Clifford Ashby

Orientation To The Theatre:

Orientation to the Theatre Theodore W. Hatlen, 1981 Orientation to the Theater, 1972 **Orientation to the Theater** Theodore W. Hatlen, 1987 **Orientation to the Theatre [sic]** Theodore W. Hatlen, 1981 **Classical Greek Theatre** Clifford Ashby, 1999

Many dogmas regarding Greek theatre were established by researchers who lacked experience in the mounting of theatrical productions. In his wide ranging and provocative study Clifford Ashby, a theatre historian trained in the practical processes of play production as well as the methods of historical research, takes advantage of his understanding of technical elements to approach his ancient subject from a new perspective. In doing so he challenges many long held views. Archaeological and written sources relating to Greek classical theatre are diverse, scattered and disconnected. Ashby's own and memorable fieldwork led him to more than one hundred theatre sites in Greece, southern Italy, Sicily and Albania and as far into modern Turkey as Hellenic civilization had penetrated. From this extensive research he draws a number of novel revisionist conclusions on the nature of classical theatre architecture and production. The original orchestra shape, for example, was a rectangle or trapezoid rather than a circle. The altar sat along the edge of the orchestra, not at its middle. The scene house was originally designed for a performance event that did not use an up center door. The crane and ekkyklema were simple devices while the periaktoi probably did not exist before the Renaissance. Greek theatres were not built with attention to Vitruvius' injunction against a southern orientation and were probably sun sited on the basis of seasonal touring. The Greeks arrived at the theatre around mid morning, not in the cold light of dawn. Only the three actor rule emerges from this eclectic examination, somewhat intact but with the division of roles reconsidered upon the basis of the actors' performance needs. Ashby also proposes methods that can be employed in future studies of Greek theatre. Final chapters examine the three actor production of *Ion*, how one should not approach theatre history and a shining example of how one should. Ashby's lengthy hands on training and his knowledge of theatre history provide a broad understanding of the ways that theatre has operated through the ages as well as an ability to extrapolate from production techniques of other times and places.

Art Management Giep Hagoort, 2003. In the 21st century there is an enormous need for a basic knowledge of management in the cultural sector. This publication fills the gap between general management theory and cultural praxis. It offers information on the global dimension of art management, digitization of culture, strategy formation in the cultural sector, the structure of a cultural organization, cultural leadership. Case studies are presented from different parts of the world, rooted in local resources but from a global perspective.

Auditorium Acoustics and Architectural Design Michael Barron, 2009-09-28. Modern concert halls and opera houses are now very specialized buildings with special acoustical characteristics. With new contemporary case studies, this updated book explores these characteristics as an important resource for architects, engineers and auditorium technicians. Supported by over 40 detailed case studies and architectural drawings of 75 auditoria at a scale of 1:500, the survey of each auditorium type is completed with a discussion of current best
