Origins of Human Aggression Gerard G. Neuman, 1987 **Troubled Times** David W. Frayer, Debra L. Martin, 2014-05-01 Evidence amassed in *Troubled Times* indicates that much like in the modern world violence was not an uncommon aspect of prehistoric dispute resolution From the civilizations of the American Southwest to the Mesolithic of Central Europe the contributors examine violence in hunter gatherer as well as state societies from both the New and Old Worlds Drawing upon cross cultural analyses archaeological data and skeletal remains this collection of papers offers evidence of domestic violence homicide warfare cannibalism and ritualized combat among ancient peoples Beyond the physical evidence various models and explanations for violence in the past are explored **Psychological Undercurrents of History** Henry Lawton, Jerry S. Piven, 2001 *Psychological Undercurrents of History* gathers together salient works of scholarship which endeavor to interpret the madness and imagination of our past from ancient religion to the Holocaust to Millennialism and Apocalyptic violence **Routledge Library Editions: Security and Society** Various, 2021-09-30 This 12 volume set contains titles originally published between 1934 and 1995 An eclectic mix of titles this collection draws from anthropology economics ethics politics psychology and sociology Exploring security in both war and peacetime it includes volumes looking at the causes of war and its effect on society as a whole the soldiers themselves and their place in society the portrayal of war in the press both in words and photographs and the politics behind them **California Slavic Studies, Volume XIV** Henrik Birnbaum, Thomas Eekman, Hugh McLean, Nicholas V. Genetic Seeds of Warfare R. Paul Shaw, Yuwa Wong, 2020-12-22 For millennia humanity has simultaneously deplored and waged war With each conflict the stakes have risen and we now face global annihilation for the sake of a practice all the world claims to condemn Is there some seemingly irresistible force that impels us toward our own destruction To explain this central paradox of human behaviour *Genetic Seeds of Warfare* originally published in 1989 advances a startling new theory It traces the origins of warfare back to early groups of Homo sapiens in competition for scarce resources showing that warfare evolved as these groups evolved kin group against kin group tribe against tribe nation against nation Rather than being tied to a specific gene warfare emerged as one of many behavioural strategies for maximising genetic survival As social groups became more complex motivations for warfare developed from simple protection of blood relations to political appeals to shared ethnicity religion and national identity But the ultimate cause of warfare is rooted in the most basic of human drives the need to ensure that one's genes will survive and reproduce The authors challenge many assumptions about human behaviour in general and warfare in particular They convincingly present the case for an evolutionary understanding of the

propensity for warfare supporting their argument with data from a vast array of social and natural science research In doing so they reveal why previous attempts at ending war have failed and make proactive suggestions toward the development of a new agenda for world peace

Human Natures Paul R. Ehrlich,2001-12-31 Why do we behave the way we do Biologist Paul Ehrlich suggests that although people share a common genetic code these genes do not shout commands at us at the very most they whisper suggestions He argues that human nature is not so much result of genetic coding rather it is heavily influenced by cultural conditioning and environmental factors With personal anecdotes a well written narrative and clear examples *Human Natures* is a major work of synthesis and scholarship as well as a valuable primer on genetics and evolution that makes complex scientific concepts accessible to lay readers
