernity have been reflected in the self understanding of the social sciences From the positivist dispute on explanation vs understanding to controversies about standpoint to debates about constructivism and realism Delanty outlines the major shifts in the philosophy of social science He argues that social science is an intellectual framework for the transformation of the social world The new edition is updated and expanded throughout with the latest developments in the field including a new chapter on feminist standpoint epistemology and additional material on neo positivism pragmatism and reflexivity This is one of the most ambitious and wide ranging texts in recent years on debates on method and the contemporary situation of social science It is of interest to undergraduate students and postgraduates as well as to professional researchers with an interest in the philosophy of the social sciences and social theory

Philosophical Issues In Information Systems R L Winder, S K Probert, I. A. Beeson, 2024-11-01 This ground breaking book represents the work of a variety of researchers in

information systems that share a common concern to use philosophical approaches to help solve problems in information systems. It brings together many of the leading researchers in the field and provides a broad based range of chapters addressing key contemporary issues in the field. It looks at philosophical and social implications of the development of IS, relates these issues to the role IS plays in contemporary business and cultural theory and discusses IS in a social and philosophical context rather than simply as technology.

Advanced Geography Through Diagrams Garrett Nagle, Kris Spencer, 1998. This text is part of the Oxford Revision Guides series. These are reissues of the two series GCSE Revise Through Diagrams and Advanced Revision Handbooks now combined with newly branded covers. The GCSE titles have extra 16 page sections on revision techniques and sample questions for the new GCSE syllabuses first examined in June 1998. The A level titles just have new covers but will be revised in 1999 for the new A level syllabuses. This book covers the A level geography syllabus and uses diagrams and concise notes to help students revise.

Sociology in Perspective Mark Kirby, 2000. This text specifically for AQA specifications is designed to be easy and encouraging for students to use. The book contains updated material and activities together with a new chapter on study skills. It also indicates clearly where activities meet the new evidence requirements for key skills.

Research Methods in the Social Sciences Jean-Frédéric Morin, Christian Olsson, Ece Özlem Atikcan, 2021. Research Methods in the Social Sciences is a comprehensive yet compact A-Z for undergraduate and postgraduate students undertaking research across the social sciences featuring 71 entries that cover a wide range of concepts, methods and theories. Each entry begins with an accessible introduction to a method using real world examples from a wide range of academic disciplines before discussing the benefits and limitations of the approach, its current status in academic practice and finally providing tips and advice for readers on when and how to apply the method in their own research. Wide ranging and interdisciplinary, the text covers both well established concepts and emerging ideas such as big data and network analysis for qualitative and quantitative research methods. All entries feature extensive cross referencing providing ease of navigation and pointing readers to related concepts and to help build their overall understanding of research methods.

Systems Science Frank A. Stowell, Daune West, James G. Howell, 2012-12-06. As we approach the end of the 20th century we can look back upon the achievements that have been made in a variety of human endeavours with pride. Enormous strides have been made to improve the quality of life of millions of people through the application of the scientific discoveries made during this and past centuries. The 20th century will be remembered as much for the mass exploitation of scientific discovery as for the discoveries themselves. The technological age has meant that the human being is able to contemplate activities which defy nature. For example, some of the work involved in the preparation of these proceedings has been done whilst travelling at over 500 miles per hour, seven miles above the surface of the earth. It is not difficult to conjecture about the effect that this relatively recent technology has had upon a number of systems. Air transportation has provided a number of benefits including such disparate examples such as enabling holidays, famine relief

and the cross fertilisation of cultural practices from other lands Equally there have been undesirable effects such as enabling the means of mass destruction interference in other cultures and the speedy transportation of disease Moreover the physical presence of the aeroplane itself represents the consumption of fossil fuels a source of pollution and a change in the way think about life The view expressed here is of course the view of an inhabitant of the western world An Introduction to the Philosophy of Methodology Kerry E Howell,2012-11-13 This book provides students with a concise introduction to the philosophy of methodology The book stands apart from existing methodology texts by clarifying in a student friendly and engaging way distinctions between philosophical positions paradigms of inquiry methodology and methods Building an understanding of the relationships and distinctions between philosophical positions and paradigms is an essential part of the research process and integral to deploying the methodology and methods best suited for a research project thesis or dissertation Aided throughout by definition boxes examples and exercises for students the book covers topics such as Positivism and Post positivism Phenomenology Critical Theory Constructivism and Participatory Paradigms Post Modernism and Post Structuralism Ethnography Grounded Theory Hermeneutics Foucault and Discourse This text is aimed at final year undergraduates and post graduate research students For more experienced researchers developing mixed methodological approaches it can provide a greater understanding of underlying issues relating to unfamiliar techniques Philosophies of Social Science Gerard Delanty,Piet Strydom,2003-04 This is a collection of extracts from classic works on the philosophy of social science highlighting the work of many influential authors who have shaped social science *Research Methodologies and Methods* Mr. Rohit Manglik,2024-03-12 EduGorilla Publication is a trusted name in the education sector committed to empowering learners with high quality study materials and resources Specializing in competitive exams and academic support EduGorilla provides comprehensive and well structured content tailored to meet the needs of students across various streams and levels People's Education in Theoretical Perspective Veronica I. McKay,1992 *The Sage Encyclopedia of Qualitative Research Methods: A-L ; Vol. 2, M-Z Index* Lisa M. Given,2008-08-21 An encyclopedia about various methods of qualitative research Sociology, Phenomenology and Marxian Analysis Barry Smart,2013-10-15 Sociology is an established academic discipline but there has been continuing debate over its status as a science and the nature of its subject matter This led to the emergence of a phenomenological sociology and to critiques of positivist sociology This critical reappraisal of the relevance of Marxian analysis for a science of society shows how these developments within sociology have had their counterpart in Marxism The author analyses the status of Marx s work and the Marxist tradition in sociology He focuses upon those concerns which are common to both Marxian analysis and sociology the question of subjectivity the nature of social reality and the dialectical relationship of the doing or practice of a science of society to the social world within which such social analyses are situated Originally published in 1976
