Origins Reconsidered:

Origins Reconsidered Richard E. Leakey, 1993-10-01 Richard Leakey's personal account of his fossil hunting and landmark discoveries at Lake Turkana his reassessment of human prehistory based on new evidence and analytic techniques and his profound pondering of how we became human and what being human really means *Israel's Ethnogenesis* Avraham Faust, 2016-04-01 Winner for best semi popular book of the 2008 Irene Levi Sala Prize for publications on the archaeology of Israel The emergence of Israel in Canaan is a central topic in biblical Syro Palestinian archaeology However the archaeology of ancient Israel has rarely been subject to in depth anthropological analysis until now Israel's Ethnogenesis offers an anthropological framework to the archaeological data and textual sources Examining archaeological finds from thousands of excavations the book presents a theoretical approach to Israel's ethnogenesis that draws on the work of recent critics The book examines Israelite ethnicity ranging from meat consumption decorated and imported pottery Israelite houses circumcision and hierarchy and traces the complex ethnic negotiations that accompanied Israel's ethnogenesis Israel's Ethnogenesis is unique in its contribution to the archaeology of ethnicity offering an anthropological study that will be of interest to students of history Israelite culture and religion and the evolution of ethnic groups *Method and Theory in the Study of Islamic Origins* Herbert Berg, 2003-08-01 This volume deals with the methodological and theoretical issues of the study of Islamic origins Each of the twelve articles examines a different aspect of Islamic origins early Islamic history including the life of the Prophet the Sunna and ad th tafs r and the Qur n and the rise of Islamic law Both sceptical or revisionist scholars and sanguine or traditionalist scholars examine and employ the various contemporary theories on the development of Islam in the first 3 centuries A H In so doing they seek to exemplify the sources and methodologies used to support these theories and to discuss their relative merits **Ancestral Passions** Virginia Morell, 2011-01-11 This biography of the First Family of anthropology reveals how their discoveries collaborations and rivalries contributed to our own knowledge of the origins of humankind In this fascinating and authoritative work acclaimed science writer Virginia Morell brings to vivid life the famous and infamous Leakey family pioneers in the field of paleoanthropology Louis Leakey the patriarch who persisted through initial scientific failures and scandal ridden divorce to achieve spectacular success in digs throughout East Africa Mary his second wife who worked alongside Louis as they made their outstanding discoveries at Olduvai Gorge and elsewhere and Richard their son who ascended to the top of the field in his parents wake only to be threatened with both near fatal illness and fierce professional rivalry Morell transports us into the world of these compelling personalities demonstrating how a small clan of highly talented and fiercely competitive people came to dominate an entire field of science and to contribute immeasurably to our understanding of the origins of humanity Coming Into Being William Irwin Thompson, 1998-06-15 A stunning New Age tour through literature sculpture and science that looks at the archetype of the human ascent to the heavens **Origins** Ariel Adrean Roth, 1998 Are the worlds of science and religion

irreconcilable Has modern science with its theory of evolution disproved the biblical account of the origin of life If one accepts the biblical account of origins does one then have to reject science Scientist and Christian believer Ariel A Roth argues that taken together science and religion give us a more complete and sensible understanding of the world around us our place in it and our ultimate meaning and fate Roth examines such topics as the evidence for evolution and creation the Flood the strengths and limitations of the scientific method and the reliability of Scripture He concludes that the biblical model of a recent creation by God leaves fewer unanswered questions than either science's evolutionary model or any view between the two positions such as progressive creation or theistic evolution Back cover *Umberto Eco, The Da Vinci Code, and the Intellectual in the Age of Popular Culture* Douglass Merrell, 2017-06-05 This book provides a philosophical overview of Umberto Eco's historical and cultural development as a unique internationally recognized public intellectual who communicates his ideas to both an academic and a popular audience It describes Eco's intellectual development from his childhood during World War II and student involvement as a Catholic youth activist and scholar of the Middle Ages to his early writings on the openness of modern works such as Joyce's *Finnegans Wake* Merrell also explores Eco's pioneering role in semiotics and his later career as a novelist

