Collaborative Product Design and Manufacturing Methodologies and Applications Wei Dong Li,Soh Khim Ong,Andrew Yeh Ching Nee,Christopher Alan McMahon,2007-06-02 Collaborative Product Design and Manufacturing Methodologies and Applications introduces a wide spectrum of collaborative engineering issues in design and manufacturing It offers state of the art chapters written by international experts from academia and industry and reflects the most up to date R D work and applications especially those from the last three to five years The book will serve as an essential reference for academics upper level undergraduate and graduate students and practicing professionals Value Driven Product Planning and Systems Engineering Harry E. Cook,Luke A. Wissmann,2007-08-28 Engineers and scientists often need to sell an innovative idea for a new product or a new product improvement to top management Sometimes their tendency is to focus on the WOW of the new technology at the expense of making a convincing business case When the new technology represents a large cost reduction there will be much less of a problem in convincing management to approve the project if the investment level is acceptable The major rub comes when the new feature or technology is an improvement in customer value that also generates an increase in cost This makes the sell difficult in spite of the fact that many of the inventive products available today are widely used because they provide very high value in relation to their added cost Engineers and scientists also occupy product planning positions where they need to be constantly scanning ideas for improving value that come both from inside and outside the company to see if they make sense to incorporate in a future product At the same time they need to anticipate what their major competitors are likely to do to improve their next generation of product These problems are

exacerbated in today s global economy because the number of competitors has increased markedly in many product segments and there are many technological alternatives available for consideration The problem of anticipating the moves of your major competitor is particularly challenging because most firms keep plans very secure The engineer as product planner must learn to think like its major competitor using customer value as a guide Value Driven Product Planning and Systems Engineering provides essential support for engineers and scientists who are required to make realistic business cases for new innovative product concepts *Proceedings of the ASME Applied Mechanics Division* ,2004 *High Speed Machining VI* Xian Li Liu,Bin Jiang,Xue Feng Wu,Cai Xu Yue,2014-07-28 Selected peer reviewed papers from the 6th International Conference on High Speed Machining ICHSM 2014 July 24 25 2014 Harbin China Fatigue Testing and Analysis Under Variable Amplitude Loading Conditions Peter C. McKeighan,Narayanaswami Ranganathan,2005 Thirty eight peer review papers provide the latest information on fatigue testing and analysis under variable amplitude spectrum loading conditions focus purely on fatigue testing fatigue design techniques or a combination of both This new ASTM publication serves as an important reference for engineers and scientists involved in structural integrity and component lifetime management
