Conceptual Modeling for New Information Systems Technologies Hiroshi Arisawa, Yahiko Kambayashi, 2003-08-06

The objective of the workshops associated with ER 2001, the 20th International Conference on Conceptual Modeling, was to give participants the opportunity to present and discuss emerging hot topics, thus adding new perspectives to conceptual modeling. This, the 20th ER conference, the first of the 21st century, was also the first one in Japan. The conference was held on November 27-30, 2001, at Yokohama National University with 192 participants from 31 countries. ER 2001 encompasses the entire spectrum of conceptual modeling from theoretical aspects to implementations, including fundamentals, applications and software engineering. In particular, ER 2001 emphasized e-business and reengineering. To meet this objective, we selected the following four topics and planned four international workshops: International Workshop on Conceptual Modeling of Human Organizational Social Aspects of Manufacturing Activities (HUMACS 2001). Manufacturing enterprises have to confront a host of demands. The competitive climate, enhanced by communication and knowledge sharing, will require increasingly rapid responses to market forces. Customer demands for higher quality, better services and lower cost will force manufacturers to reach new levels of flexibility and adaptability. Sophisticated customers will demand products customized to meet their needs. Industries have so far sought to cope with these challenges primarily through advances in traditional capital by installing more powerful hardware and software technology. Attention to the role of humans, combined with organizational and social schemes in manufacturing, has only been marginal. The workshop HUMACS 2001 aimed to challenge the relevance of this last point.

Languages, Methodologies, and Development Tools for Multi-Agent Systems Mehdi Dastani, Amal El Fallah Seghrouchni, Jomi Hübner, Joao Leite, 2011-09-06

This book constitutes the thoroughly refereed post-workshop proceedings of the Third International Workshop on Languages, Methodologies, and Development Tools for Multi-Agent Systems (LADS 2010) held in Lyon, France, in August-September 2010, as part of MALLOW, a federation of workshops on Multi-Agent Logics, Languages, and Organizations. The 8 revised full papers presented were carefully selected during two rounds of reviews from 11 initial submissions. The papers address issues related to theories, methodologies, models, and approaches that are needed to facilitate the development of multi-agent systems, ensuring their predictability and verification.
