**American Constitutionalism Heard Round the World, 1776-1989** George Athan Billias, 2011-12 Winner of the 2010 Book Award from the New England Historical Association American constitutionalism represents this country's greatest gift to human freedom yet its story remains largely untold For over two hundred years its ideals ideas and institutions influenced different peoples in different lands at different times American constitutionalism and the revolutionary republican documents on which it is based affected countless countries by helping them develop their own constitutional democracies Western constitutionalism of which America was a part along with Britain and France reached a major turning point in global history in 1989 when the forces of democracy exceeded the forces of autocracy for the first time Historian George Athan Billias traces the spread of American constitutionalism from Europe Latin America and the Caribbean region to Asia and Africa beginning chronologically with the American Revolution and the fateful shot heard round the world and ending with the conclusion of the Cold War in 1989 The American model contributed significantly by spearheading the drive to greater democracy throughout the Western world and Billias's landmark study tells a story that will change the way readers view the important role American constitutionalism played during this era *Russia and Eastern Europe, 1789-1985* Raymond Pearson, 1989 Siberian Journey Perry McDonough Collins, 2011-11-18 Perry McDonough Collins was the first American to journey through Siberia and down the 2 690 mile Amur River to the Pacific Ocean In 1860 he wrote *A Voyage Down the Amoor* an account of his adventures and his book proved so popular that it was reissued in 1864 *Siberian Journey* consists of Collins's original text framed by an interpretive introduction and explanatory notes by Charles Vevier providing an extensive first hand account of Russia's land and its people in the mid nineteenth century Transnational Labour History Marcel van der Linden, 2017-07-05 There has been a growing recognition amongst scholars that labour historians need to look beyond national borders in order to place the history of the working classes into a much broader context than has hitherto been the case Whilst studies focused on individual countries are essential it is only by comparing and contrasting the experiences across time and space that a true understanding of the subject can be attempted Professor Marcel van der Linden has contributed much to the debate on cross border processes and comparisons This volume makes available in English a collection of twelve of his most important essays on the theme of transnational labour history Previously published in a range of journals and volumes with two original contributions *Transnational Labour History* brings them together in a single convenient collection together with a new introduction This work will undoubtedly provide an invaluable resource for all students of European labour history Soviet Psychology John McLeish, 2015-12-22 Originally published in 1975 this title sets out to show us the differences between Soviet and other ways of thinking about nature man and society The basic factor distinguishing Soviet psychology is that it views phenomena from the perspective of a highly articulated body of theoretical assumptions and rejects the inductive eclecticism of Western psychology The theoretical framework within which Soviet

psychology functions is the product of a distinctive socio political and cultural development in Russia profoundly shaped by the institutions of autocracy and Orthodox religion and the economic system of serfdom and the radical revolt which grew up in opposition to this and advocated materialism secularism and atheism This radical philosophic tradition in Russia best represented by the writings of Chernishevski fused with the doctrines of Marxism and the new science of behaviour developed by Sechenov and Pavlov to create the theoretical framework of Soviet psychology The book also analyses the discussions controversies and decrees which are at the root of the contemporary science of behaviour in the Soviet Union and points to the impressive body of empirical knowledge which has arisen Soviet Psychology is unique in presenting Soviet psychology from an inside point of view and in making us appreciate the strongly theoretical stance of Soviet psychology which Professor McLeish claims is unlikely to be much influenced by the new atmosphere of détente

The Rise of the Technocrats W.H.G. Armytage, 2013-10-28 First published in 2006 The ambitious role cast for scientists in public affairs has been matched by an equal coyness on the part of scientists to play it Yet in spite of themselves they have been virtually dragged on to the political stage because of their collectivities groups formed over the last four centuries often more fugitive than institutional which have helped modify the human environment thereby enabling men to emancipate themselves from the tyranny of the present and plan for the future The byproducts of such plans from the great botanical gardens to the seed beds of physical scientists like the Ecole Polytechnique have also incubated further ideas about the relation of science and society that are ecumenical in scope Indeed the positivist overtones of the Polytechnique herald the transition from plutocracy to technocracy for the technical
