A Cultural History of Physics Károly Simonyi, 2025-02-28 While the physical sciences are a continuously evolving source of technology and of understanding about our world they have become so specialized and rely on so much prerequisite knowledge that for many people today the divide between the sciences and the humanities seems even greater than it was when C P Snow delivered his famous 1959 lecture The Two Cultures In A Cultural History of Physics Hungarian scientist and educator K roly Simonyi succeeds in bridging this chasm by describing the experimental methods and theoretical interpretations that created

scientific knowledge from ancient times to the present day within the cultural environment in which it was formed Unlike any other work of its kind Simonyi's seminal opus explores the interplay of science and the humanities to convey the wonder and excitement of scientific development throughout the ages These pages contain an abundance of excerpts from original resources a wide array of clear and straightforward explanations and an astonishing wealth of insight revealing the historical progress of science and inviting readers into a dialogue with the great scientific minds that shaped our current understanding of physics Beautifully illustrated accurate in its scientific content and broad in its historical and cultural perspective this book will be a valuable reference for scholars and an inspiration to aspiring scientists and humanists who believe that science is an integral part of our culture **Philosophy, Science, and History** Lydia Patton, 2014-06-27

Philosophy Science and History A Guide and Reader is a compact overview of the history and philosophy of science that aims to introduce students to the groundwork of the field and to stimulate innovative research The general introduction focuses on scientific theory change assessment discovery and pursuit Part I of the Reader begins with classic texts in the history of logical empiricism including Reichenbach's discovery justification distinction With careful reference to Kuhn's analysis of scientific revolutions the section provides key texts analyzing the relationship of HOPOS to the history of science including texts by Santayana Rudwick and Shapin and Schaffer Part II provides texts illuminating central debates in the history of science and its philosophy These include the history of natural philosophy Descartes Newton Leibniz Kant Hume and du Châtelet in a new translation induction and the logic of discovery including the Mill Whewell debate Duhem and Hanson and catastrophism versus uniformitarianism in natural history Playfair on Hutton and Lyell de Buffon Cuvier and Darwin The editor's introductions to each section provide a broader perspective informed by contemporary research in each area including related topics Each introduction furnishes proposals including thematic bibliographies for innovative research questions and projects in the classroom and in the field Science News-letter, 1929 **Scientific History** Elena

Aronova, 2021-04-02 Increasingly scholars in the humanities are calling for a reengagement with the natural sciences Taking their cues from recent breakthroughs in genetics and the neurosciences advocates of big history are reassessing long held assumptions about the very definition of history its methods and its evidentiary base In **Scientific History** Elena Aronova maps out historians' continuous engagement with the methods tools values and scale of the natural sciences by examining several waves of their experimentation that surged highest at perceived times of trouble from the crisis-ridden decades of the early twentieth century to the ruptures of the Cold War The book explores the intertwined trajectories of six intellectuals and the larger programs they set in motion Henri Berr 1863 1954 Nikolai Bukharin 1888 1938 Lucien Febvre 1878 1956 Nikolai Vavilov 1887 1943 Julian Huxley 1887 1975 and John Desmond Bernal 1901 1971 Though they held different political views spoke different languages and pursued different goals these thinkers are representative of a larger motley crew who joined the techniques approaches and values of science with the writing of history and who created powerful institutions and

networks to support their projects In tracing these submerged stories Aronova reveals encounters that profoundly shaped our knowledge of the past reminding us that it is often the forgotten parts of history that are the most revealing

Routledge Revivals: John Phillips and the Business of Victorian Science (2005) Jack Morrell, 2016-10-04 First published in 2005 this book represents the first full length biography of John Phillips one of the most remarkable and important scientists of the Victorian period Adopting a broad chronological approach this book not only traces the development of Phillips career but clarifies and highlights his role within Victorian culture shedding light on many wider themes It explores how Phillips love of science was inseparable from his need to earn a living and develop a career which could sustain him Hence questions of power authority reputation and patronage were central to Phillips career and scientific work Drawing on a wealth of primary sources and a rich body of recent writings on Victorian science this biography brings together his personal story with the scientific theories and developments of the day and fixes them firmly within the context of wider society Michael Oakeshott Selected Writings Collection Michael Oakeshott, 2014-08-26 A collection of 6 volumes of Oakeshott s work Notebooks 1922 86 Early Political Writings 1925 30 The Concept of a Philosophical Jurisprudence Vocabulary of a Modern European State Lectures in the History of Political Thought and What is History **Science** John Michels (Journalist), 1925
