Contending with Stalinism Lynne Viola,2018-05-31 Resistance has become an important and controversial analytical category for the study of Stalinism The opening of Soviet archives allows historians an unprecedented look at the fabric of state and society in the

1930s Researchers long spellbound by myths of Russian fatalism and submission as well as by the very real powers of the Stalinist state are startled by the dimensions of popular resistance under Stalin Narratives of such resistance are inherently interesting yet the topic is also significant because it sheds light on its historical surroundings Contending with Stalinism employs the idea of resistance as a tool to explore what otherwise would remain opaque features of the social cultural and political history of the 1930s In the process the authors reveal a semi autonomous world residing within and beyond the official world of Stalinism Resistance ranged across a spectrum from violent strikes to the passive resistance that was a virtual way of life for millions and took many forms from foot dragging and negligence to feigned ignorance and false compliance Contending with Stalinism also highlights the problematic nature of resistance as an analytical category and stresses the ambiguous nature of the phenomenon The topics addressed include working class strikes peasant rebellions black market crimes official corruption and homosexual and ethnic subcultures Constructive Spirit David W.

McFadden, Claire Gorfinkel, Sergei Nikitin, 2004 Hungry and Starving James R. Gibson, 2024-02-13 In the wake of Vladimir Lenin's death in 1924 various protagonists grappled to become his successor but it was not until 1928 that Joseph Stalin emerged as leader of the Russian Marxists Bolshevik wing Surrounded by an increasingly hostile capitalist world Stalin reasoned that Soviet Russia had to industrialize in order to survive and prosper But domestic capital was scarce so the country's minerals timber and grain were sold abroad for hard currency for funding the development of heavy industry Claiming total control of agricultural management and production Stalin implemented the collectivization of farming consolidating small peasant holdings into large collective farms and controlling their output The program was economically successful but it came at a high social cost as the state encountered intense resistance and between 1928 and 1934 collectivization led to the deaths of at least ten million people from starvation and associated diseases Hungry and Starving elicits the voices of both the culprits and the victims at the centre of this horrific process Through primary accounts of collectivization as well as the eyewitness observations of ambassadors reporters tourists fellow travellers Russian emigrants tsarist officials aristocrats scientists and technical specialists James Gibson engages the crucial notions and actors in the academic discourse of the period He finds that the famine lasted longer than is commonly supposed that it took place on a national rather than a regional scale and that while the famine was entirely man made the result of the ruthless manner in which collectivization was executed and enforced it was neither deliberate nor ethnically motivated given that it was not in the Soviet state's economic or political interest to engage in genocide Highlighting the experiences of life and death under Stalin's ruthless regime Hungry and Starving offers a broader understanding of the Great Soviet Famine *Lenin and the Russian Revolution* Steve Phillips, 2000 A study of Lenin and the Russian Revolution It is designed to fulfil the AS and A Level specifications in place from September 2000 The AS section deals with narrative and explanation of the topic The A2 section reflects the different demands of the higher level examination *The ^AOxford Handbook of Communist Visual Cultures*