Maps of Time David Christian, 2004-02-23 An introduction to a new way of looking at history from a perspective that stretches from the beginning of time to the present day *Maps of Time* is world history on an unprecedented scale Beginning with the Big Bang David Christian views the interaction of the natural world with the more recent arrivals in flora and fauna including human beings Cosmology geology archeology and population and environmental studies all figure in David Christian's account which is an ambitious overview of the emerging field of Big History *Maps of Time* opens with the origins of the universe the stars and the galaxies the sun and the solar system including the earth and conducts readers through the evolution of the planet before human habitation It surveys the development of human society from the Paleolithic era through the transition to agriculture the emergence of cities and states and the birth of the modern industrial period right up to intimations of possible futures Sweeping in scope finely focused in its minute detail this riveting account of the known world from the inception of space time to the prospects of global warming lays the groundwork for world history and Big History true as never before to its name Lowly Origin Jonathan Kingdon, 2021-01-12 Our ability to walk on two legs is not only a characteristic human trait but one of the things that made us human in the first place Once our ancestors could walk on two legs they began to do many of the things that apes cannot do cross wide open spaces manipulate complex tools communicate with new signal systems and light fires Titled after the last two words of Darwin's *Descent of Man* and written by a leading scholar of human evolution *Lowly Origin* is the first book to explain the sources and consequences of bipedalism to a broad audience Along the way it accounts for recent fossil discoveries that show us a still incomplete but much bushier family tree than most of us learned about in school Jonathan Kingdon uses the very latest findings from ecology biogeography and paleontology to build a new and up to date account of

how four legged apes became two legged hominins He describes what it took to get up onto two legs as well as the protracted consequences of that step some of which led straight to modern humans and others to very different bipeds This allows him to make sense of recently unearthed evidence suggesting that no fewer than twenty species of humans and hominins have lived and become extinct Following the evolution of two legged creatures from our earliest lowly forebears to the present Kingdon concludes with future options for the last surviving biped A major new narrative of human evolution Lowly Origin is the best available account of what it meant and what it means to walk on two feet **Unexpected Affinities** Pablo Meninato,2018-05-23 While the concept of type has been present in architectural discourse since its formal introduction at the end of the eighteenth century its role in the development of architectural projects has not been comprehensively analyzed This book proposes a reassessment of architectural type throughout history and its impact on the development of architectural theory and practice Beginning with Laugier s 1753 Essay on Architecture Unexpected Affinities The History of Type in the Architectural Project from Laugier to Duchamp traces type through nineteenth and twentieth century architectural movements and theories culminating in a discussion of the affinities between architectural type and Duchamp s concept of the readymade Includes over sixty black and white images The Oxford Book of Modern Science Writing Richard Dawkins,2009 Selected and introduced by Richard Dawkins The Oxford Book of Modern Science Writing is a celebration of the finest writing by scientists for a wider audience revealing that many of the best scientists have displayed as much imagination and skill with the pen as they have in the laboratory This is a rich and vibrant collection that captures the poetry and excitement of communicating scientific understanding and scientific effort from 1900 to the present day Professor Dawkins has included writing from a diverse range of scientists some of whom need no introduction and some of whose works have become modern classics while others may be less familiar but all convey the passion of great scientists writing about their science Attending Daedalus Peter Wright,2003-01-01 This new study of the fiction of Gene Wolfe one of the most influential contemporary American science fiction writers offers a major reinterpretation of Gene Wolfe s four volume The Book of the New Sun and its sequel The Urth of the New Sun After exposing the concealed story at the heart of Wolfe s magnum opus Wright adopts a variety of approaches to establish that Wolfe is the designer of an intricate textual labyrinth intended to extend his thematic preoccupations with subjectivity the unreliability of memory the manipulation of individuals by social and political systems and the psychological potency of myth faith and symbolism into the reading experience British Strategy and War Aims 1914-1916 (RLE First World War) David French,2014-04-03 This book illustrates the relationship between British military policy and the development of British war aims during the opening years of the First World War Basing his work on a wide range of unpublished documentary sources David French reassesses for the benefit of students and scholars alike what was meant by a war of attrition *The Cambridge Companion to the Qur'ān* Jane Dammen McAuliffe,2006-11-23 An introduction to the Qur an Koran a text that has guided the lives of millions **The First Human**

