W. economic and political institutions were established and are only now being effectively challenged by Gorbachev's revolution. While complementing the previous two volumes of this author's work, the book is designed to be read independently. It sheds new light on a dramatic moment in Soviet history and in the formation of the Soviet system. *Russia and Eastern Europe, 1789-1985* Raymond Pearson, 1989

Hungry and Starving James R. Gibson, 2024-02-13 In the wake of Vladimir Lenin's death in 1924, various protagonists grappled to become his successor, but it was not until 1928 that Joseph Stalin emerged as leader of the Russian Marxists-Bolshevik wing. Surrounded by an increasingly hostile capitalist world, Stalin reasoned that Soviet Russia had to industrialize in order to survive and prosper. But domestic capital was scarce, so the country's minerals, timber, and grain were sold abroad for hard currency to fund the development of heavy industry. Claiming total control of agricultural management and production, Stalin implemented the collectivization of farming, consolidating small peasant holdings into large collective farms and controlling their output. The program was economically successful, but it came at a high social cost, as the state encountered intense resistance, and between 1928 and 1934, collectivization led to the deaths of at least ten million people from starvation and associated diseases. *Hungry and Starving* elicits the voices of both the culprits and the victims at the centre of this horrific process. Through primary accounts of collectivization, as well as the eyewitness observations of ambassadors, reporters, tourists, fellow travellers, Russian emigrants, tsarist officials, aristocrats, scientists, and technical specialists, James Gibson engages the crucial notions and actors in the academic discourse of the period. He finds that the famine lasted longer than is commonly supposed, that it took place on a national rather than a regional scale, and that while the famine was entirely man-made, the result of the ruthless manner in which collectivization was executed and enforced, it was neither deliberate nor ethnically motivated, given that it was not in the Soviet state's economic or political interest to engage in genocide. Highlighting the experiences of life and death under Stalin's ruthless regime, *Hungry and Starving* offers a broader understanding of the Great Soviet Famine. *Stalin In Power* Robert C. Tucker, 1992-05-05

Explains the motivations, personality, and actions of the man under whose rulership millions of Russians perished. **The Industrialisation of Soviet Russia Volume 4: Crisis and Progress in the Soviet Economy, 1931-1933** R. W. Davies, 2016-07-27 The profound economic crisis of 1931-33 undermined the process of industrialisation and the stability of the regime. In spite of feverish efforts to achieve the over-ambitious first five-year plan, the great industrial projects lagged far behind schedule. These were years of inflation, economic disorder, and of terrible famine. In 1933, in response to the crisis, policies and systems changed significantly. Greater realism prevailed; more moderate plans reduced investment; strict monetary controls and more emphasis on economic incentives and the role of the market. The reforms failed to prevent the terrible famine of 1933, in which millions of peasants died. But the last months of 1933 saw the first signs of an industrial boom, the outcome of the huge investments of previous years. Using the previously secret archives of the Politburo and the Council of People's Commissars, the author shows how, during these formative years, the economic system acquired the shape
