The poster features a composite image of two men. The upper man is wearing a dark blue turban and has a beard, looking down with a serious expression. The lower man is clean-shaven with a mustache, looking upwards. A golden, intricate geometric pattern, resembling a Sri Yantra, is centered between the two faces. The background is a dark, high-angle view of a city at night, with lights from buildings visible. The title 'SACRED GAMES' is written in a bold, yellow, sans-serif font across the middle of the image.

Like and Unlike God John Neary, 1999 Neary argues that each type of imagination analogical and dialectical is the other's supplement they need each other to create a vision that is sharp rich and whole **BOOK JACKET**

The Idea of Wilderness Max Oelschlaeger, 1991-01-01 How has the concept of wild nature changed over the millennia And what have been the environmental consequences In this broad ranging book Max Oelschlaeger argues that the idea of wilderness has reflected the evolving character of human existence from Paleolithic times to the present day An intellectual history it draws together evidence from philosophy anthropology theology literature ecology cultural geography and archaeology to provide a new scientifically and philosophically informed understanding of humankind's relationship to nature Oelschlaeger begins by examining the culture of prehistoric hunter gatherers whose totems symbolized the idea of organic unity between humankind and wild nature and idea that the author believes is essential to any attempt to define human potential He next traces how the transformation of these hunter gatherers into farmers led to a new awareness of distinctions between humankind and nature and how Hellenism and Judeo Christianity later introduced the unprecedented concept that nature was valueless until humanized Oelschlaeger discusses the concept of wilderness in relation to the rise of classical science and modernism and shows that opposition to modernism arose almost immediately from scientific literary and philosophical communities He provides new and in some cases revisionist studies of the seminal American figures Thoreau Muir and Leopold and he gives fresh readings of America's two prodigious wilderness poets Robinson Jeffers and Gary Snyder He concludes with a searching look at the relationship of evolutionary thought to our postmodern effort to reconceptualize ourselves as civilized beings who remain in some ways natural animals

Ragnarok: The Vanir Tim Korklewski, 2019-12-26 The Aesir are dead and the Vanir now uncontested in their divinity come to claim what is left of the Nine Realms The war clans must oppose or align with these new foes Ragnarok The Vanir features new Godsparks that war clans may harness to combat the marauding Vanir as well as new scenarios monsters and options to further develop players campaigns

The Love of Nature and the End of the World Shierry Weber Nicholzen, 2003-02-28 A psychological exploration of how the love of nature can coexist in our psyches with apathy toward environmental destruction Virtually everyone values some aspect of the natural world Yet many people are surprisingly unconcerned about environmental issues treating them as the province of special interest groups Seeking to understand how our appreciation for the beauty of nature and our indifference to its destruction can coexist in us Shierry Weber Nicholzen explores dimensions of our emotional experience with the natural world that are so deep and painful that they often remain unspoken The Love of Nature and the End of the World is a gathering of meditations and collages Its evocations of our emotional attachment to the natural world and the emotional impact of environmental deterioration are meant to encourage individual and collective reflection on a difficult dilemma Nicholzen draws on work in environmental philosophy and ecopsychology the writings of psychoanalytic thinkers such as Wilfred Bion Donald Meltzer

and D W Winnicott and ideas from Buddhist and Sufi traditions She shows how our emotional responses to the vulnerabilities of the natural world range from intense caring and compassion through grief and outrage to diffuse depression Individual chapters focus on silence and the process whereby we move from the unspoken to the spoken the love of nature the perceptual reciprocity with the natural world to which we might mature beauty in the human and natural realms the psychological impact of the destruction of the natural world and reflections on the future *Spirituality, Sport, and Doping: More than Just a Game* Tracy J. Trothen, 2018-10-24 This book explores the deeper meaning of sports Drawing on contemporary research the author makes a strong case for why we should see sport not only in terms of religion but more importantly as a possible location for spiritual meaning Taking this a step farther she considers how gene editing robotics and other biomedical technological enhancements affect not only sports performances but experiences of sport as sacred In addition the author explores what difference it might make to the enhancement debate if sports spirituality is taken seriously The author is not afraid to explore the issue in all its complexity Yet the argument she presents is both meaningful and accessible This investigation applies insights from Christian theology applied ethics psychology and sports studies From lightweight tennis racquets to anabolic steroids athletes have long used technology and science to improve their performances But until now no one has asked how biomedical technological enhancements might affect the undervalued spiritual dimension of sport This book presents rich insights into the connection between sports spirituality and human enhancement technologies It will appeal to researchers athletes and sports followers and undergraduate and graduate students in ethics sport religion or theology **Relentless Love** Edwin Carl Smith, 2004 Ed Smith defines enchantment as that place where our life and our deepest dreams merge and he maintains that it is our true nature In *Relentless Love* he proposes that we can live lives of enchantment through the practice of relentless love He inspires us to create a world based on our intention to love and our faith in life and contends that evolution is propelling us to do so He defines evolution as events you do not like that converge to create a possibility you could not anticipate This is an original lucid voice with something very compelling and vital to say that can change all of our lives **Library of Congress Subject Headings** Library of Congress, 2010 Interface Branden Hookway, 2014-04-04 A cultural theory of the interface as a relation that is both ubiquitous and elusive drawing on disciplines from cultural theory to architecture In this book Branden Hookway considers the interface not as technology but as a form of relationship with technology The interface Hookway proposes is at once ubiquitous and hidden from view It is both the bottleneck through which our relationship to technology must pass and a productive encounter embedded within the use of technology It is a site of contestation between human and machine between the material and the social between the political and the technological that both defines and elides differences A virtuoso in multiple disciplines Hookway offers a theory of the interface that draws on cultural theory political theory philosophy art architecture new media and the history of science and technology He argues that the theoretical mechanism

of the interface offers a powerful approach to questions of the human relationship to technology Hookway finds the origin of the term interface in nineteenth century fluid dynamics and traces its migration to thermodynamics information theory and cybernetics He discusses issues of subject formation agency power and control within contexts that include technology politics and the social role of games He considers the technological augmentation of humans and the human machine system discussing notions of embodied intelligence Hookway views the figure of the subject as both receiver and active producer in processes of subjectification The interface he argues stands in a relation both alien and intimate vertiginous and orienting to those who cross its threshold