Ann Gibbons,2007-04-10 In this dynamic account award winning science writer Ann Gibbons chronicles an extraordinary quest to answer the most primal of questions When and where was the dawn of humankind Following four intensely competitive international teams of scientists in a heated race to find the missing link the fossil of the earliest human ancestor Gibbons ventures to Africa where she encounters a fascinating array of fossil hunters Tim White the irreverent Californian who discovered the partial skeleton of a primate that lived 4 4 million years ago in Ethiopia French paleontologist Michel Brunet who uncovers a skull in Chad that could date the beginnings of humankind to seven million years ago and two other groups one led by zoologist Meave Leakey the other by British geologist Martin Pickford and his French paleontologist partner Brigitte Senut who enter the race with landmark discoveries of their own Through scrupulous research and vivid first person reporting The First Human reveals the perils and the promises of fossil hunting on a grand competitive scale

Anthropology Christoph Wulf,2013-04-08 Originally published in German Christoph Wulf s Anthropology sets its sights on a topic as ambitious as its title suggests anthropology itself Arguing for an interdisciplinary and intercultural approach to anthropology that incorporates science philosophy history and many other disciplines Wulf examines with breathtaking scope all the ways that anthropology has been understood and practiced around the globe and through the years Seeking a central way to understand anthropology in the midst of many different approaches to the discipline Wulf concentrates on the human body An emblem of society culture and time the body is also the result of many mimetic processes the active acquisition of cultural knowledge By examining the role of the body in the performance of rituals gestures language and other forms of imagination he offers a bold new look at how culture is produced handed down and transformed Drawing such examinations into a comprehensive and sophisticated assessment of the discipline as a whole Anthropology looks squarely at the mystery of humankind and the ways we have attempted to understand it

The Causes of the First World War Annika Mombauer, 2024-06-28 The causes of the First World War were disputed before the first shots had even been fired Recriminations intensified following the Treaty of Versailles when the victors accused Germany and its allies of having caused the war This was the start of a heated blame game in which historians and politicians on all sides became embroiled in a war of documents and publications More than 100 years on the question of the origins of the First World War still remains contested Based on Annika Mombauer's *The Origins of the First World War* 2002 this thoroughly revised and expanded volume examines the political and ideological concerns that fuelled these international disagreements and offers an extensive analysis of a complex and unique historical controversy from 1914 to the centenary and beyond It provides students teachers scholars and non specialist readers with a comprehensive guide through the maze of conflicting interpretations

Sangiran: Man, Culture, and Environment in Pleistocene Times Truman Simanjuntak, Bagyo Prasetyo, Retno Handini, 2001

The Making of the Abrahamic Religions in Late Antiquity Guy G. Stroumsa, 2015 This book presents how ancient Christianity must be understood from the viewpoint of the history of religions in late antiquity The continuation of biblical prophecy runs like a thread from Jesus through Mani to Muhammad And yet this thread arguably the single most important characteristic of the Abrahamic movement often remains outside the mainstream hidden as it were since it generates heresy The figures of the Gnostic the holy man and the mystic are all sequels of the Israelite prophet They reflect a mode of religiosity that is characterized by high intensity It is centripetal and activist by nature and emphasizes sectarianism and polemics esoteric knowledge or gnosis and charisma The other mode of religiosity obviously much more common than the first one is centrifugal and irenic It favors an ecumenical attitude contents itself with a widely shared faith or pistis and reflects in Weberian parlance the routinization of the new religious movement This is the mode of priests and bishops rather than that of martyrs and holy men These two main modes of religion high versus low intensity exist simultaneously and cross the boundaries of religious communities They offer a tool permitting us to follow the transformations of religion in late antiquity in general and in ancient Christianity in particular without becoming prisoners of the traditional categories of patristic literature Through the dialectical relationship between these two modes of religiosity one can follow the complex transformations of ancient Christianity in its broad religious context
