Ortner And Ortner Primer Of Architecture:

Ortner & Ortner Laurids Ortner, Liesbeth Waechter-Böhm, Gerwin Zohlen, 2000 The buildings and projects created by Austrian architects Laurids and Manfred Ortner over the last 30 years form the very basis for this primer of architecture which is simultaneously the first comprehensive documentation of their work In the form of a glossary headwords provide the framework for textual interpretation and visual illustration of all aspects of the architects work This rather unconventional approach has produced a publication which has not just documentary value for Ortner Ortner s architectural language but is also a reflection on the topic of building as art in a more widely applicable context The contrasting perspectives of the authors provide a stimulating analysis of an architectural oeuvre which ranks among the most enigmatic in contemporary architecture

Architects Today Kester Rattenbury, Robert Bevan, Kieran Long, 2006-08-10 This volume offers both an introduction to and an insight into key contemporary architects as well as giving a snapshot of the varied nature of architecture today For each architect there are details of their life and work and illustrations of their most representative and iconic buildings

Collours Rem Koolhaas, 2001 The nature of colour should change no longer just a thin layer of change but something that genuinely alters perception this stipulation of Rem Koolhaas is echoed by the world famous architects and designers Alessandro Mendini and Norman Foster In this volume they present between them a total of 90 colours each covering half a page accompanied by comments on the background the significance and the applications of the colours Studies of colours from each office form the basis of this book and were previously only available in extravagant individual editions With this comprehensive and consistent presentation of the varying approaches to colour we have a compendium which shows the wide use of colour in today s technologically advanced architecture with its modern post modern and deconstructive orientation The range of examples of the colours in practice includes load bearing structures facades interior design furnishing and the entire spectrum of product design
