Mixed Messages Ampolitics Intlorgan:

Slogan Politics Jinghan Zeng, 2020-07-20 This book studies the three most important Chinese foreign policy concepts under Xi Jinping's leadership: New Type of Great Power Relations, Belt and Road Initiative, and Community of Shared Future for Mankind. Those signature concepts are often considered as China's well-thought-out strategic plans reflecting Beijing's concrete geopolitical vision. This book, however, argues that these views are mistaken. It develops a slogan politics approach to study Chinese foreign policy concepts. The overarching argument is that those concepts should be understood as multifunctional slogans for political communication on the domestic and international stages. This book shows how those concepts function as political slogans to 1) declare intent, 2) assert power and test domestic and international support, 3) promote state propaganda, and 4) call for intellectual support. The slogan politics approach highlights the critical role of China's academic and local actors, as well as international actors, in shaping China's foreign policy ideas. It provides critical insights to understand how Chinese domestic actors exert their influence and voice their narratives to influence China's policy agenda and debate. It suggests that the existing analyses vastly exaggerate Beijing's capacity to coordinate domestic actors, including forging coherent Chinese foreign policy narratives and unifying use of China's policy concepts. **Ethical Data**

Chronicles of Care: A Design History of the COVID-19 Virus Paul A. Rodgers, Fernando Galdon, Craig Bremner, 2024-04-16 The Covid 19 crisis and the designed interventions that the authors have catalogued in this book prove definitively that design does care The authors documented this as it evolved every day from the 1st January 2020 to 31st May 2020 inclusive Then they looked at all of this care and caring from the point of view of design and by the sheer volume of design interventions they have documented illustrate that design is good in a crisis What

the Covid 19 pandemic illustrated is that for the first time in modern history capital was totally irrelevant Money could not save your life Only design could Rapidly designed masks shelters hospitals instructional posters infographics dashboards respirators sanitisers virtual and local communities emerged to save us From January 2020 design became king The Covid 19 global pandemic presented an ontological reality design is more than margins or profit In fact design became extremely valuable when it stopped concentrating on those things and started to care about peoples lives This brief episode in history is still repositioning the status of design and reconfiguring its signifier from consumption to care The contents of this book cover the outbreak lockdown and the beginning of the reopening in the UK In between the book functions as a history of pandemic crisis design interventions As such it is a research in the moment project where we have illustrated our thoughts and insights in tables charts and diagrams We have accepted all design interventions as valid and given them the same role and status by presenting each of them in a standard format No curation No selection No position The task of critical analysis must follow perhaps by us certainly by others
