Convex Optimization Techniques for Geometric Covering Problems Jan Hendrik Rolfes,2021-09-15 The present thesis is a commencement of a generalization of covering results in specific settings such as the Euclidean space or the sphere to arbitrary compact metric spaces In particular we consider coverings of compact metric spaces X by balls of radius r We are interested in the minimum number of such balls needed to cover X denoted by $N_{\text{cal}}(X, r)$ For finite X this problem coincides with an instance of the combinatorial textsc set cover problem which is $\text{mathrm{NP}}$ complete We illustrate approximation techniques based on the moment method of Lasserre for finite graphs and generalize these techniques to compact metric spaces X to obtain upper and lower bounds for $N_{\text{cal}}(X, r)$ The upper bounds in this thesis follow from the application of a greedy algorithm on the space X Its approximation quality is obtained by a generalization of the analysis of Chvatal s algorithm for the weighted case of textsc set cover We apply this greedy algorithm to the spherical case $X = S^n$ and retrieve the best non asymptotic bound of B or oczky and Wintsche Additionally the algorithm can be used to determine coverings of Euclidean space with arbitrary measurable objects having non empty interior The quality of these coverings slightly improves a bound of Nasz odi For the lower bounds we develop a sequence of bounds $N_{\text{cal}}(t, X, r)$ that converge after finitely say α in N many steps $N_{\text{cal}}(1, X, r) \leq \dots \leq N_{\text{cal}}(\alpha, X, r) \leq N_{\text{cal}}(X, r)$ The drawback of this sequence is that the bounds $N_{\text{cal}}(t, X, r)$ are increasingly difficult to compute since they are the objective values of infinite dimensional conic programs whose number of constraints and dimension of underlying cones grow accordingly to t We show that these programs satisfy strong duality and derive a finite dimensional semidefinite program to approximate $N_{\text{cal}}(2, S^2, r)$ to arbitrary precision Our results rely in part on the moment methods developed by de Laat and Vallentin for the packing problem on topological packing graphs However in the covering problem we have to deal with two types of constraints instead of one

type as in packing problems and consequently additional work is required **Business Periodicals Index** ,2005 Index

Reids compelling storytelling and compelling characters transport readers to a bygone era, immersing them in a world of glamour, ambition, and self-discovery. Discover the Magic : Delia Owens "Where the Crawdads Sing" This evocative coming-of-age story follows Kya Clark, a young woman who grows up alone in the marshes of North Carolina. Owens spins a tale of resilience, survival, and the transformative power of nature, entrancing readers with its evocative prose and mesmerizing setting. These popular novels represent just a fraction of the literary treasures that have emerged in 2023. Whether you seek tales of romance, adventure, or personal growth, the world of literature offers an abundance of engaging stories waiting to be discovered. The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a masterful and thrilling novel that will keep you guessing until the very end. The novel is a cautionary tale about the dangers of obsession and the power of evil.
