Russia in the German Global Imaginary James E. Casteel,2016-05-06 This book traces transformations in German views of Russia in the first half of the twentieth century leading up to the disastrous German invasion of the Soviet Union in 1941 Casteel shows how Russia figured in the imperial visions and utopian desires of a variety of Germans including scholars journalists travel writers government and military officials as well as nationalist activists He illuminates the ambiguous position that Russia occupied in Germans global imaginary as both an imperial rival and an object of German power During the interwar years in particular Russia now under Soviet rule became a site onto which Germans projected their imperial ambitions and expectations for the future as well as their worst anxieties about modernity Casteel shows how the Nazis drew on this cultural repertoire to construct their own devastating vision of racial imperialism

Railways and the Russo-Japanese War Felix Patrikeeff,Harry Shukman,2007-02-06 This book explores the nexus between railways and the Russo Japanese War 1904 05 the first modern war and one in which the railways played a key part Felix Patrikeeff and Harry Shukman examine some of the key dimensions of the Russo Japanese War most notably

how uncomfortably technological and human dimensions of Russia's war effort interleaved in the course of the conflict. They demonstrate how advantages that might have been built upon were squandered, blunt traditional forms and habits were applied in politically tortuous contexts and technological edge negated by the internal turmoil of a country unable to tame a process of modernization. Illustrating the vital role railways played in the Russo-Japanese War, generally considered to be the first modern technological conflict and a precursor to the First World War, railways and the Russo-Japanese War will appeal to students of the Russo-Japanese War, Russian history, military history and international history in general.
